

“Access from AT&T” offers broadband for low-income consumers

Technology has the ability to revolutionize education and empower lives, with the biggest impact on those who can connect to it. Students from low-income households often find themselves trapped by a digital divide – isolated by economics from online opportunities and resources.

A new program, called Access from AT&T, provides an affordable way for low-income consumers to fully participate in today’s connected community. It is available to households with at

least one resident participating in the U.S. Department of Agriculture Supplemental Nutrition Assistance Program, or SNAP, and located within the 21 states where AT&T offers home Internet service.

Qualifying households will get the fastest of three speed tiers – 10Mbps, 5Mbps or 3Mbps –that is available at their address.* Internet speeds provided at 10Mbps and 5Mbps will cost \$10 a month, and Internet speeds at 3Mbps will cost \$5 a month.** Installation and Internet equipment fees will be waived for participating households.

Potential customers can learn more and see if they qualify by visiting att.com/access, or by calling 1-855-220-5211 for assistance in English or 1-855-220-5225 for assistance in Spanish.

*Geographic and other restrictions apply. Pricing excludes taxes and fees. *Actual customer speeds may vary and are not guaranteed. For more information, go to att.com/speed101. **Service will include a monthly data allowance depending on the type and speed of service you receive. For more information, go to att.com/internet-usage.*
