

SC CHILD EARLY
READING
DEVELOPMENT &
EDUCATION
PROGRAM

Report for FY 2014 & 2015

**SC EDUCATION
OVERSIGHT COMMITTEE**

PO Box 11867 | 227 Blatt Building | Columbia SC 29211 | WWW.SCEOC.ORG

Report on the South Carolina Child Early Reading Development and Education Program

A report from the Education Oversight Committee pursuant to Provisos 1.78. and 1A.33. of the 2014-15 General Appropriation Act.

January 15, 2015

The General Assembly created and funded the Child Development Education Pilot Program (CDEPP) beginning by a budget proviso in Fiscal Year 2006-07. In 2014 the General Assembly codified the program in Act 284 and renamed it the South Carolina Child Early Reading Development and Education Program. The program provides for full-day early childhood education for at-risk children who are four-year-olds by September 1. The definition of at-risk is eligibility for the free or reduced-price federal lunch program and/or Medicaid. Both public schools and private childcare centers licensed by the South Carolina Department of Social Services (DSS) may participate in the program and serve eligible children. The South Carolina Department of Education (SCDE) oversees implementation of CDEPP in public schools and South Carolina Office of First Steps (First Steps) oversees implementation in private childcare settings.

Between school years 2006-07 and 2012-13, CDEPP services targeted eligible children residing in the plaintiff and trial districts in the Abbeville equity lawsuit, Abbeville County School District et. al. vs. South Carolina. In Fiscal Year 2013-14, the General Assembly expanded the program to include children who met the same age and socioeconomic criteria and who resided in a district with a poverty index of 75 percent or more. The poverty index is a measure of the percentage of students who are eligible for the free or reduced-price federal lunch program and/or Medicaid. The expansion included 17 eligible school districts that were not original trial and plaintiff districts. The legislature appropriated additional state funds of \$26.1 million to provide the educational services to children residing in these districts. In Fiscal Year 2014-15, the General Assembly further expanded the program to include children who met the same age and socioeconomic criteria and who resided in a district with a poverty index of 70 percent or more.

Of the funds appropriated for full-day 4K in Fiscal Year 2014-15, the legislature allocated \$300,000 to the Education Oversight Committee (EOC) to perform an evaluation of the program by January 15, 2015. This report is Part I of the Evaluation and it:

- Documents the expansion of 4K in Fiscal Year 2013-14 and in 2014-15;
- Updates the projections for the number of at-risk four-year-olds in each school district and the number of at-risk four-year-olds served in a publicly funded program using available information;

- Analyzes the results of the 2014 administration of the Palmetto Assessment of State Standards (PASS) and the academic achievement of students who had previously participated in the program; and
- Documents the implementation of an early literacy assessment for children in a publicly funded 4K program and all children enrolled in five-year-old kindergarten. Results of the assessment will be reported in Part II of the evaluation. The EOC did not have access to initial assessment data until the week of December 15, 2014, and quality assurance will not be completed until February 2015.
- Provides a preliminary discussion of 4K measures of quality, which influence student growth and school readiness.

ACKNOWLEDGEMENTS

The EOC acknowledges the following individuals from the state who assisted in providing data and technical assistance for this report:

Department of Education:

Dr. Mick Zais, State Superintendent of Education
Mellanie Jinnette, Chief Finance Officer
Dr. Nancy Busbee, Deputy Superintendent for Accountability
Dr. Paul Butler-Nalin, Director, Office of Research and Data Analysis
Penny Danielson, Education Associate, Office of Instructional Practices and Evaluations
Kevin Fatica, Office of Assessment

State Office of First Steps:

Susan DeVenny, Executive Director
Dr. Dan Wuori, Deputy Director
Martha Strickland, 4K State Director

Department of Social Services:

Leigh Bolick, Director of Child Care Services
Mary Lynne Diggs, Director of Head Start Collaboration Office

University of South Carolina:

Dr. Bill Brown, Professor, Department of Educational Studies
Dr. Christine DiStefano, Associate Professor, Department of Educational Studies
Dr. Leigh Kale D'Amico, Research Assistant Professor, Office of Program Evaluation
Dr. Fred Greer, Research Assistant Professor, Department of Educational Studies
Kassie Mae Miller, MPH, Research Associate, Office of Program Evaluation

Executive Summary

Following two years of expanded access to publicly funded pre-kindergarten, over 12,000 at-risk four-year-olds participate in state-funded full-day four-year-old kindergarten, formerly known as the Child Development Education Pilot Program (CDEPP). Including Head Start and ABC Voucher federal programs, 46 percent of all at-risk four year-olds in the state of South Carolina are served in a publicly funded program.

In the current fiscal year, at-risk four-year-olds residing in 60 school districts are eligible to enroll in a program in either a public school or in a private child care center. An overwhelming majority of CDEPP students are enrolled in public school settings (86%). Statewide, district participation has increased to 57 school districts representing 542 classrooms in 225 schools. Approximately 144 child care centers educate CDEPP students, representing the remaining 14%. There are still more than 20,000 at-risk¹ four-year-olds who reside in districts that are not eligible for CDEPP. The South Carolina Department of Education (SCDE) administers CDEPP in public schools, and the South Carolina Office of First Steps (First Steps) leads CDEPP implementation in private child care settings.

Within participating CDEPP districts, a greater percentage of CDEPP students met or exceeded state standards in English Language Arts (ELA) and mathematics than did low-income students in CDEPP districts who did not participate in the program. While progress within CDEPP districts is encouraging, the achievement gap² between CDEPP students and all other students in South Carolina is not narrowing, and in mathematics the achievement gap may be increasing.

To address the achievement gap, the State should prioritize enhancing the quality of CDEPP provision by:

- Incentivizing advancements in quality and improvement in young students' readiness.
- Fostering private child care participation and advancement in the ABC Quality program,
- Providing ongoing assessment of both students and classroom environments in both public school and private child care settings,
- Ensuring consistent, high quality provision of training, technical assistance and other professional development opportunities for early childhood educators throughout CDEPP districts, with a focus on math as well as language and literacy, and
- Encouraging more seamless, coordinated, integrated provision of pre-kindergarten programs among all pre-kindergarten settings (public, private, and Head Start).

¹ At-risk means children who live in poverty and are at-risk of school failure.

² The achievement gap is the difference between the percentages of students who scored Meet or Exemplary on PASS for all students statewide and students participating in CDEPP.

Issue 1: Access to CDEPP Has Expanded

There are an estimated 58,999 four-year-olds in South Carolina. Approximately, 71 percent of these children are in poverty. Statewide, an estimated 46 percent of all at-risk four-year-olds are served in a publicly funded early education program in 2014-15 as compared to 35 percent in the prior year.

In school districts in which children were eligible to participate in the state-funded, full-day 4K program for more than one year, at least 71 percent of all at-risk four-year-olds are currently being served in a publicly funded program, up from 62 percent in the prior school year.

As district eligibility requirements have broadened, the number of districts participating in CDEPP has almost doubled.

Fiscal Year	Eligibility	Number of Eligible Districts
2012-13	Limited to Trial & Plaintiff Districts	34
2013-14	Districts with poverty index of 75% or more	51
2014-15	Districts with a poverty Index of 70% or more	60
2015-16 (estimated)	Districts with a poverty index of 70% or more	64

A majority of children are served in public schools, with approximately 14% being served in private childcare settings. Private childcare providers continue to be vitally important to CDEPP. In three counties (Barnwell 45, Horry and Union) that opted not to

participate in CDEPP during 2014-15, 18 private providers in these counties are educating 253 children who would not otherwise be able to participate.

While the public school system serves 86% of students enrolled in CDEPP, they receive less than three fourths of total state funding.

**Total Funding in FY2014-15
(Recurring, Non-recurring and Carry Forwards)**

Entity	Funding	Percent
SCDE	\$53,815,144	72%
OFS	\$21,204,924	28%
Total	\$75,020,068	

The General Assembly has more than adequately funded the program in Fiscal Years 2013-14 and FY2014-15.

Carry Forwards

Entity	FY2013-14 Actual	% of Total Budget	FY2014-15 Projected	% of Total Budget
SCDE	\$6,771,507	18%	\$6,655,814	18%
First Steps	\$4,004,031	34%	\$5,634,173	33%
Total	\$10,775,538		\$12,289,987	

The total in FY2014-15 does not include the additional \$4,004,031 carried forward by First Steps in the prior fiscal year.

The evaluation team recommends:

- No additional funds should be appropriated to the Office of First Steps for the program in FY2015-16. Instead, the General Assembly should reduce the appropriation to the Office of First Steps by at least \$2.0 million and reallocate those funds to the South Carolina Department of Education.
- To maintain fiscal accountability for the funds appropriated and expended for the program, the Office of First Steps should not make advance payments and only reimburse for actual services provided in each specific fiscal year.

Issue 2: CDEPP Participation Has Resulted in Modest Academic Gains in CDEPP Districts, but Statewide Achievement Gap Has Not Closed

Since 2010, the EOC has documented the academic achievement of students who participate in CDEPP. The initial analysis of students of five-year-old kindergarten demonstrated modest benefits for students who participated in CDEPP. Later analyses using state assessment on the Palmetto Assessment of State Standards (PASS) indicated students who participated in the program achieved at levels slightly higher than students from similar socioeconomic backgrounds who did not participate in the program but attended a public school in a CDEPP district. A greater percentage of CDEPP students met or exceeded state standards in ELA and mathematics than did low-income students in CDEPP districts who did not participate in the program.

Percent of Students who Met or Exceeded State Standards on PASS

Academic Year	Grade	CDEPP Students		Low-Income Students in CDEPP Districts	
		ELA	Math	ELA	Math
2010-11	3	74	60	69	56
2011-12	4	72	68	66	66
2012-13	5	77	71	72	64
2013-14	6	61	61	54	56
2011-12	3	76	65	70	58
2012-13	4	73	73	66	66

		CDEPP Students		Low-Income Students in CDEPP Districts	
2013-14	5	74	68	67	60
2012-13	3	78	59	72	53
2013-14	4	67	64	63	59
2013-14	3	73	60	66	57

However, when considering ELA and math achievement in grade 3, there is concern the achievement gap between CDEPP students and all other students in the state is not narrowing. In math, the achievement gap may be increasing.

Achievement Gap between All South Carolina Students and CDEPP Students

Issue 3: Quality of Existing CDEPP Program Could Be Enhanced

Continued expansion of CDEPP may support school readiness for more at-risk four-year-old children, but there are no data or evidence that suggests that the quality of the educational experiences for children has improved over time.

On the private side, a majority of providers participate in DSS' ABC Quality program. More than one-quarter of CDEPP private providers participated in ABC Quality at the C level or did not participate at all. To continue developing a culture of quality instruction, all providers who participate in CDEPP by accepting state funding should participate in ABC Quality. On the public side, one-third of the schools currently offering full-day pre-kindergarten received an Absolute Rating of Excellent or Good. Approximately half of the schools received an absolute rating of Average, and 18% (or almost one in five) schools received an Absolute Rating of Below Average or At Risk.

Ongoing, consistent professional development for both public and private instruction is essential to high-quality instruction. Currently, provision of professional development at the state level is uneven. With three full-time staff, SCDE reports conducting site monitoring visits to 62 classrooms in districts participating for the first time and 12 visits to new classrooms in districts that had been participating in the program since its inception in 2006. First Steps' CDEPP team includes seven professionals supporting 144 centers with 1,780 students.³ First Steps reports conducting 1,746 monitoring visits in 2013-14 and projects conducting 2,970 visits during 2014-15.

Based upon the analysis of PASS results, specific attention to the professional development and training of CDEPP teachers in math must be enhanced. The recently-implemented *CIRCLE* assessment should be informative when considering strategies to modify or improve instruction so that students can be better prepared to read on grade level by grade 3.

A final, but equally important, approach to enhancing quality is for all pre-kindergarten providers in the State (SCDE, First Steps, Head Start) to collaborate and leverage existing local, state and federal resources to ensure the number of four-year-olds are educated with effective, high-quality instruction. A joint, consolidated community outreach strategy among the state level agencies could provide comprehensive information to eligible families about all pre-kindergarten options and encourage them to voluntarily enroll in the program that meets their children's individual needs for which they are eligible.

³ Data provided by First Steps indicates 144 centers are currently providing CDEPP (see Appendix C). Data provided by DSS indicates 153 centers are currently licensed and providing CDEPP (see Appendix E).

Summary of Findings and Recommendations

Section I: Summary of Program Expansion in Fiscal Year 2013-14

- Ia: Of the \$48.6 million budgeted for the full-day 4K programs in 2013-14, approximately 78 percent was expended with the remainder, 22 percent or \$10.6 million carried forward into Fiscal Year 2014-15. The SCDE expended 82 percent of its appropriation and the Office of First Steps, 66 percent, which includes advance payments of 6 percent of the total budget.
- Ib: Regarding services provided, approximately 8,149 full-time students were funded with 85 percent enrolled in public schools and 15 percent in private centers.
- Ic: Children residing in 51 school districts were eligible to participate in the program with 47 school districts participating in the program through the Department of Education. Of the total number of children funded in public schools, approximately one-third or 34 percent resided in these expansion districts.
- Id: In the private centers administered by First Steps, a total of 1,368 children were served in 93 centers. Forty-six (46) percent of the centers were located in the expansion counties.

Section II: Program Expansion in Fiscal Year 2014-15

- IIa: SCDE projects that 10,685 children will be served in the full-day 4K program in 57 school districts in school year 2014-15.
- IIb: There are an estimated 542 classrooms funded in 2014-15 with 190 being new classrooms.
- IIc: Three school districts eligible to participate in 2014-15 opted not to participate: Barnwell 45, Horry and Union.
- IId: First Steps estimates 144 private child care providers are serving 1,780 to 1,790 children in 34 counties in full-day 4K in school year 2014-15.
- IIe: While Barnwell 45, Horry and Union school districts decided not to participate in 2014-15, 18 private providers in Barnwell, Horry and Union counties are participating in CDEPP and serving 253 children.⁴
- IIg: To date, 1,780 children with unique student identifiers are enrolled in the full-day 4K program in school year 2014-15 in 144 centers in 31 counties.

⁴ See Appendix C for more detail.

- IIh: In addition to the \$4.0 million carried forward in the prior fiscal year, OFS currently projects an additional balance of \$5.6 million in the program in 2014-15.

Section III: Projections of At-Risk Children Served

- IIIa: There are an estimated 58,999 four-year-olds in South Carolina. Approximately, 71 percent of these children are in poverty.
- IIIb: Statewide, an estimated 46 percent of all at-risk four-year-olds are served in a publicly funded early education program as compared to 35 percent in the prior year.
- IIIc: In school districts in which children were eligible to participate in the state-funded, full-day 4K program for more than one year, at least 71 percent of all at-risk four-year-olds are currently being served in a publicly funded program, up from 62 percent in the prior school year. In the ten districts eligible for the first time in 2014-15, at least 54 percent of all at-risk four-year-olds are served in a publicly funded program. (Table 8)
- IIId: Approximately 20,218 children in the districts that were not eligible to participate in 2014-15 who are in poverty and at-risk for school failure. Fourteen percent (14%) of these children are currently being served.
- IIIe: The number of four-year-olds participating in Head Start declined from 6,364 in 2013 to 5,975 in 2014.

Section IV: PASS Performance of Children Served in CDEPP

- IVa: The PASS achievement results in ELA and mathematics document that across all academic years and cohorts, a greater percentage of CDEPP students met or exceeded state standards in ELA than in mathematics.
- IVb: Furthermore, across all academic years and cohorts, a greater percentage of CDEPP students met or exceeded state standards in ELA and mathematics than did low-income students in CDEPP districts who did not participate in the program.
- IVc: In looking at just grade 3 achievement in ELA and mathematics for CDEPP students, there is concern that the achievement gap between CDEPP students and all other students in South Carolina is not narrowing, and in mathematics the achievement gap may be increasing. The achievement gap is the difference between the percentages of student who scored Met or Exemplary on PASS for all South Carolina students and CDEPP students.

Section V: Implementation of *CIRCLE* Assessment

- Va: Reliability information is generally high for the Language and Literacy and Social & Emotional Skills-Checklist scales, showing internal consistency of *CIRCLE* assessment scores within a single administration of the test.
- Vb: For Language and Literacy subscales, reliability estimates were generally high across time points, showing consistency of scores over time.
- Vc: Validity information showed alignment of *CIRCLE* assessment scores with existing standardized measures used to measure preschoolers' language and literacy skills and social and emotional skills. Correlation values were in expected directions and at a moderate level, showing concordance of information across tests.
- Vd: Validity information for Language & Literacy subtests was slightly lower for 3-year old children; however, these children are the youngest of the tested age groups.
- Ve: Confirmatory Factor Analysis provided support for the internal structure of the PA scales.
- Vf: Limited information was presented to describe the sample used for analyses. The sample is not a norming or probabilistic sample, but a sample of largely low-income preschool aged children. The sampling procedure collected information from multiple states; however, no information was provided to show how many children were from a given state.
- Vg: Only one form of reliability was provided for the Social and Emotional Skills-Checklist. Information concerning the sample size used, other forms of reliability, or reliability estimates by age were not provided.
- Vh: Correlation tables are provided without reference to the number of preschoolers used in the analyses.
- Vi: No information regarding item level information (e.g., item difficulty, discrimination /adjusted point biserial correlations) is provided to show how individual items are performing.
- Vj: The technical manual did not present any information concerning a review of items for potential differential item functioning across groups of preschoolers (e.g., sex, race/ethnicity) to ensure that items function without bias across different groups.
- Vk: The scoring for the manual stated that *CIRCLE* assessment scores were provided using sum scores. Error is inherent in sum scores created using item level data. Similarly, latent (or other) scores could be presented at each cutoff value to support that the cutoff values relate to discrimination.
- Vl: There was no discussion of how the internal structure of the Phonological Awareness scale related to the scoring of the test.

- Vm: Confirmatory Factor Analysis information should also include standardized item parameters. The sample (over 10,000 children) could be split in half to validate analyses.

Section VI: Measures of Quality

- VIa: In order to improve CDEPP program quality, a higher level of collaboration and coordination of current training and technical assistance resources is needed at the state level to ensure CDEPP providers have high-quality learning environments so they can provide high-quality instruction. More integrated training and technical assistance would allow for additional leveraging of scarce resources.
- VIb: More than one-quarter of CDEP private providers participated in ABC Quality at the C level or did not participate in ABC Quality at all. C level centers meet, but do not exceed, basic health and safety regulations and standards.
- VIc: The data reflect that one-third of the schools offering a full-day 4K classroom in 2014-15 are schools that received an absolute rating of Excellent or Good in 2014. Approximately half of the schools received an absolute rating of Average in 2014. And, 18 percent or almost one in five schools received an absolute rating of Below Average or At Risk.
- VI d: Based upon current national definitions of “high quality” preschool programs, CDEPP has met some, but not all, high quality standards (including high staff qualifications and ongoing program monitoring).
- VIe: Provision of professional development and technical assistance at the state level is uneven. SCDE provides professional support with three staff dedicated to professional support for 542 classrooms with 10,685 students. First Steps’ CDEPP team includes seven professionals supporting 144 centers with 1,780 students.⁵

Recommendations

The evidence presented in the report documents that access to full-day 4K education programs has been greatly expanded. Eligible children residing in 60 districts in South Carolina in 2014-15 may participate in full-day 4K. Statewide, an estimated 46 percent of all at-risk four-year-olds participate in a publicly funded full-day 4K program, up from 35 percent in the prior year.

With the implementation of the *CIRCLE* assessment, there will also be evidence of the early literacy needs of children participating in the program. The evidence along with discussions with the Office of First Steps to School Readiness, the South Carolina Department of Education and the Head Start Collaboration Office confirm that the three entities operate at the state level independently of one another. And, while both the Office of First Steps to School Readiness and the South Carolina Department of

⁵ Data provided by First Steps indicates 144 centers are currently providing CDEPP (see Appendix C). Data provided by DSS indicates 153 centers are currently licensed and providing CDEPP (see Appendix E).

Education provide professional development and technical assistance opportunities, there is no coordinated effort to measure and improve quality classroom experiences for children at the state level. Consequently, the evaluation team offers the following recommendations to the General Assembly for its consideration:

Recommendation 1: While expansion in the state-funded full-day 4K program has occurred, a more integrated, focused effort to leverage existing 4K program opportunities and enhance the quality of current 4K programs opportunities needs to be considered.

Recommendation 2: Statewide, the number of four-year-olds participating in Head Start declined from 6,364 in 2013 to 5,975 in 2014. Consequently, at the state and local levels greater collaboration between the Office of First Steps, the South Carolina Department of Education and the Head Start Collaboration Office must occur to insure that parents have all relevant information to determine if and which 4K program best serves the individual needs of their children. The evaluation team would recommend all three 4K providers develop a joint, consolidated community outreach strategy that encourages families of students at-risk of school failure to enroll in voluntary full-day quality 4K programs. An example of such collaboration would be the joint publication and distribution of a brochure for families to use in understanding the program and in choosing a provider of services.

Recommendation 3: The evaluation team could not find any statutory authority allowing the expenditure of funds for “advance payments.” To maintain fiscal accountability for the funds appropriated and expended for the program, the evaluation team recommends that the Office of First Steps cease making advance payments and only reimburse for actually services provided.

Recommendation 4: Advancements in quality and improvements in young students’ readiness should be incentivized, utilizing assessment data (i.e. individual student growth, classroom environment, teacher child interaction.) At a minimum any private provider participating in state-funded full-day 4K should be required to participate in ABC Quality.

Recommendation 5: The Office of First Steps carried forward \$4.0 million in FY2013-14 and is projected to carry forward an additional \$5.0 million in the current fiscal year. No additional funds should be appropriated to the Office of First Steps for the program, even with the addition of four districts that will be eligible to participate in FY2015-16. Instead, the General Assembly should reduce the full-day 4K appropriation to the Office of First Steps by at least \$2.0 million and reallocate those funds to the South Carolina Department of Education. Public schools are serving 86 percent of the four-year-olds in the program but received 73 percent of the total funds appropriated for the program in FY2014-15.

Recommendation 6: South Carolina should invest in improving the quality of CDEPP by addressing staff qualifications, implementation of formal, systematic continuous improvement initiatives with ongoing program monitoring. Program monitoring should include frequent assessments of the classroom environment, including the quality of teacher-child interactions. The evaluation team would point to the school district of Florence 1 as a model.

Recommendation 7: Based upon analysis of PASS results, specific attention to the professional development and training of CDEPP teachers in math must be enhanced.

Recommendation 8: When the results of the fall 2014 *CIRCLE* assessment can be analyzed, the data should be used to refocus on measuring the quality of instruction in 4K, 5K, 1st and 2nd grades, especially to prepare all students to be reading proficiently by 3rd grade.

Section I

Summary of Program Expansion in Fiscal Year 2013-14

Beginning in school year 2006-07, the Child Development Education Pilot Program (CDEPP) was implemented, providing a full-day prekindergarten program to at-risk four-year-olds in poverty residing in the trial and plaintiff school districts in the Abbeville equity lawsuit, Abbeville County School District et. al. vs. South Carolina. Initially, 37 school districts were eligible to participate in the program. Poverty was defined as eligible or the federal free- or reduced-price, federal lunch program and/or Medicaid. In the current school year, there remain 34 school districts from the original CDEPP districts. The decline in the number of original trial and plaintiff districts is due to the mergers of several school districts including: (1) Marion 1, 2 and 7 merged to form Marion; and (2) Dillon 1 and Dillon 2 merged to form Dillon 4. Of these 34 school districts, Barnwell 45 is the only district that is not participating in CDEPP and has never participated in the program.

In Fiscal Year 2013-14, the General Assembly expanded CDEPP to include all four-year-olds residing in school districts with a poverty index of 75 percent or greater. Provisos 1.83., 1.87., 1A.34., and 118.17 of the 2013-14 General Appropriations Act governed the expansion of CDEPP. There were 17 districts identified as having a poverty index of 75 percent or more and not already eligible to participate in CDEPP. Children residing in these districts were eligible to participate in CDEPP in either a public school or private childcare center. Table 1 reflects those school districts. Consequently, the expansion of CDEPP in 2013-14 increased from 34 to 51 the total number of school districts eligible to participate in the program. Of these 17 districts, 14 chose to participate in 2013-14. Consequently, of the 51 school districts eligible to participate in CDEPP in 2013-14, 47 actually participated in 2013-14. It is important to note that private sector CDEPP eligibility continues, regardless of a school district's participation.

Table 1
Districts Eligible to Participate in 2013-14

Original Trial & Plaintiff Districts		Expansion Districts
1	Abbeville	Anderson 3 ⁶
2	Allendale	Calhoun
3	Bamberg 1	Cherokee
4	Bamberg 2	Chester
5	Barnwell 19	Colleton
6	Barnwell 29	Darlington
7	Barnwell 45	Dorchester 4
8	Berkeley	Fairfield
9	Chesterfield	Georgetown
10	Clarendon 1	Greenwood 51
11	Clarendon 2	Lexington 2
12	Clarendon 3	Lexington 3
13	Dillon 3	Newberry
14	Dillon 4	Richland 1
15	Florence 1	Spartanburg 7
16	Florence 2	Sumter
17	Florence 3	Union
18	Florence 4	
19	Florence 5	
20	Hampton 1	
21	Hampton 2	
22	Jasper	
23	Laurens 55	
24	Laurens 56	
25	Lee	
26	Lexington 4	
27	Marion	
28	Marlboro	
29	McCormick	
30	Orangeburg 3	
31	Orangeburg 4	
32	Orangeburg 5	
33	Saluda	
34	Williamsburg	

⁶ Shaded districts opted not to participate in the program in the public schools. However, children eligible to participate in the program could enroll in private childcare centers participating in the program.

With the expansion in 2013-14, public schools through the SCDE and private centers through First Steps expended the following funds and provided the following services to children residing in these 51 school districts:

**Table 2
Full-Day 4K Appropriations and Expenditures during 2013-14**

	SCDE	OFS	Total
Appropriations	\$37,002,437	\$11,642,893	\$48,645,330
Expenditures			
Portion of Evaluation	\$195,000	\$105,000	\$300,000
Instruction (<i>\$4,218 per child</i>)	\$29,040,930	\$5,329,710	\$34,370,640
Supplies for New Classrooms	\$1,190,000	\$669,955	\$1,859,955
Transportation ⁷		\$231,145	\$231,145
Administration		\$611,500	\$611,500
Substitute Teacher Reimbursement		\$2,590	\$2,590
Advance Payments		\$688,961	\$688,961
Subtotal:	\$30,425,930	\$7,638,862	\$38,064,792
Carry Forward to FY2014-15	\$6,771,507	\$4,004,031	\$10,580,538
% of Appropriations Carried Forward	18%	34%	
Outputs:			
Full-time Equivalent Children Served ⁸	6,885	1,264	8,149
Schools/Centers Serving Children	151	93	244
Number of Classrooms	391	108	499

Appendix A details the number of full-time equivalents served in public schools (6,885), and total number of children served in private centers (1,368). Of the children served in private centers, approximately 1,264 were full-time equivalents. Full-time equivalents is a measurement of the amount of children funded at the per child maximum reimbursable rate.

In public schools, the expansion of the program resulted in 2,355 additional children served or 34 percent of the entire population. Through private center expansion, there were a total of 621 children served in 46 centers located in the expansion counties or 45

⁷ Private child care providers received \$550 per child. SCDE could have retained up to \$185 per child for transportation to and from school, but SCDE opted not to receive these funds.

⁸ Full-time equivalent children served is determined by dividing the total number of funds expended for instructional services by \$4,218, the per child maximum reimbursable rate.

percent of the entire population served in private centers. While student eligibility is determined by the student's district of residency, the data were not available to determine the individual child's residency by district for those children served in private childcare centers.

Findings:

- Ia: Of the \$48.6 million budgeted for the full-day 4K programs in 2013-14, approximately 78 percent was expended with the remainder, 22 percent or \$10.6 million carried forward into Fiscal Year 2014-15. The SCDE expended 82 percent of its appropriation and the Office of First Steps, 66 percent, which includes advance payments of 6 percent of the total budget.
- Ib: Regarding services provided, approximately 8,149 full-time students were funded with 85 percent enrolled in public schools and 15 percent in private centers.
- Ic: Children residing in 51 school districts were eligible to participate in the program with 47 school districts participating in the program through the Department of Education. Of the total number of children funded in public schools, approximately one-third or 34 percent resided in these expansion districts.
- Id: In the private centers administered by First Steps, a total of 1,368 children were served in 93 centers. Forty-six (46) percent of the centers were located in the expansion counties.

Note:

The evaluation team could not find any statutory authority allowing the expenditure of funds for "advance payments." The proviso governing the implementation of the program in Fiscal Year 2013-14, proviso 1.83. of the 2013-14 General Appropriation Act, refers only to the "reimbursement" of eligible services. To maintain fiscal accountability for the funds appropriated and expended for the program, the evaluation team recommends that the Office of First Steps cease making advance payments and only reimburse for actually services provided.

Section II Program Expansion in Fiscal Year 2014-15

The 2014-15 General Appropriation Act expanded access of full-day four-year-old education programs to children at-risk of school failure. Act 284 of 2014 codified the Child Development Education Pilot Program. The program was renamed the South Carolina Child Early Reading Development and Education Program. Provisos 1.78. and 1A.33. of the 2014-15 General Appropriation Act also expanded the program to all “eligible children residing in school districts with a poverty index of seventy percent or greater.” The following is an initial analysis of the expansion of the program in 2014-15 in both public schools and private centers.

Access to Full-Day 4K

Four-year-olds meeting the eligibility criteria of the full-day 4K program and residing in the following 60 school districts could participate in a program in either a public school or private child care center participating in the program.

**Table 3

⁹ The districts in bold were districts that met the criteria for eligibility for the first time in 2014-15.

These 60 school districts represent 74 percent of the 81 regular school districts in the state. The districts in **bold** were districts that met the criteria for eligibility for the first time in 2014-15.

Participation by School Districts: SC Department of Education

In school year 2014-15, of the 60 eligible school districts, 57 participated in the program. The school districts of Lexington 2 and Anderson 3 which had opted not to participate in Fiscal Year 2013-14 elected to participate in school year 2014-15. Of the nine new districts eligible to participate, Horry was the only district that chose not to participate. A charter school in the Horry County School District did participate in the program. Below is a statement from the Horry County School District explaining their decision not to participate in the program in school year 2014-15.

The regulations and long-term requirements made it difficult by the time the intent form was due on June 2, 2014, to ascertain whether this would be beneficial for our school system. The CDEPP licensing requirements significantly surpassed what is required for our current child development programs, and at the time the intent form was due it appeared that our curriculum and assessment components of our program would not meet the CDEPP parameters. Horry County Schools funds CD classes with other revenue streams beyond what is currently provided by the State child development funding. Utilization of these funding sources has made child development a priority for our school system for well over a decade.

Source: Dr. Cindy Elsberry, Former Superintendent of Horry County School District

SCDE reported that 57 school districts in school year 2014-15 are currently projected to serve 10,685 children. (Table 4) These numbers will change with the updated 45-day count and thereafter, with the 90 and 135-day counts. Appendix B provides the district-by-district initial allocation of funds for the full-day 4K and for the half-day 4K program.

Table 4
Projected Number of 4K Served in Full-Day Programs in Public Schools
by District Participation

District Participation	Number 4K Children	Number Classrooms	% of Total
Participated in Prior Year	8,645	441	81%
Participated for First Time in 2014-15	2,040	101	19%
TOTAL	10,685	542	

The following is the Department of Education’s projected budget for the full-day 4K program for children at-risk of school failure for Fiscal Year 2014-15. If the 45-day counts increase or decrease, then the instructional expenditures will be adjusted accordingly.

Table 5
Projected Budget for SCDE, 2014-15

Appropriations/Authorizations	Projected Budget
Carry Forward Funds	\$6,576,507
General Fund Appropriations	\$12,004,200
EIA Appropriations	\$34,324,437
Non-Recurring Appropriation	\$910,000
TOTAL	\$53,815,144
Projected Expenditures	
Evaluation Payment to EOC	\$190,000
New Classrooms (190 @ \$10,000)	\$1,900,000
Instruction (10,685 @ \$4,218)	\$45,069,330
TOTAL	\$47,159,330
Difference:	\$6,655,814

Regarding curriculum, the SCDE reports that of the 542 classrooms in 222 schools providing full-day 4K programs in 2014-15, all schools but one reported on the primary curriculum being used. In these classrooms, the following curriculum was used alone or as the primary curriculum along with another curriculum. The percentages denote the percentage of classrooms where the following curriculum was the only or primary curriculum being used.

Table 6
Public School CDEPP Curriculum

Curriculum	Percentage of Classrooms
Creative Curriculum	58%
Opening a World of Learning (OWL)	17%
High Scope	15%
Montessori	10%

Participation by Private Providers: Office of First Steps

According to First Steps approximately 144 private providers are serving 1,780 to 1,790 students in four-year-old kindergarten. The Office of First Steps estimates that 1,790 students are currently being served. However, unique student identifiers have been provided for 1,780 students. The EOC asked for clarification of the final student count. As of the publication of the report, First Steps has not provided further clarification. Appendix C provides more detailed information, including names of childcare providers and estimated number of students enrolled by provider and by county.

Table 7
Projected Number of 4K Served in Full-Day Programs in Private Childcare Settings

District Participation	Number of 4K Children	% of Total
Participated in Prior Year	1,368	77%
Participated for First Time in 2014-15	412	23%
TOTAL	1,780	

The Office of First Steps was also asked to submit its projected budget for the provision of full-day 4K programs in private centers in Fiscal Year 2014-15. Table 8 below shows First Steps anticipates expending \$11.6 million for the program in private centers. First Steps provided to the EOC a budget of \$17.2 million.

Table 8
Projected Budget for OFS, 2014-15

Appropriations/Authorizations	
Carry Forward Funds	
General Fund Appropriations	\$6,510,000
EIA Appropriations	\$10,200,893
Non-Recurring Appropriation	\$490,000
TOTAL	\$17,200,893
Projected Expenditures	
Portion of Evaluation to EOC	\$105,000
New Classrooms (100 @ \$10,000)	\$1,000,000
Instruction (2,000 @ \$4,218)	\$8,434,000
Transportation	\$200,000
Monitoring/Technical Assistance	\$1,070,720
Professional Development	\$757,000
TOTAL	\$11,566,720
Difference	\$5,634,173

Upon consulting with the Executive Budget Office, the EOC learned that the prior year FY2013-14 carry forward funds of \$4,004,031 were transferred by the Office of First Steps into a separate restricted account pursuant to Section 63-11-1715 of the South Carolina Code of Laws. These funds are not currently being used to provide 4K services, and therefore, are not reflected in the budget for the program. The Office of First Steps must seek authorization to expend the funds, or the General Assembly could redirect these funds, which are General Funds for alternative uses.

Findings

- IIa: SCDE projects that 10,685 children will be served in the full-day 4K program in 57 school districts in school year 2014-15.
- IIb: There are an estimated 542 classrooms funded in 2014-15 with 190 being new classrooms.
- IIc: Three school districts eligible to participate in 2014-15 opted not to participate: Barnwell 45, Horry and Union.
- IId: First Steps estimates 144 private child care providers are serving 1,780 to 1,790 children in 34 counties in full-day 4K in school year 2014-15.
- IIe: While Barnwell 45, Horry and Union school districts decided not to participate in 2014-15, 18 private providers in Barnwell, Horry and Union counties are participating in CDEPP and serving 253 children.
- IIg: To date, 1,780 children with unique student identifiers are enrolled in the full-day 4K program in school year 2014-15 in 144 centers in 31 counties.
- IIh: In addition to the \$4.0 million carried forward in the prior fiscal year, First Steps currently projects an additional balance of \$5.6 million in the program in 2014-15.

Recommendation:

The Office of First Steps carried forward \$4.0 million in FY2013-14 and is projected to carry forward an additional \$5.0 million in the current fiscal year. No additional funds should be appropriated to the Office of First Steps for the program, even with the addition of four districts that will be eligible to participate in FY2015-16. Instead, the General Assembly should reduce the full-day 4K appropriation to the Office of First Steps by at least \$2.0 million and reallocate those funds to the South Carolina Department of Education. Public schools are serving 86 percent of the four-year-olds in the program but received 73 percent of the total funds appropriated for the program in FY2014-15.

Section III Projections of At-Risk Children Served

One objective of the full-day 4K program is to increase the number of four-year-olds in poverty who are served with a quality full-day, pre-kindergarten program that meets specific criteria for quality such as minimum adult:child ratios, evidence-based curriculum and qualified teachers. Students eligible to participate may enroll in an approved public school program or in an approved private childcare setting. This section projects the number of four-year-olds and the number of four-year-olds projected to be eligible for the federal free- or reduced-price lunch program and/or Medicaid in each district using current eligibility requirements and the 2010 United States Census data. It also estimates the percentage of at-risk four-year-olds in each district that are served by a publicly funded early childhood education program. The district of residency for children attending the program in private childcare centers is not known; therefore, included in the statewide percentage is the number of children served in a private childcare center.

Methodology

Appendix D documents the number of four-year-olds projected to be residing in each school district in the state and the number of four-year-olds currently being served in a publicly funded education program that includes the state-funded full-day 4K in public schools, Head Start and the ABC Voucher Program. The projected number of four-year-olds served in private child care centers is included in the state percentage. The First Step reported to the EOC on October 31, 2014 the unique student identifiers of 1,780 children attending private child care centers that receive state funds to participate in the program. While the student must live in the eligible school district, the approved private center attended by the child may be located in any district. Therefore, not having data on the child's district of residence, the analysis included the children only in the state aggregate.

2010 Census data provided information on the number of children in each district by gender and age. The estimated numbers of four-year-olds are children who were less than one years of age in 2010 and would therefore have been four years old in 2014-15.

The poverty index is the percentage of children in each district that were in school year 2013-14 eligible for the federal free or reduced-price lunch program and/or Medicaid.

Multiplying the poverty index by the number of four-year-olds yields the projected number of at-risk four-year-olds in each district.

The South Carolina Office of Head Start Collaboration provided student information based on May 1, 2014 Census data. This data reflect the number of students served in Head Start in each county. The January 2014 report on CDEPP documented 6,364 four-year-olds served in Head Start in 2013. Appendix D in this report documents 5,975 four-year-olds served in Head Start in 2014, an annual decline of six percent.

The Department of Social Services provided the number of all four-year-olds served by the ABC Voucher Program between August 18, 2014 and November 2, 2014.

In counties that have more than one school district, county-level data were disaggregated based on the percentage of at-risk four-year-olds in each district.

Not reflected in the numbers are children served in public schools in half-day or full-day programs funded with Education Improvement Act (EIA) funds, federal funds, or local funds.

Findings

Appendix D and Table 9 show the following results for Fiscal Year 2014-15:

- IIIa: There are an estimated 58,999 four-year-olds in South Carolina. Approximately, 71 percent of these children are in poverty.
- IIIb: Statewide, an estimated 46 percent of all at-risk four-year-olds are served in a publicly funded early education program as compared to 35 percent in the prior year.
- IIIc: In school districts in which children were eligible to participate in the state-funded, full-day 4K program for more than one year, at least 71 percent of all at-risk four-year-olds are currently being served in a publicly funded program, up from 62 percent in the prior school year. In the ten districts eligible for the first time in 2014-15, at least 54 percent of all at-risk four-year-olds are served in a publicly funded program (Table 9.)
- IIId: Table 9 also documents that there are approximately 20,218 children in the districts that were not eligible to participate in 2014-15 who are in poverty and at-risk for school failure. Fourteen percent (14%) of these children are currently being served.
- IIIe: The number of four-year-olds participating in Head Start declined from 6,364 in 2013 to 5,975 in 2014.

Table 9
Number of At-Risk Four-Year-Olds by District Eligibility and % Served in State-Funded, Full-Day 4K, Head Start or ABC Voucher Programs

	Number Districts	Total Number of At-Risk Four-Year-Olds	Number of At-Risk Four-year-Olds Served	% of At-Risk Served
Eligible for more than one year	47	17,020	12,100	71%
Eligible for First Time in 2014-15	10	4,925	2,678	54%
Not Eligible	24	20,218	2,813	14%
TOTAL	81	42,163	17,590	

The data also show four school districts – Anderson 2, Anderson 5, Greenwood 52 and Kershaw – had a poverty index of 70 percent or more in the prior school year and are eligible to offer the full-day 4K program in the subsequent fiscal year. Analyzing the number of at-risk four-year-olds currently served in Head Start, there are approximately 1,233 at-risk four-year-olds residing in these four districts who are not in a full-day publicly funded program. Assuming that 70 percent of the children in these districts would participate in the program at \$4,218 per child for instructional costs and \$10,000 for 45 classrooms, the cost of expanding to these eligible districts is approximately \$4.1 million.¹⁰

¹⁰ If 70 percent (or 863 children) participate at the rate for \$4,218 per child and \$10,000 per classroom setup, instructional costs would be \$3,640,134 and one-time funds for 43 classrooms would be \$430,000. Total expenditures are estimated at \$4,070,134.

Section IV

PASS Performance of Children Served in CDEPP

Beginning in 2010 the EOC documented the academic achievement of students who participated in the Child Development Education Pilot Program (CDEPP). The initial analysis of students in five-year-old kindergarten demonstrated modest benefits for students who participated in the program. Later analyses using state assessments on the Palmetto Assessment of State Standards (PASS) indicated that students who participated in the program achieved at levels slightly higher than students from similar socio-economic backgrounds who did not participate in the program but attended a public school in a CDEPP district.

Students from four CDEPP cohorts were assessed with PASS in 2014. The following is a report on the academic achievement of these students compared to:

1. All other students in South Carolina;
2. Students who qualified for the free or reduced-price federal lunch program and lived in a CDEPP district, but did not participate in CDEPP as a four-year-old; and
3. Students who qualified for the free or reduced-price Federal lunch program, lived in a non-CDEPP district, and did not participate in the program as a four-year-old.

The objective of the analysis is to determine over time if a greater percentage of students who participated in the program met or exceeded state standards in English language arts and mathematics, especially in grade 3, especially compared to the other students who did not participate in the program.

Cohort Descriptions

Since the program's inception, four cohorts of students have progressed through at least third grade. (Table 4) The first cohort of students participated in the CDEPP program in the 2006-07 academic year and completed sixth grade in 2013-14, and the fourth cohort participated in CDEPP in the 2009-10 academic year and completed third grade in 2013-14.

Table 10
Grade Level for Students in Each Cohort

Academic Year	Cohort 1	Cohort 2	Cohort 3	Cohort 4
2006-07	4K (CDEPP)			
2007-08	5K	4K (CDEPP)		
2008-09	Grade 1	5K	4K (CDEPP)	
2009-10	Grade 2	Grade 1	5K	4K (CDEPP)
2010-11	Grade 3	Grade 2	Grade 1	5K
2011-12	Grade 4	Grade 3	Grade 2	Grade 1
2012-13	Grade 5	Grade 4	Grade 3	Grade 2
2013-14	Grade 6	Grade 5	Grade 4	Grade 3

From data files provided by the Office of First Steps to School Readiness and the South Carolina Department of Education, the EOC was able to use the unique student identifier, a number assigned by the Department to all students enrolled in public schools and in private centers participating in CDEPP, to match PASS assessment scores in English/language arts (ELA) as measured by the Reading and Research test and mathematics to each student in grades 3 and beyond. The analysis compared PASS data for students who progressed from grade 3, to grade 4, to grade 5 and to grade 6. Constraining the data to students who made one year of progress each year enables the clearest comparison of PASS achievement levels across years. Table 11 documents the number of students identified in each cohort and in each comparison group that have a PASS ELA and mathematics score in each academic year.

Table 11
Number in Each Cohort and Comparison Group

Academic Year	Grade	All SC Students		CDEPP Students		Low-Income Students in CDEPP Districts		Low-Income Students in non-CDEPP Districts	
		ELA	Math	ELA	Math	ELA	Math	ELA	Math
COHORT 1 (4K in 2006-07)									
2010-11	3	51,263	51,323	2,038	2,039	4,331	4,339	24,261	24,293
2011-12	4	48,959	48,963	1,793	1,793	4,116	4,116	23,800	23,803

2013-14	3	54,694	54,801	2,699	2,699	4,884	4,891	26,547	26,595

Table 12 then analyzes the PASS performance of the above students in each grade in ELA and mathematics. The data document the percentage of students meeting or exceeding state standards, which is scoring Met or Exemplary on PASS. The results show that across all academic years and cohorts, a greater percentage of CDEPP students met or exceeded state standards in ELA than in mathematics. Furthermore, across all academic years and cohorts, a greater percentage of CDEPP students met or exceeded state standards in ELA and mathematics than did low-income students in CDEPP districts who did not participate in the program.

**Table 12
Percent of Students Scoring Met or Exemplary
in Each Cohort and Comparison Group**

2013-14	3	79	72	73	60	66	57	72	63

Grade 3 Trends Across Cohorts.

Using the data obtained from Table 12 for each cohort in grade 3, the percentage of students who scored Met or Exemplary in ELA is presented in Figure 1. The percentage of students scoring Met or Exemplary increases modestly from 2011 to 2013, and then declines slightly in 2014. For all cohorts, the percentage of CDEPP students who scored Met or Exemplary is nearly identical to the percentage for subsidized students in non-CDEPP districts. The pattern of achievement of all SC students parallels the achievement of CDEPP students, but these students exhibit higher achievement levels overall. The pattern of achievement level for subsidized meal students in CDEPP districts nearly parallels all other groups, although it is consistently lower. There does not appear to be any substantial narrowing of the gap between the achievement levels of CDEPP students and all SC students.

Figure 1
Percent of Grade 3 Students Met or Exemplary on PASS ELA
by Student Group

A similar result is obtained when considering the pattern of achievement across cohorts for mathematics (Figure 2.) The group consisting of all SC students has the highest achievement levels, followed by subsidized meal students in non-CDEPP districts, CDEPP students, and subsidized meal students in CDEPP districts. There does not appear to be any overall trend of increasing or decreasing achievement, rather, the percentage of students Met or Exemplary for all groups increased from 2011 to 2012, declined in 2013, and rose again in 2014. Again, there does not seem to be any marked decrease in the difference in achievement between CDEPP students and all SC students. The gap appears to have widened in 2014 compared to 2013, but caution should be exercised not to over-interpret what may well prove to be a one-year event.

Figure 2
Percent of Grade 3 Students Met or Exemplary on PASS Mathematics by Student Group

Figure 3 presents the achievement gap between grade 3 cohorts over time for both ELA and mathematics. The achievement gap is the difference between the percentages of student who scored Met or Exemplary on PASS for all South Carolina students and CDEPP students. That the gaps are positive numbers indicates that all South Carolina students score higher than CDEPP students. For ELA, there is no clear trend of a decreasing achievement gap; the gap appeared to decrease from 2011 through 2013, but increased to 2014. For mathematics, there is evidence that the achievement gap is increasing, as it has increased by 2.3 percent from 2012 to 2014. The amount of this increase is not large, and additional data should be examined to determine whether this trend will persist.

Figure 3
Achievement Gap between All South Carolina Students and CDEPP Students

Additional Analysis of Cohorts 1 and 2

Additional analyses were conducted on Cohort 1 and 2 as these cohorts have PASS scores for three and four years, respectively. This analysis focused on answering the following questions:

1. Is there any difference in the characteristics of the comparison groups?
2. Are differences among the achievement results statistically significant?

Table 13 documents the demographics of Cohorts 1 and 2. Similar patterns appear in the demographics for both cohorts. A slightly larger percentage of CDEPP students are female, and for all other groups a slightly larger percentage of students are male. The percentage of students who receive subsidized meals is much larger for CDEPP students (85 and 89 percent) than for all South Carolina students (59 percent); only subsidized meal students were selected for the remaining two groups. For both cohorts 1 and 2, African-American students make up a much larger percentage of CDEPP students, followed by the subsidized meals students in CDEPP districts, subsidized meal students in non-CDEPP districts, and all SC students. The percentage of Hispanic students is slightly higher in non-CDEPP districts, and is the lowest among CDEPP students, although the observed differences are relatively small. The pattern of the percentage of white students in each group is the opposite of the pattern of African-American students. The smallest percentage is among CDEPP students, and the largest percentage is among all SC students.

Based on this information, subsidized meal students in CDEPP districts appear to be most comparable to CDEPP students. Subsidized meal students in non-CDEPP districts are less similar to CDEPP students. These group differences, especially in terms of race/ethnicity and the percentage of students receiving subsidized meals are large enough to justify the use of caution when interpreting results of the comparisons performed.

Table 13
Percent of Students in Each Demographic by Student Group

Demographic	CDEPP	CDEPP District Subsidized	Non-CDEPP District Subsidized	All SC Students
Cohort 1				
Gender				
Female	52	48	49	49
Male	48	52	51	51
Meal Status				
Full Pay	11	0	0	41
Subsidized	89	100	100	59
Race/Ethnicity				
African-American	69	57	46	35
Hispanic	4	7	11	7
White	25	32	38	53
Other	2	4	5	5
Cohort 2				
Gender				
Female	51	48	49	49
Male	49	52	51	51
Meal Status				
Full Pay	15	0	0	41
Subsidized	85	100	100	59
Race/Ethnicity				
African-American	60	58	45	34
Hispanic	6	7	13	8
White	31	30	38	54
Other	4	4	5	5

The final analysis was to verify that the observed differences and similarities in achievement for these groups are as claimed. Repeated measure analyses of variance (ANOVA) were performed with scores from the PASS ELA and mathematics as the outcomes of interest. This analysis was performed using only three of the four groups: CDEPP students, subsidized meal students in CDEPP districts, and subsidized meal students in non-CDEPP districts. These are the only groups for which students are in either one group or another. All of the students in these three groups are a part of the all SC students group, and it is not appropriate to compare groups when the same

students are in more than one group. The data are repeated measures because each student had PASS scores for each year.

The achievement trends of Cohort 1 for ELA and mathematics are presented in Figure 4. Two features are most outstanding when examining the patterns of achievement for ELA and Mathematics. First, there is no overall pattern of increasing achievement over time. Second, the achievement of CDEPP students is consistently higher than the achievement of students in CDEPP districts who qualify for subsidized meals, the group that is most comparable to CDEPP students. The highest achievement for both subjects is for all South Carolina students, the group that is comprised of the smallest percentage of students who receive subsidized meals.

Figure 4
Cohort 1 PASS Achievement from 2011 to 2014

Results of the repeated measures analyses for Cohort 1 are presented in Table 14, which confirm that for both ELA and mathematics, the differences among CDEPP groups are large enough to declare that at least one group differs from the other two. Post-hoc analyses confirm that across all years, the achievement of CDEPP students is similar to the achievement of subsidized meal students in non-CDEPP districts, and that the achievement of both of these groups is higher than the achievement of subsidized meal students in CDEPP districts who did not participate in CDEPP.

Table 14
Cohort 1 Repeated Measures ANOVA

Source	df	F	p-value
ELA			
CDEPP Group	2	24.12	<.0001*
Test Year	3	1379.43	<.0001*
Group * Year	6	0.61	0.7244
Mathematics			
CDEPP Group	2	35.77	<.0001*
Test Year	3	834.32	<.0001*
Group * Year	6	18.46	<.0001*

* Statistically significant.

Similar analyses were performed for students in Cohort 2. Repeated measures analyses were again performed using three of the four groups. The trends of achievement of Cohort 2 for ELA and mathematics are presented in Figure 5. The same conclusions regarding the achievement of the respective groups can be reached as were observed in Cohort 1. There is no overall pattern of increasing achievement over time, and the achievement of CDEPP students is consistently higher than the achievement of students in CDEPP districts who qualify for subsidized meals but did not participate in CDEPP.

Figure 5
Cohort 2 PASS Achievement from 2012 to 2014

Results of the repeated measures analyses for Cohort 2 are presented in Table 15, which confirm that for both ELA and mathematics, the differences among CDEPP groups are large enough to declare that at least one group differs from the other two. Again, post-hoc analyses confirm that across all years, the achievement of CDEPP students is similar to the achievement of subsidized meal students in non-CDEPP districts, and that the achievement of both of these groups is higher than the

achievement of subsidized meal students in CDEPP districts who did not participate in CDEPP.

**Table 15
Cohort 2 Repeated Measures ANOVA**

Source	df	F	p-value
ELA			
CDEPP Group	2	40.73	<.0001*
Test Year	3	805.44	<.0001*
Group * Year	6	3.02	0.7244
Mathematics			
CDEPP Group	2	35.77	<.0001*
Test Year	3	59.20	<.0001*
Group * Year	6	880.97	<.0001*

* Statistically significant.

Recall that subsidized meal students in CDEPP districts are students who live in the same location as CDEPP students and are of similar socio-economic status; these students are presumed to be similar to CDEPP students with respect to their preparation for education. With caution, the observed differences between the means for CDEPP students and subsidized meal students in CDEPP districts may be interpreted as the long-term effect of participation in the CDEPP program.

Findings

- IVa: The PASS achievement results in ELA and mathematics document that across all academic years and cohorts, a greater percentage of CDEPP students met or exceeded state standards in ELA than in mathematics.
- IVb: Furthermore, across all academic years and cohorts, a greater percentage of CDEPP students met or exceeded state standards in ELA and mathematics than did low-income students in CDEPP districts who did not participate in the program.
- IVc: In looking at just grade 3 achievement in ELA and mathematics for CDEPP students, there is concern that the achievement gap between CDEPP students and all other students in South Carolina is not narrowing, and in mathematics the achievement gap may be increasing. The achievement gap is the difference between the percentages of student who scored Met or Exemplary on PASS for all South Carolina students and CDEPP students.

Recommendation:

Based upon analysis of PASS results, specific attention to the professional development and training of CDEPP teachers in math must be enhanced.

Section V

Implementation of *CIRCLE* Assessment

In 2014 the General Assembly passed the Read to Succeed Act to ensure students are reading on grade level by the end of third grade. For students to be successful in third grade, the state's educational system must be committed to students' early success. Young children's early literacy ability must be identified prior to first grade, with subsequent instruction and support strategically implemented to develop further their strengths and intervene with evidence-based approaches to address their needs. The Read to Succeed Act requires language and literacy assessment for four- and five-year-old students participating in publicly-funded pre-kindergarten and kindergarten programs.

Through a competitive procurement process, the State of South Carolina awarded Amplify, Inc. a one-year contract to implement the *CIRCLE* assessment.

The State of South Carolina continues to consider a statewide readiness assessment, and in particular, the assessment of children's language and literacy skills. EOC staff determined a comprehensive, detailed evaluation of the use of *CIRCLE* in the state is relevant to the overall evaluation of CDEPP and informative and instructive as statewide readiness assessment is under development. The following information has been provided by the University of South Carolina *CIRCLE* evaluation team, led by Dr. Bill Brown.

Evaluation Plan

The quality of experiences and learning during the early childhood years can promote success in kindergarten and beyond. South Carolina has invested in publicly funded prekindergarten to provide young children with high-quality education prior to kindergarten entry. To better understand children's needs and more effectively plan curriculum and instruction, South Carolina requires the use of a literacy assessment, the *CIRCLE* assessment (*Center for Improving the Readiness of Children for Learning and Education*, 2014), of all children entering publicly funded prekindergarten and kindergarten classrooms. Results from this assessment indicate the developmental levels of children entering prekindergarten classrooms to allow teachers to develop, modify, and adapt learning materials, settings, and opportunities for children. In addition, the results can inform needs in particular areas that can be addressed by organizations and communities prior to prekindergarten or kindergarten entry.

The University of South Carolina (USC) evaluation team seeks to understand the implementation and use of the *CIRCLE* assessment in classrooms and its potential to effectively support the needs of young children.

Evaluation Goals

- Understand methods of training and implementation related to the *CIRCLE* assessment in selected school districts in South Carolina.
- Gauge understanding and use of the *CIRCLE* assessment results in curriculum planning and instruction in selected school districts in South Carolina.
- When *CIRCLE* assessment data are available to Education Oversight Committee (EOC) and USC evaluation team, review nature of the data at child, classroom, school or program, and district level. Results of literacy readiness assessment among prekindergarten and kindergarten children will be used to identify trends, issues in administration, and usefulness in understanding the assessment's strengths and areas for improvement.

Evaluation Methods

The evaluation is based on a case study approach to understand Year 1 implementation of the *CIRCLE* assessment. A case study design was selected to allow “in-depth exploration of a bounded system (e.g., an activity, event, process, or individuals) based on extensive data collection” (Creswell, 2005, p. 439). A collective, instrumental case study design is an appropriate and effective research method when examining the implementation and effect of an issue, policy, or system. The USC evaluation team will use this framework in seeking to understand the use of the *CIRCLE* assessment in early education settings in South Carolina (Creswell, 2005).

For the *CIRCLE* assessment case study, the USC evaluation team will collect data from stakeholders related to the *CIRCLE* assessment implementation and its use in prekindergarten (i.e., school districts and private centers) and kindergarten classrooms (i.e., school districts). The USC evaluation team and EOC personnel worked together on the identification of South Carolina programs for collaboration and inclusion in this evaluation based on geographic location, size of district, and experience with the *CIRCLE* assessment and other early childhood assessment systems. Six school districts agreed to participate in this evaluation. Table 16 highlights the participating districts and the number of applicable schools within each district. Kindergarten classes are commonplace in South Carolina public schools; therefore, the number of schools in the evaluation sample with prekindergarten classes is noted.

Table 16
Participating Districts and Number of Schools

District	Total Number of Elementary Schools	Schools with Prekindergarten Classrooms
Anderson 4	4	4
Cherokee	11	11
Florence 1	16	7
Greenville	55	35
Horry	27	24
Lexington 4	1	1

In collaboration with South Carolina First Steps to School Readiness (hereafter called First Steps) a sample of private prekindergarten classrooms will be included in this evaluation.

The EOC contacted six superintendents of the above mentioned school districts. The USC evaluation team emailed letters to the superintendents of each school district in December 2014. Follow-up phone calls were made to each superintendent to explain the study, the planned methods, and identify the central point of contact for each district. The EOC and USC evaluation team staff met with First Steps to explain the process and discuss selection of publicly funded prekindergarten classrooms that are located in private centers. The evaluation includes three phases.

Phase 1 (Fall 2014)

Phase 1 has included systematic review of the *CIRCLE* assessment and current psychometric evidence for its use with pre-kindergarteners and kindergarteners. Phase 1 also included initial development of a survey on the fall implementation of the *CIRCLE* assessment in public and private programs. In addition, training procedures were observed and trainings documented with information from SCDE and First Steps.

Phase 2 (Winter 2014-2015)

Phase 2 will occur during the Winter of 2015 and includes investigating stakeholders' perceptions with electronic surveys and interviews of personnel within partnering districts, schools, and private prekindergarten centers. During Phase 2, in each of the six case study districts, two schools will be identified in collaboration with the early childhood coordinator or district designee for inclusion in this evaluation. Stakeholders including early childhood coordinators, principals, and prekindergarten and kindergarten teachers at the collaborating district schools will be asked to complete an online survey about their experiences implementing the *CIRCLE* assessment in Fall 2014. Similarly, First Steps regional coordinators, along with their director and private center directors and teachers will also be asked to complete the online survey. The survey consists of approximately 25 items and seeks to gain information related to five factors: 1) training and preparation related to the *CIRCLE* assessment implementation, 2) implementation of the *CIRCLE* assessment, 3) usefulness of the *CIRCLE* assessment results, 4) parent

feedback related to the *CIRCLE* assessment, and 5) use of the *CIRCLE* assessment and other standardized assessments beyond the fall entry period. The survey was developed by the USC evaluation team.

The survey will be distributed and analyzed in the Winter 2015. General themes related to the five factors will be explored and reported to the EOC. Survey results also will be used to inform subsequent face-to-face interviews with district and private center personnel in the Winter 2015. Finally, the survey and its results will be used as a pilot test in the development of a state-wide survey for future use with personnel in publicly funded prekindergarten and kindergartens.

On-site, individual, face-to-face interviews will occur in February 2015. Interviews will be conducted with the early childhood coordinators within each district and First Steps director and regional coordinators. In addition, interviews will be conducted with principals of two schools in each of the six districts. Two teachers at each school of the partnering locations will be interviewed. Several directors of private programs and teachers from their programs will also be interviewed. Survey results will be incorporated into the final semi-structured interview protocol. The purpose of the interviews is to gain more detailed information about the *CIRCLE* assessment implementation, as well as its usefulness in influencing classroom planning and instruction.

Phase 3 (Spring 2015)

During Phase 3 in Spring 2015, the evaluators will collaborate with the EOC on methods to understand and interpret the findings from Phase 1 and 2 and enhance understanding of implementation and effect of *CIRCLE* assessment. This will include an analysis of *CIRCLE* assessment data, as available from Amplify, Inc. and the SCDE (SCDE). In addition, a statewide survey may be used to gain feedback from a larger population of school administrators, kindergarten teachers, and prekindergarten teachers in public and private settings. Phases 1, 2, and 3 results and recommendations will be elaborated in a future EOC report in June 2015.

Phase 1 *CIRCLE* Assessment Description

Legislative Information

During the 2014-15 legislative session, the South Carolina Legislature passed a proviso that requires programs receiving state funding to administer a prekindergarten and kindergarten readiness assessment within the first 45 days of the 2014-15 school year. Specifically, Proviso 1A.76 of the 2014-15 General Appropriation Act (ratified on June 5, 2014) states:

(SCDE-EIA: Prekindergarten and Kindergarten Assessments): For the current fiscal year, all students entering a publicly funded prekindergarten or public kindergarten must be administered a readiness

assessment that shall focus on early language and literacy development no later than the forty fifth day of the school year. The readiness assessment must be approved by the State Board of Education. The approved readiness assessment must be aligned with kindergarten and first grade standards for English/language arts and mathematics. The results of the assessment and the developmental intervention strategies recommended or services needed to address the child's identified needs must be provided, in writing, to the parent or guardian. The readiness assessment may not be used to deny a student admission or to progress to kindergarten or first grade.

Following passage of the proviso, the South Carolina State Department of Education (SCDE) initiated a required procurement process with a Request for Applications to interested vendors of early childhood readiness assessments. Following review of assessments and supporting documents by a panel selected by the SCDE, the *CIRCLE* assessment was selected for use in the fall of 2014.

Background Information

The *CIRCLE* assessment was developed by Drs. Susan Landry, Michael Assel, Jeffrey Williams, Tricia Zucker, Paul Swank, Susan Gunnewig, and April Crawford who are researchers at the Children's Learning Institute at the University of Texas Health Science Center at Houston. Members of the USC evaluation team were provided a technical manual from the authors via the SCDE. It should be noted that the technical manual has a somewhat different name from the *CIRCLE* assessment. Specifically, the electronic support material is entitled *C-PALS + STEM (The CIRCLE Phonological Awareness Language and Literacy System + Science, Technology, Engineering & Math Technical Manual*; Landry et al., 2014). The *CIRCLE* assessment, which is administered via paper and pencil, and *mCLASS CIRCLE* Assessment, which is a comparable electronic version, are commercially available through Amplify, Inc.

This fiscal year, the SCDE has a 1-year contract with Amplify, Inc. to provide the *CIRCLE* and *mCLASS CIRCLE* assessments to school districts for their 4-year-old prekindergarten and 5-year-old kindergarten programs, as well as the state-funded 4-year-old pre-kindergarteners served in private settings administered and supported by the First Steps. Once the individual child data are uploaded to Amplify, Inc., they are available to the child's teacher and other personnel who have local administrative access. Assessment data are also sent to Amplify, Inc. and were returned to the SCDE in mid-December. The SCDE shared the data set with the EOC and the USC evaluation team. The SCDE will perform quality control checks and anticipates providing the EOC with the "cleaned" dataset in February of 2015.

Description of *CIRCLE* Assessment Content Areas

The *CIRCLE* assessment consists of two assessment manuals. The authors and vendors have delineated several broad dimensions or content areas that include: 1) Language and Literacy Assessments; 2) “STEM Assessments” (Mathematics and Science, Technology, & Engineering); and 3) Additional Assessments (Approaches to Learning, Physical Development and Health, Social and Emotional Skills items, and Social Studies). Review of the assessment dimensions suggested that the Language and Literacy and the Mathematics content areas are best developed. This is likely due to the fact these two content areas have been under development for longer periods of time.

Because South Carolina legislation mandated a language and literacy assessment be given to 4- and 5-year-old children in publicly funded pre-kindergartens and kindergartens this year, the following delineation of language and literacy assessment content was gleaned from the *CIRCLE* Assessment Manuals. Users of the *CIRCLE* assessment employ two methods of soliciting information from children. One method is direct test in which the teacher provides a stimulus such as a picture of a ball, presentation of a letter, says a short sentence, or asks a question. A second method is a teacher rating of child performance through recall or direct observation of the child’s behavior.

In the Language and Literacy Assessments dimensions, the following content areas are covered:

1. Book & Print Concepts (11 teacher questions related to books and print in the books);
2. Early Writing (10 teacher ratings);
3. Letter Naming (multiple letters presented to be named by the child and timed for 1 minute);
4. Letter-Sound Correspondence (12 questions related to letters and their corresponding sounds);
5. Phonological Awareness with 7 subskills, which yield a single composite score, including
 - a. Listening (5 words with the child answering if they are the same or not),
 - b. Rhyming-Part 1 (9 word pairs that the child identifies as rhyming or not),
 - c. Rhyming-Part 2 (5 words presented by the teacher for which the child provides a rhyming word),
 - d. Alliteration (7 word pairs with the teacher asking if the words begin with the same sound),
 - e. Words in a Sentence (5 sentences with the child counting the number of words),
 - f. Syllabication (7 words with the child counting the number of syllables per word), and
 - g. Onset-Rime (5 words with the child indicating first sound);

6. Story Retell & Comprehension Score Sheet with 6 areas including
 - a. Retells Story with an Introduction,
 - b. Accurately or Logically Sequences Events,
 - c. Retells Story with a Logical Summary or Conclusion,
 - d. Comprehends Main Idea,
 - e. Comprehends Story Sequence, and
 - f. Comprehends and Recalls Story Details;
7. Vocabulary Naming (sequence of pictures to be named by the child and timed for 1 minute).

In addition to the Language and Literacy assessment, the SCDE requested teachers in school districts and private programs to rate 31 items included in the Social and Emotional dimension of the *CIRCLE* assessment, which was developed in 2013:

1. Positive Social Behaviors (9 teacher ratings),
2. Classroom Community & Safety (6 teacher ratings),
3. Emotion and Behavior Regulation (8 teacher ratings),
4. Self-care (2 teacher ratings), and
5. Approaches to Learning (6 teacher ratings).

Review of *CIRCLE* Reliability and Validity Evidence

Reliability and validity are essential elements to show that a test is psychometrically sound. These are related, but separate, constructs that support the use of test scores for decision making. In this section, we review the reliability and validity information for the Language and Literacy subtests provided in the *C-PALS + STEM (The CIRCLE Phonological Awareness Language and Literacy System + Science, Technology, Engineering & Math Technical Manual* (Landry et al., 2014). To aid in the review, Amplify, Inc. personnel provided the technical manual for USC evaluation team, as well as responses to clarification questions regarding the technical information.

The sample used to provide psychometric information was collected from several studies conducted by researchers from the Children's Learning Institute between 2003 and 2006. As noted in the technical manual, the data came from multiple sources including the Interagency Education Research Initiative (IERI) study of professional development, and the Texas Early Education Model (TEEM). Data were also included from research studies conducted in preschools and child care centers in low-income areas in Texas, Maryland, Ohio, and Florida. Children included in the psychometric investigations were largely between the ages of 3 years, 6 months to 5 years, 6 months.

Two datasets were created: a cross-sectional dataset of 37,731 children and a short-term longitudinal dataset measuring children at different points in time

(beginning/middle/end) of an academic year. The numbers of children involved at each time point were 16,272 beginning of year, 10,744 middle of year, and 10,712 at the end of the year. However, it was unclear which children and the number who were assessed at more than one time point. Most children included were 4-years old at the time of assessment and most data were collected during the 2004-05 school year. A breakdown of the information by state was not provided, nor was the number of students where longitudinal data was actually included at multiple time points. The sample sizes are more than adequate to provide reliability and validity estimates for the *CIRCLE* assessment.

Reliability or Consistency of Assessment Performance

Reliability indices provide information about the consistency of the obtained results. In the current testing situation, we are concerned with consistency of young children's test scores. Reliability estimates may be examined across different forms of a test (i.e., parallel form reliability), different administrations across time points (i.e., test-retest reliability), and one administration of a given test (i.e., internal consistency). Reliability estimates range from 0.0 to 1.0, where higher values show greater consistency. While recommended values vary based on the testing purpose, values should be high, typically around .70 or higher (Crocker & Algina, 1986).

The *CIRCLE* assessment manual provided evidence of two forms of reliability for the Language and Literacy subtests: internal consistency and test-retest reliability. Internal consistency was measured using Cronbach's alpha estimates; test-retest was measured using the intra-class correlation (ICC) and test-retest correlation was measured using Pearson Product Moment correlation. Measures of reliability by age (3-, 4-, and 5-year olds) and all ages together were obtained. Table 2 provides a summary of the reliability information.

As shown in Table 17, reliability estimates are appropriate for all subscales in the Language and Literacy subtests. For all estimates, reliability minimum values were observed across all subtests for 3-year olds; highest values were observed for the estimates across all age groups. As expected, the lowest estimates were observed over the longest time period (i.e., fall to spring of an academic year).

Table 17
Summary of *CIRCLE* Reliability Estimates

	Phonological Awareness	Vocabulary	Letters
Cronbach's Alpha* Min/Max	.91/.93		
ICC Min/Max	.53/.66	.55/.67	.71/.74
Test- Retest			
Fall-Winter Min/Max	.56/.68	.60/.68	.76/.80
Winter-Spring Min/Max	.57/.75	.61/.68	.77/.83
Fall-Spring Min/Max	.50/.58	.47/.59	.62/.66

* = Cronbach's alpha is not appropriate for timed tests.

Internal consistency reliability was provided for the Social and Emotional Skills. Only one form was examined, Cronbach's alpha, which was .96; no other forms of reliability or separations of estimates by age were noted.

Validity or Extent to Which an Assessment Measures What is Intended

Three types of validity information were provided with the *CIRCLE* assessment: 1) concurrent validity, 2) convergent validity, and 3) a test of the internal structure of the instrument. In the validity section of the technical manual, the Language and Literacy subtest scores were correlated to scores from previously established, standardized tests, including the Expressive One Word Picture Vocabulary Test (EOWPVT), the Preschool Comprehensive Test of Phonological Processing and Print Awareness (PreCTOPPP) Print awareness subscale, and the Developing Skills Checklist (DSC). Correlations were presented by age and for both spring and fall time points. However, with the exception of one set of correlations (*CIRCLE* assessment scores and selected CTOPPP scales, n=154 children), it was unclear how many children were used in the analyses for the majority of the tests. When interpreting correlation values, the values should be positive (showing alignment between test scores) and of high magnitude (illustrating a strong relationship).

First, correlations were presented among *CIRCLE* assessment Language and Literacy subtests for the fall and the spring test administrations across all ages. Values were positive and moderate at each time point (ranging from .42 to .58), showing that the skills measured by the subtests are related.

Concurrent validity estimates were provided with correlations between the three *C-PALS + STEM* Language and Literacy subtests and the three standardized tests noted above Expressive One Word Picture Vocabulary Test (EOWPVT), the Preschool Comprehensive Test of Phonological Processing and Print Awareness (PreCTOPPP) Print awareness subscale, and the Developing Skills Checklist (DSC).

Correlations were presented by age groups (by total group and by 3-, 4-, and 5-year olds) for fall and spring administrations. Overall, correlations were positive, and moderately correlated (ranging from .28 to .80) with existing tests and, in expected manners, where selected *CIRCLE* assessment subtests showed higher correlations than with other tests. Values were similar at both time points and slightly lower for 3-year olds than for other age groups.

In addition, Developing Skills Checklist (DSC) total scores and five DSC subscales were correlated with the seven *CIRCLE* assessment Phonological Awareness subscales and total score. Again, values were broken down by time point and by age groups. Overall, values were largely positive with low correlations exhibited (ranging from .10 to .35). A few of the correlations were lower than .10 across all age groups. Values were highest when total scores were correlated.

Lastly, confirmatory factor analysis (CFA) was conducted to provide evidence of the Phonological Awareness subscales. The model was conducted at the item-level using the appropriate estimator for dichotomous data. A bifactor model was proposed, illustrating a general Phonological Awareness factor in addition to the seven subscales. The overall model fit well according to ad-hoc fit indices; however, item level parameters were not presented.

Validity information was provided for the Social and Emotional Skills-Checklist. The manual provided evidence of convergent validity with two established measures: the Social Competence and Behavioral Evaluation-Preschool Edition and the Children's Behavior Questionnaire. Subscale scores from the Social and Emotional Skills-Checklist were correlated with subscales that measured similar constructs. Correlation estimates were in expected directions and were moderately correlated with similar scales. Considering the Social Competence and Behavioral Evaluation scale, values ranged from .25 to .61. Values were at similar levels between the Social and Emotional Skills Checklist and the Children's Behavioral Questionnaire (values ranging from .29 to .65). Overall, the information provides evidence that the Social and Emotional Skills-Checklist provides similar information about children's social and emotional competency.

Scoring

Scoring procedures were provided for the *CIRCLE* assessment Language and Literacy subtests. The technical manual provided information concerning the scoring procedures and cutoff scores for proficiency at each level. Scores for the *CIRCLE* assessment are created by summing item level information. The cutoff scores described what scoring level is to be used to denote proficiency. While this information was presented, discussion about the use of summing observed data or the provided cutoff values was not included.

Assessment and Training Information

To date, Amplify, Inc. has provided estimated numbers of pre-kindergarteners and kindergarteners assessed in the first 45 days of the school year including more than 83,000 prekindergarten and kindergarten age children in South Carolina, with more than 95% of the eligible children assessed. In addition, children from 85 school districts and 150 private centers were assessed.

Amplify, Inc. and SCDE used a trainer-to-train model to prepare teachers for administering the *CIRCLE* assessment. Specifically, Amplify, Inc. personnel provided on-site regional trainings to district and school assessment coordinators and their designees. These trained individuals then provided training to district and school level personnel. SCDE reported training 759 individuals on the *CIRCLE* assessment *mCLASS* electronic platform in a face-to-face format, 14 individuals on *CIRCLE* assessment paper and pencil format, and 29 individuals on *CIRCLE* assessment in a webinar format. Similarly, First Steps to School Readiness trained 350 individuals on the *CIRCLE* assessment *mCLASS* electronic platform. In addition, the SCDE developed and provided a *Readiness Assessment Program Fall 2014 Test Administration Manual*.

Findings

The psychometric information provided in the *CIRCLE* Assessment Technical Manual provides supportive, yet limited, psychometric information related to both the Language and Literacy and Social and Emotional Skills scores. Strengths noted from the technical manual are reiterated; additional areas needing more information are provided below.

- Va: Reliability information is generally high for the Language and Literacy and Social & Emotional Skills-Checklist scales, showing internal consistency of *CIRCLE* assessment scores within a single administration of the test.
- Vb: For Language and Literacy subscales, reliability estimates were generally high across time points, showing consistency of scores over time.
- Vc: Validity information showed alignment of *CIRCLE* assessment scores with existing standardized measures used to measure preschoolers' language and literacy skills and social and emotional skills. Correlation values were in expected directions and at a moderate level, showing concordance of information across tests.
- Vd: Validity information for Language & Literacy subtests was slightly lower for 3-year old children; however, these children are the youngest of the tested age groups.
- Ve: Confirmatory Factor Analysis provided support for the internal structure of the PA scales.
- Vf: Limited information was presented to describe the sample used for analyses. The sample is not a norming or probabilistic sample, but a sample of largely low-income preschool aged children. The sampling procedure collected information from multiple states; however, no information was provided to show how many children were from a given state.
- Vg: Only one form of reliability was provided for the Social and Emotional Skills-Checklist. Information concerning the sample size used, other forms of reliability, or reliability estimates by age were not provided.
- Vh: Correlation tables are provided without reference to the number of preschoolers used in the analyses.
- Vi: No information regarding item level information (e.g., item difficulty, discrimination/adjusted point biserial correlations) is provided to show how individual items are performing.
- Vj: The technical manual did not present any information concerning a review of items for potential differential item functioning across groups of preschoolers

(e.g., sex, race/ethnicity) to ensure that items function without bias across different groups.

- Vk: The scoring for the manual stated that *CIRCLE* assessment scores were provide using sum scores. Error is inherent in sum scores created using item level data. Similarly, latent (or other) scores could be presented at each cutoff value to support that the cutoff values relate to discrimination.
- VI: There was no discussion of how the internal structure of the Phonological Awareness scale related to the scoring of the test.
- Vm: Confirmatory Factor Analysis information should also include standardized item parameters. The sample (over 10,000 children) could be split in half to validate analyses.

Section VI Measures of Quality

The long-term effects of high-quality preschool education are well-documented. Lasting improvements in school success include higher achievement test scores, lower rates of grade repetition and special education designation, and higher educational attainment.¹¹ The importance of high-quality pre-kindergarten education for children, especially those with state-identified risk factors such as low family income, is widely accepted by educators and policymakers alike. On average, children from low-income families start kindergarten 12 to 14 months behind their peers in pre-literacy and language skills.¹²

To achieve these gains for our youngest and most at-risk children, intervention programs must be high-quality. In December 2014, the U.S. Department of Education (USDE) awarded more than \$93 million in preschool expansion grants to seven states that were not participants in the Race to the Top federal education program.¹³ The USDE emphasized the importance of applicants showing evidence of quality, defined as:¹⁴

...an early learning program that includes structural elements that are evidence-based and nationally recognized as important for ensuring program quality, including at a minimum-

- (a) High staff qualifications, including a teacher with a bachelor's degree in early childhood education or a bachelor's degree in any field with a State-approved alternate pathway, which may include coursework, clinical practice, and evidence of knowledge of content and pedagogy relating to early childhood, and teaching assistance with appropriate credentials;
- (b) High-quality professional development for all staff;
- (c) A child-to-instructional staff ratio of no more than 10 to 1;
- (d) A class size of no more than 20 with, at a minimum, one teacher with high staff qualifications...
- (e) A full-day program;
- (f) Inclusion of children with disabilities to ensure access to and full participation in all opportunities;

Phillips, eds. Board on Children, Youth and Families, Commission on Behavioral and Social Sciences and Education. Washington, DC: National Academy Press.

¹³ South Carolina applied for a preschool development expansion grant but was not awarded.

¹⁴ U.S. Department of Education and U.S. Department of Health and Human Services (2014). *2014 Preschool Development Grants Executive Summary*. Retrieved January 5, 2015 from <http://www2.ed.gov/programs/preschooldevelopmentgrants/executivesummary-419b.pdf>

- (g) Developmentally appropriate, culturally and linguistically responsive instruction and evidence-based curricula, and learning environments that are aligned with the State Early Learning and Development Standards, for at least the year prior to kindergarten entry;
- (h) Individualized accommodations and supports so that all children can access and participate fully in learning activities;
- (i) Instructional staff salaries that are comparable to the salaries of local K-12 instructional staff;
- (j) Program evaluation to ensure continuous improvement;
- (k) On-site or accessible Comprehensive Services for children and community partnerships that promote families' access to services that support their children's learning and development; and
- (l) Evidence-based health and safety standards.

Reinforcing the USDE's definition of high-quality preschool, the National Institute for Early Education Research (NIEER) publishes an annual State Preschool Yearbook. The Yearbook includes report cards for each state and rates them on multiple attributes, including access, quality standards and resources. NIEER's ten primary quality standards are similar to USDE requirements:

- Comprehensive early learning standards
- Teacher degree (BA for public school and AA for nonpublic school)
- Specialized teacher training
- Assistant teacher degree (high school diploma with early childhood development credential within 12 months of hire)
- Teacher in service (15 clock hours annually)
- Maximum class size of 20 or fewer
- Staff-child ratio of 1:10
- Screening/referral and support services
- Meals (at least one meal daily) and
- Site visits for program monitoring.

In 2013, NIEER determined South Carolina's CDEPP met seven of the ten requirements. CDEPP did not meet quality standards in teacher and assistant teacher degrees and site visit monitoring.¹⁵ "High quality" is not defined in South Carolina law. The South Carolina General Assembly supports the implementation of high-quality preschool programs, as evidenced by Act 287 (First Steps' Reauthorization Act), which frequently references "high quality programs."¹⁶

¹⁵ Barnett, W.S., Carolan, M.E., Squires, J.H., Brown, K.C., (2013) *The State of Preschool 2013*. Rutgers: National Institute for Early Education Research. Retrieved January 5, 2015 at <http://nieer.org/sites/nieer/files/yearbook2013.pdf>.

¹⁶ For specific references, see Section 63-11-1725(D)(1), Section 63-11-1725(D)(7), and Section 59-152-10.

Most recently *Education Week's Quality Counts 2015* published a new indicator called the Early Education Index. South Carolina earned a D+. Summarizing the status of early education across the nation, *Quality Counts* stated “one of the reasons for this lackluster showing is that early childhood education is an elaborate patchwork of laws, institutions and programs spanning the public and private sectors and varying dramatically across states.”¹⁷

Quality of Public School Provision of CDEPP

While individual schools and school districts may collect data on the quality of instruction in public full-day 4K programs, no such data exist at the state level.¹⁸

The evaluation team chose to use the 2014 state report card ratings as a surrogate indicator of quality. If state report card ratings reflect the overall student learning environment of schools, then the ratings would be an indication of the quality of instruction at schools with at least one classroom funded under the Child Early Reading Development and Education Program in 2014-15. The state report cards issued annually rate primary schools on such factors as prime instructional time; pupil-teacher ratios; parental involvement; external accreditation; percentage of teachers with advanced degrees and percentage of teachers returning from the prior year. The state report cards evaluate elementary schools based on student achievement on the Palmetto Assessment of State Standards (PASS) in English language arts, mathematics, science and social studies for students in grades 3 through 8.¹⁹

Of the 225 schools that have at least one full-day 4K classroom in school year 2014-15, 215 schools received an absolute rating on its 2014 state report card. Table 18 compares the absolute ratings of these schools to all primary and elementary schools in the state receiving an absolute state rating in 2014.

Table 18
Comparison of Absolute Ratings,
Schools Offering Full-Day, 4K and All Primary and Elementary Schools in SC

Absolute Ratings	Number of Schools Offering Full-Day 4K (% of total)	% All Primary and Elementary and Primary Schools in SC in 2014
Excellent	43 (20%)	249 (36%)
Good	30 (14%)	128 (19%)
Average	104 (48%)	238 (35%)
Below Average	26 (12%)	55 (8%)
At Risk	12 (6%)	17 (2%)

¹⁷ *Quality Counts 2015.* “States Graded on Indicators for Early Years. *Education Week*. Volume 34, Number 16, January 8, 2015.

¹⁸ There are multiple evidence-based classroom assessment tools for early childhood settings, including CLASS and other curricula-based assessments such as those used for OWL, Montessori and Creative Curriculum.

¹⁹ *2013-14 Accountability Manual* published by the Education Oversight Committee.

TOTAL	215	687
--------------	------------	------------

The data reflect that one-third of the schools offering a full-day 4K classroom in 2014-15 are schools that received an absolute rating of Excellent or Good in 2014. Approximately half of the schools received an absolute rating of Average in 2014. And, 18 percent or almost one in five schools received an absolute rating of Below Average or At Risk.

Table 18 also documents that, compared to all schools in the state, a lower percentage of schools offering full-day 4K programs under the Child Development and Early Reading Program received an absolute rating of Average or better in 2014. Considering that the program is only state-funded in districts with a poverty index of 70 percent or higher, the lower absolute ratings reflect the state trend. Districts with a lower poverty index tend to have higher absolute ratings, though there are several exceptions.

Quality of Private Provision of CDEPP

Due to lack of data about the quality of CDEPP in private settings, the evaluation team chose data related to DSS' ABC Quality program as a surrogate indicator of quality. Private child care providers who educate children participating in CDEPP are regulated and licensed by the Department of Social Services (DSS). In an effort to improve childcare quality for all children, DSS has led the development of the ABC Quality program, South Carolina's voluntary quality rating and improvement system for child care providers. Nationwide, more than 25 states have similar programs.²⁰ ABC Quality²¹:

- provides technical assistance, training, and scholarships to the child care workforce.
- conducts regular on-site reviews to measure performance on the program standards for each level of quality.
- observes classrooms, materials, activities, and caregiver interactions with children to determine the level of quality.
- reviews findings and recommendations with child care providers to help them improve.
- creates scholarship opportunities for child care providers to attend state conferences that are focused on providing quality child care.
- offers grants to providers and other supports to help them improve their quality of care.

Child care providers who opt to participate in ABC Quality are evaluated by DSS staff and may be awarded one of five levels of quality:

²⁰ Retrieved January 6, 2015 from https://www.acf.hhs.gov/sites/default/files/opre/qrs_compendium_final.pdf

²¹ Retrieved January 6, 2015 from <http://scchildcare.org/departments/abc-quality.aspx>.

- Level A+: These programs are measured against the best national quality standards. A+ programs meet the highest quality child care standards in the state and have the highest scores on [Environment Rating Scales \(ERS\)](#) assessments and receive the highest SC voucher payment rate and quality incentives.
- Level A: These programs are measured against the best national quality standards and meet the highest quality standards on ERS assessments. Level A programs receive a higher voucher payment rate and quality incentives.
- Level B+: These programs are measured against state quality standards far beyond basic health and safety regulations. B+ programs have the highest scores on the ABC standards and receive a higher voucher payment rate and quality incentive.
- Level B: These programs are measured against state quality standards beyond basic health and safety regulations. B programs meet ABC standards and receive increased SC voucher payment rates and some quality incentives.
- Level C: These are licensed programs, or programs legally exempt from licensing requirements, that meet basic health and safety regulations and standards. C programs receive the basic voucher payment rate and may qualify for grants to improve their facility.

During the 2014-15 school year, DSS records indicated 153 private providers participate in CDEPP.²² Almost 93 percent of providers volunteered to participate in the ABC Quality program. More than one-quarter (27.5%) participate at the minimum C level or do not participate at all. Appendix D indicates ABC Quality levels for all providers and information about deficiencies in the past three years.

Table 19
CDEPP Providers Participating in ABC Quality

ABC Quality Level	Number	Percent of Total CDEPP Providers
A+	6	3.9%
A	2	1.3%
B+	24	15.7%
B	79	51.6%
C	32	21%
Do not participate	10	6.5%
Total	153	

Source: DSS

Professional Development and Technical Assistance

²² First Steps indicates 144 providers currently participate in CDEPP during 2014-15 school year.

The EOC asked both SCDE and OFS to provide information on the professional development and technical assistance provided to providers during 2013-14 and the first half of 2014-15. Their self-reported responses are provided below.

South Carolina Department of Education

During the 2013-14 school year, SCDE staff reported providing support to 14 school districts that had never before participated in the program and 119 new classrooms. SCDE staff collaborated with DSS Child Care Licensing staff in the state office to provide orientation training beginning in July. The SCDE CDEPP Coordinator followed up with on-site visits and professional development during the summer and fall months to support district personnel in selecting school sites that met the facility requirements, completing DSS child care licensing process, selecting curricula and ordering equipment and materials from the Department’s approved list.

In November 2013, SCDE hired a second Education Associate to provide an additional staff person to support and monitor CDEPP programs. All 119 new CDEPP classrooms in 55 schools in the 14 districts had at least one monitoring visit. During the monitoring visits, an assessment with the *Literacy Environment Checklist* was completed. This assessment tool was adapted from the ELLCO (Early Literacy and Language Classroom Observation tool, 2002 edition). Following each assessment, immediate feedback and recommendations for quality improvements were provided to teachers and their administrators.

Professional development sessions were offered during 2013-14 to all CDEPP Districts and were provided both regionally and locally on the following topics: language and early literacy; evidence-based curricula; child assessments; fostering social-emotional development; CDEPP best practices that meet the needs of children of poverty; and best practices for emergent readers and writers. The professional development was provided by SCDE Literacy Specialists, SCDE CDEPP staff, and two consultants with expertise in implementing an early literacy research project. All professional development sessions were pre-approved by the Center for Child Care Career Development to support teachers and administrators in meeting the annual DSS requirements for training. Participants in attendance at each session ranged from 20-75 with 458 participants in attendance throughout the year. Table 20 below summarizes the number of educators who added professional development and training hours provided.

Table 20
SCDE Professional Development CDEPP Data for 2013-14

	# of PD Sessions	# of Training Hours Provided	# Attending from CDEPP Districts
Sessions for Teachers	18	74	341
Sessions for Administrators	3	10	117
TOTAL:	21	84	458

Source: SCDE

Two statewide early childhood conferences were also conducted by professional organizations during the year for providers to obtain professional development required by the program guidelines as it relates specifically to educating children in poverty. SCDE used federal Title I funds of \$81,455 in Title I funds to coordinate the conferences and pay for 212 CDEPP educators to attend. The funds paid for the registration fees and mileage reimbursement for the 212 educators to attend the early childhood conferences in January of 2014. Annual professional development plans were also collected by districts which submitted plans in 2013-14 and reviewed by the CDEPP staff.

During the first half of the 2014-15 school year, SCDE staff supported ten school districts who were participating in the program for the first time and 101 new classrooms. In Fiscal Year 2014-15, the full-day 4K staff include: two Education Associates, a Program Coordinator, and two part-time early childhood consultants. Again, SCDE staff partnered with DSS Child Care Licensing staff to provide orientation training beginning in July. The SCDE staff followed up with on-site visits and professional development during the summer and fall months to support district personnel as they selected school sites meeting the facility requirements, completed the DSS Child Care Licensing process, selected curricula, and ordered equipment and materials from the SCDE approved list.

As of December 31, 2014, SCDE staff report conducting site monitoring visits to 62 classrooms in districts participating for the first time and 12 visits to new classrooms in districts that had been participating in the program since its inception in 2006. SCDE reports that its goal is to visit new classrooms this year. As in the prior year, during each of the monitoring visits an assessment with the *Literacy Environment Checklist* has been completed. Following each assessment, immediate technical assistance feedback and recommendations for quality improvements were provided to teachers and their administrators.

Table 21 below indicates the number of CDEPP educators attending the professional development offered by SCDE's Office of Reading and Early Learning during the first half of the school year, from July 2014 to December 2014. Professional development sessions offered were on the following topics: language and early literacy; evidence-based curricula; child assessments; fostering social-emotional development, best practices that meet the needs of children of poverty; and best practices for emergent readers and writers. The professional development was provided by SCDE Literacy Specialists, SCDE staff, and two consultants with expertise in implementing an early literacy research project. All professional development sessions were pre-approved by the Center for Child Care Career Development to support teachers and administrators in meeting the annual DSS requirements for training. In addition, SCDE plans to leverage Title I funds again for approximately 200 4K educators to attend the early childhood conference in January 2015.

Table 21
SCDE Professional Development CDEPP Data for 2014-15 School Year

	Number of PD Sessions	Number of Training Hours Provided	# Attending from CDEPP Districts
PD Sessions for Teachers	14	51	609
PD Sessions for Administrators	4	10	205
TOTAL:	18	61	814

Source: SCDE

The number of educators attending each session ranged from 18-100 with a total of 814 participants in attendance at 18 sessions.

First Steps

To ensure the accountable use of the state’s private sector preschool investment, the First Steps 4K program is designed to provide continuous support and technical assistance, to include the announced and unannounced monitoring of each First Steps 4K site approximately twice monthly. First Steps employs a cadre of seven, regionally-based 4K Coordinators, each charged with providing on-site monitoring and support. This contact is supplemented by ongoing communication via e-mail, telephone and text messaging with teachers and directors. Regional staff is responsible for:

- Monitoring student enrollment and attendance records,
- Reviewing (and providing input into) weekly lesson planning,
- Consulting classrooms and monitoring best practices ,
- Ensuring the use of standards-based curriculum activities, and
- Providing technical assistance related to assessment and progress monitoring.

As site-based instructional leaders, center directors are also included in all aspects of First Steps’ professional development and monitoring.

Both the 2013-14 and 2014-15 school years entailed rapid, large-scale expansion of First Steps 4K provider network, concurrent with legislative expansion of the 4K program. 2013 marked the addition of 55 new 4K sites, bringing First Steps’ provider total to 97. The network increased by an additional 48 sites in August 2014 – bringing the current operating total to 145 centers with 165 classrooms.

Table 22
First Steps 4K Monitoring Visits²³

Year	Number of Visits
2013-2014	1,746
2014-2015 (projected)	2,970

Prospective providers complete a written application process, which is followed by an on-site program review prior to approval. Approved centers become participants in the program only when they enroll one or more eligible children. An assessment of classroom needs is completed as part of the application process to ensure that classroom supply funds are maximized, with First Steps staff supporting each site with classroom setup and room arrangement.

Tuition and transportation payments are issued at two week intervals, supported by on-site verification by First Steps staff. This approach ensures that payments are issued solely for services rendered.

In addition to on-site technical assistance and monitoring, SC First Steps provides direct professional development supports for its network of directors, teachers and assistants.

During August of 2013, all new and returning classroom staff participated in a three-day 4K Institute, with directors attending a one-day overview of the 4K program and its requirements. First Steps staff developed full day workshops for 4K instructional staff that entailed delivery of certified training related to:

- The Creative Curriculum 5th Edition,
- The First Steps 4K Program and its Requirements,
- Use of the Ages and Stages Questionnaire (ASQ) developmental screening, and
- Lesson Planning.

Each of First Steps Regional Coordinators is a degreed early childhood specialist and is a certified trainer with the SC Center for Child Care Career Development (CCCC&D). All trainings were registered and certified through the CCCC&D to support 4K teachers, assistants, and directors in meeting annual DSS training hours.

During 2014-2015, First Steps redoubled its emphasis on professional development and parental engagement, with particular emphases on early literacy and social-emotional development – each linked by evidence to long-term school success. In August of 2014, First Steps expanded its summer professional development academy, providing 308 teachers and directors a total of 37.5 hours each of high-quality professional development.

First Steps 2014 Early Literacy Development and Education Academy offered training in:

- The Creative Curriculum, 5th edition (for new classroom staff),
- The Conscious Discipline social emotional development framework,

²³ First Steps calculates that monitoring visits occurred twice monthly for each classroom for nine months.

- Building Vocabulary with Children of Poverty,
- Early Literacy Development,
- Integrating Early Literacy into Outdoor Play,
- Preschool Transition,
- Shared Reading and Writing,
- Standards-Based Assessment,
- Teaching Children of Poverty,
- Building Literacy Using Technology, and
- Accommodating Children with Special Needs.

Table 23
2014-15 First Steps 4K Professional Development Training as of November 2014

Professional Development Activity	Number Participated	Number of Hours
August 2014 Summer Academies	168 teachers 140 directors	5 days of 7.5 hours each or 37.5 hours
September 19, 2014 Initial <i>CIRCLE</i> training	350 teachers, directors, co-directors	2 hours each
October 20, 2014 Regional Professional Development	213 teachers and assistants	5 hours
November 10, 2014 Regional Professional Development	161 teachers	5 hours
Total	1032	49.5 hours

Summary

Provision of professional development and technical assistance at the state level is uneven. As Table 24 indicates, SCDE provides professional support with three staff dedicated to professional support for 542 classrooms with 10,685 students. First Steps' CDEPP team includes seven professionals supporting 144 centers with 1,780 students.²⁴ It is important to note this analysis does not account for significant professional development efforts some local school districts undertake. There is also a lack of administrative and organizational infrastructure among local child care providers, which requires a more intensive level of technical assistance and support.

²⁴ Data provided by First Steps indicates 144 centers are currently providing CDEPP (see Appendix C). Data provided by DSS indicates 153 centers are currently licensed and providing CDEPP (see Appendix E).

Table 24
Characteristics of Professional Development Provided

	SCDE	First Steps
Number of professionals providing professional development and technical assistance	3	7
Number of classrooms or centers	542	144
Number of students	10,685	1,780
Ratio of support staff to classroom	181	21

Both SCDE and First Steps are primarily responsible for providing training and technical assistance for CDEPP program participants in public and private settings and have prioritized providing support for development of early language and literacy skills. There is some evidence of coordination with other state level entities (DSS, CCC&D) that are responsible for early childhood training and technical assistance. However, no data or evidence was provided regarding the development of credentialed early childhood educators at the lead teacher and assistant teacher levels.

In addition to state efforts to provide professional development and technical assistance, local school districts, such as Florence School District 1, have initiated separate professional development activities for their early childhood educators.

Each year, early childhood teachers are required to fulfill 15 hours of professional development. Florence 1 provides 40 hours of professional development to early childhood educators annually. In conjunction with area child care centers, monthly trainings are provided in the evenings on childcare topics. This year, there is a curriculum specific in-service (OWL and Montessori) with a focus on language. These in-service opportunities are repeated as needed for teachers in the afternoons and evenings.

Additional training is provided during in-service days, and teachers determine the topics. Florence 1 also pays conference fees for teachers. Teachers' completion of hours are also tracked by the district. There are two staff dedicated to providing technical assistance. One staff is a certified Montessori teacher who observes each class once monthly with a checklist specific to Montessori and gives teachers feedback. The other staff member is a certified early childhood teacher who observes each OWL classroom once a month using the checklist provided by SCDE.

Source: Dr. Floyd Creech, Florence School District 1

Findings

- VIa: In order to improve CDEPP program quality, a higher level of collaboration and coordination of current training and technical assistance resources is needed at the state level to ensure CDEPP providers have high-quality learning environments so they can provide high-quality instruction. More integrated training and technical assistance would allow for additional leveraging of scarce resources.
- VIb: More than one-quarter of CDEPP private providers participated in ABC Quality at the C level or did not participate in ABC Quality at all. C level centers meet, but do not exceed, basic health and safety regulations and standards.
- VIc: The data reflect that one-third of the schools offering a full-day 4K classroom in 2014-15 are schools that received an absolute rating of Excellent or Good in 2014. Approximately half of the schools received an absolute rating of Average in 2014. And, 18 percent or almost one in five schools received an absolute rating of Below Average or At Risk.
- VI d: Based upon current national definitions of “high quality” preschool programs, CDEPP has met some, but not all, high quality standards (including high staff qualifications and ongoing program monitoring).
- VIe: Provision of professional development and technical assistance at the state level is uneven. SCDE provides professional support with three staff dedicated to professional support for 542 classrooms with 10,685 students. First Steps’ CDEPP team includes seven professionals supporting 144 centers with 1,780 students.²⁵

Recommendation

Advancements in quality and improvements in young students’ readiness should be incentivized, utilizing assessment data (i.e. individual student growth, classroom environment, teacher child interaction.) At a minimum any private provider participating in state-funded full-day 4K should be required to participate in ABC Quality.

²⁵ Data provided by First Steps indicates 144 centers are currently providing CDEPP (see Appendix C). Data provided by DSS indicates 153 centers are currently licensed and providing CDEPP (see Appendix E).

Notes on District Mergers: Dillon 1 and 2 merged to form Dillon 4. Marion Districts 1, 2 and 7 merged to form Marion. And, Sumter School Districts 2 and 17 merged to form Sumter.

Color: Districts in red participated in the program in the prior fiscal year.

Districts in blue participated for the first time in 2014-15. Anderson 3 and Lexington 2 were eligible to participate in 2013-14 but did not participate until this year. Union opted not to participate in 2013-14 or in 2014-15. Horry was eligible to participate for the first time in 2014-15 but opted not to participate. The 20 children recorded for Horry attended a charter school in Horry.

Sources of Data: The 2010 Census Summary File 1, Sex by Age - Universe: Total Population. These are the students who were less than one years of age based on the 2010 census data. In 2014-15, the children would be 4-year-olds.

Poverty Index provided by SC Department of Education. Data Based on Precode for School Year 2013-14 and Medicaid eligibility Files provided by Office of Research & Statistics. Medicaid eligibility is defined as any students who was eligible for Medicaid at any time from September 2010 to June 2013.

Head Start - South Carolina Head Start Census, May 1, 2014 as provided by the SC Head Start Collaboration Office.

ABC Child Care Program of all four-year-olds served by ABC Voucher System for the period 08/18/2014 to 11/02/2014 provided by the Department of Social Services.

First Step provided a data file to the EOC on October 31, 2014 that reported unique student identifiers for 1,790 four-year-olds attending full-day 4K.

The caregiver did not have central registry results on file. The facility was also cited for being out of ratio and improper supervision due to having the unauthorized caregiver. The facility was cited for not properly tracking the movement of the children. Also, there were bags of trash on the playground that were not stored in a proper container. They were also cited because the specialist did not have access to the staff files. 7/30/14, Child Care Licensing was notified by First Steps (LaDrica Christian) that a child had been injured and received professional medical attention at the facility the previous week. The facility was cited for failure to notify DSS within the allowed time frame. Upon receipt of the injury report, it was noted that the caregiver present during the incident was the same unauthorized caregiver from the 7/11/14 citation. The facility was cited again for unauthorized caregiver. <ul style="list-style-type: none"> All deficiencies have been verified as corrected.

Myrtle Beach, SC 29582 Email: littlebcdc@gmail.com	Horry	8	22487	B	http://www.scchildcare.org/details.aspx?facility=21546 Corrective Action Plan 7/17/14, the facility was cited for being out of ratio in the 1-2 year old room. There was only one caregiver present with 9 children ages 1-2. Two caregivers were needed. The facility was cited for improper supervision due to being out of ratio. Also cited that day was tracking, one staff member needing a current Health Assessment form, the baseboard in one of the classrooms was cracked and splintered, and there were small Styrofoam balls (choking hazard) on the floor in the infant room that had leaked out of a bean bag. 9/30/14, the facility was cited for 3 classrooms being out of ratio. Upon arrival, two of the nap rooms (2-3 year olds, and 2-4 year olds) had no caregivers present. Both rooms were cited for being out of ratio. The infant-1 year old class was also cited for being out of ratio. There was only one caregiver present with 6 children (infant – 1). Two caregivers were needed. The facility was cited for improper supervision. They were also cited again for tracking. There was a small infant found sleeping in a crib on a bobby pillow (suffocation hazard).
