Kindergarten Readiness Assessment (KRA) Introduction

Section 59-152-33 of the South Carolina Code of Laws requires the adoption and administration of a school readiness assessment by the State Board of Education. The results may not be used to deny a student admission or progress to kindergarten or first grade but instead should demonstrate progress toward improving school readiness. As stated in the Code of Laws:

(A) Before July 1, 2015, the South Carolina Education Oversight Committee shall recommend an assessment to evaluate and measure the school readiness of students prior to their entrance into a prekindergarten or kindergarten program per the goals pursuant to Section 59-152-30 to the State Board of Education. Prior to submitting the recommendation to the State Board, the Education Oversight Committee shall seek input from the South Carolina First Steps to School Readiness Board of Trustees and other early childhood advocates. In making the recommendation, the South Carolina Education Oversight Committee shall consider assessments that are research-based, reliable, and appropriate for measuring readiness. The assessment chosen must evaluate each child's early language and literacy development, numeracy skills, physical well-being, social and emotional development, and approaches to learning. The assessment of academic readiness must be aligned with first and second grade standards for English language arts and Mathematics. The purpose of the assessment is to provide teachers, administrators, and parents or guardians with information to address the readiness needs of each student, especially by identifying language, cognitive, social, emotional, and health needs, and providing appropriate instruction and support for each child. The results of the screenings and the developmental intervention strategies recommended to address the child's identified needs must be provided, in writing, to the parent or guardian. Reading instructional strategies and developmental activities for children whose oral language and emergent literacy skills are assessed to be below the national standards must be aligned with the district's reading proficiency plan for addressing the readiness needs of each student. The school readiness assessment adopted by the State Board of Education may not be used to deny a student admission or progress to kindergarten or first grade. Every student entering the public schools for the first time in prekindergarten and kindergarten must be administered a readiness screening by the forty-fifth day of the school year.

(B) The results of individual students in a school readiness assessment may not be publicly reported.

(C) Following adoption of a school readiness assessment, the State Board of Education shall adopt a system for reporting population-level results that provides baseline data for measuring overall change and improvement in the skills and knowledge of students over time. The Department of Education shall house and monitor the system.

(D) The South Carolina First Steps to School Readiness Board of Trustees shall support the implementation of the school readiness assessment and must provide professional development to support the readiness assessment for teachers and parents of programs supported with First Steps funds. The board shall utilize the annual aggregate literacy and other readiness assessment information in establishing standards and practices to support all early childhood providers served by First Steps. (*Section 59-152-33*)

Proviso 1A.59 of the 2018-19 General Appropriation Act directs the South Carolina Department of Education to expend up to \$2.0 million in Education Improvement Act (EIA) funds to administer

the Kindergarten Readiness Assessment (KRA) to “each child entering kindergarten in the public schools. The assessment of kindergarten students must be administered at a minimum of once during the first forty-five days of the school year with the results collected by the department.”

About the KRA

The KRA provides information on children’s preparedness for kindergarten. It is administered by a teacher; the teacher interacts directly with the child for the selected-response and the performance task items. It is designed to give reports for an individual child, as well as cohorts of children, such that achievement may be examined at the classroom, school, and district levels, as well as according to child demographics.

The KRA measures four domains:

- Language and Literacy: skills such as reading, writing, speaking, and listening.
- Mathematics: skills such as counting, comparison, and sorting.
- Physical Well-Being & Motor Development: abilities such as dexterity, muscular coordination, and balance.
- Social Foundations: demonstration of following rules, asking for help, task persistence, and other skills necessary to the functioning within the kindergarten classroom.

KRA items for both the Language and Literacy and Mathematics domains include selected response and performance task types, wherein the child responds to assessment stimuli (e.g., pointing to a picture or naming letters). A third item type, observational rubric, is based upon teacher ratings of the child. Both the Physical Well-Being & Motor Development, and the Social Foundations domains are rated solely with the observational rubric.

Information from the four KRA domains contributes to a total score designating overall performance level.

For all scales, the KRA scores can be classified as one of three categories:

- Demonstrating Readiness: Student *demonstrates* foundational skills and behaviors that prepare him or her for instruction based on kindergarten standards.
- Approaching Readiness: Student *demonstrates some* foundational skills and behaviors that prepare him or her for instruction based on kindergarten standards.
- Emerging Readiness: Student *demonstrates limited* foundational skills and behaviors that prepare him or her for instruction based on kindergarten standards.¹

¹ KRA Technical Report Addendum, 2015

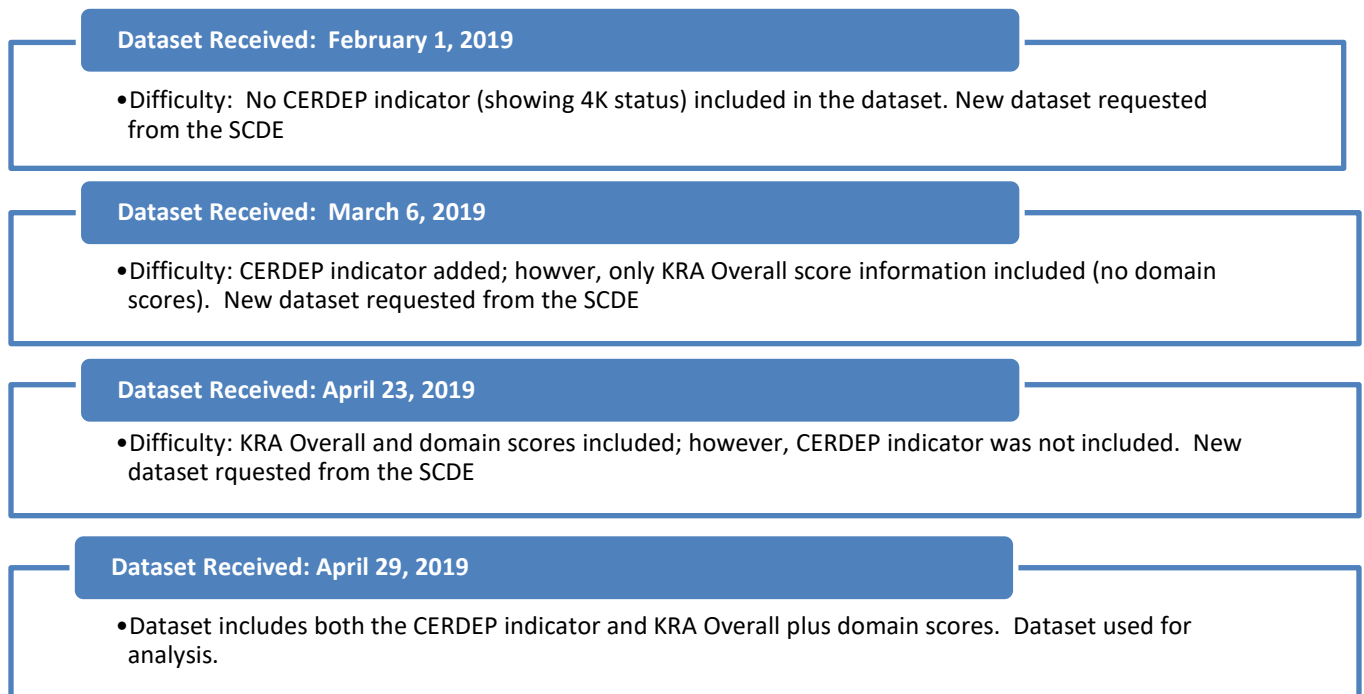

Data for KRA Fall 2018 Report

Data for the Fall 2018 KRA report was obtained from the South Carolina Department of Education (SCDE). The data was submitted to the EOC Evaluation team as a Statistical Analysis System (SAS) dataset through a secure (password protected) website. All analyses were conducted using SAS so no manipulation of the SCDE dataset was needed.

The EOC evaluation team requested multiple datasets from the SCDE, as initial datasets requested did not include critical information needed to conduct the KRA 2018 analyses. A timeline of the data and the shortcomings of the datasets are noted below in Figure 1. As noted below, the final dataset used for the current report and subsequent analyses was obtained from the SCDE at the end of April 2019.

Figure 1 shows that the final dataset analyzed for the current report was obtained after multiple requests and data corrections. While we commend the SCDE for attending to problems in the dataset, we note that there may be discrepancies with the final data used for analyses and the actual status of kindergartners. For example, data screening of intermediary datasets yielded different total counts for kindergartners and relevant subgroups (e.g., 5K student who had been enrolled in CERDEP in 4K) across the different datasets. Therefore, while this report analyzes and reports the numbers obtained from the April 29, 2019 dataset, we are aware that there may be discrepancies between the data analyzed and reported here and kindergartners' actual status.

Figure 1. Timeline of datasets obtained from the SCDE for the 2018 Fall KRA Evaluation

Fall 2018 KRA Findings and Recommendation

A summary of findings from the 2018 administration of the KRA are as follows:

- **Finding 1:** At the beginning of the 2018-2019 school year, the KRA was administered to 54,904 kindergartners across South Carolina.
- **Finding 2:** Statewide, about 37 percent of the children were at the KRA Demonstrating Readiness level in the Fall of 2018 as compared to 36% of children at the KRA Demonstrating Readiness level in the Fall of 2017.
 - Based on the Fall 2018 assessment results, 37 percent (20,314) of South Carolina's kindergarten students were at the Demonstrating Readiness level, meaning they entered kindergarten with sufficient skills, knowledge and abilities to engage with kindergarten-level instruction. An additional 38 percent (20,864) of these children were Approaching Readiness and needed supports to be able to engage with kindergarten-level instruction. As many as 25 percent (13,726) of children were at the Emerging Readiness level, meaning they needed significant support to engage in kindergarten-level instruction.
 - Across domains, a higher percentage of kindergartners reached Demonstrating Readiness in Social Foundations and Physical Development and Well-being in 2018 than in 2017. In Language and Literacy and Mathematics, a lower percentage of students reached Demonstrating Readiness in 2018 than in 2017.
 - Scores from the 2018 KRA administration showed that 32 districts met or surpassed the overall state average for Demonstrating Readiness; results for these districts (and all districts) are detailed in Appendix B.
 - Statewide, 29 percent of kindergartners reached Demonstrating Readiness level in Mathematics, representing the domain with the lowest percent of students at the Demonstrating Readiness level.
 - Across South Carolina, 52 percent of students were at the Demonstrating Readiness level in the Physical Development and Well-Being domain, representing the highest scoring domain statewide, shown in Table 2 of this report. In the Social Foundations Domain, the overall percentage of students Demonstrating Readiness increased four percent from 2017 to 2018.

2017 and 2018 School Year Statewide KRA Results

School Year	Number	Emerging Readiness	Approaching Readiness	Demonstrating Readiness
Overall				
Fall 2017	54,927	26%	38%	36%
Fall 2018	54,904	25%	38%	37%
Social Foundations				
Fall 2017	54,927	28%	27%	45%
Fall 2018	54,904	25%	26%	49%
Language and Literacy				
Fall 2017	54,927	23%	43%	34%
Fall 2018	54,904	24%	43%	33%
Mathematics				
Fall 2017	54,927	31%	38%	31%
Fall 2018	54,904	32%	39%	29%
Physical Development and Well-Being				
Fall 2017	54,927	28%	24%	48%
Fall 2018	54,904	26%	22%	52%

- **Finding 3:** Among White children, about 46 percent performed at the Demonstrating Readiness level on the Overall scale, while 27 percent of African American children and 24 percent of Hispanic children were at that level (see Table 3.)
- **Finding 4:** Analysis of the KRA data identified test results for 86 percent of children who were enrolled in the Child Early Reading Development and Education Program (CERDEP) (which is state-funded, full-day 4K) in school year 2017-18 and took the KRA as kindergartners in the fall of 2018. Approximately 36 percent of these former CERDEP students scored Demonstrating Readiness on KRA as compared to 37 percent of all other kindergartners. Of note, the domain with the lowest percentage of former CERDEP students reaching Demonstrating Readiness was Mathematics at 26 percent as compared to all other students at 30 percent. It should be noted that kindergartners formerly enrolled in CERDEP are a more homogenous group of low-income students at or below 185 percent of the poverty level and/or with developmental delays (see Table 4.)
- **Finding 5:** Comparing KRA test results for students who attended a 4K program, either full or half-day, in a non-CERDEP eligible district with results for students who attended a 4K program in a CERDEP-eligible district, the data show the following. Both groups showed slight increases in the percentage of kindergartners performing in the Demonstrating Readiness category in 2018 as compared to 2017. In CERDEP districts, 38 percent of kindergartners scored Demonstrating Readiness. In non-CERDEP districts, 41 percent of kindergartners who participated in 4K programs performed in the Demonstrating Readiness category. CERDEP eligible districts generally have significantly higher proportions of students who are in poverty (see Table 5.)
- **Finding 6:** In 2018 fourteen districts met or surpassed the state average on every KRA domain: Anderson 4, Anderson 5, Charleston, Dorchester 2, Georgetown, Greenville, Laurens 56, Lexington 3, Lexington 4, McCormick, Richland 2, Spartanburg 5, York 2 and York 4. For comparison purposes, in 2017 thirteen districts met or surpassed the state average. In both

years, 2017 and 2018, the following eight districts met or surpassed the state average: Anderson 4, Charleston, Dorchester 2, Georgetown, McCormick, Richland 2, York 2 and York 4. Appendix A provides information by district for KRA results in 2017 and 2018.

- **Finding 7:** The test publishers note that the KRA assessment may be given within the first 45-days of a school year. However, it is recognized that scores for children may differ substantially if the test is given at the 1st day of school as compared to the 40th day of school. Recording the date when the KRA test is administered would allow for comparison of scores for children taking the assessment at similar timeframes.
- **Finding 8:** Analyses were hindered by incomplete data sets or potentially inaccurate or inadequate reporting of information. These obstacles may ultimately limit the interpretability of results, especially for students who attended private centers in CERDEP. Tables 8 and 9 of the Technical Appendix note that using the CERDEP indicator, the number of children who were identified as enrolled in a private 4K CERDP setting was only 39. And, as in the prior year, analysis of the prior child care experience of kindergarten students could not be conducted due to incomplete data. (Please see the Technical Appendix for additional information.)

Recommendation 1: Additional discussion with the South Carolina Department of Education (SCDE) and the Office of First Steps to School Readiness (First Steps) is needed to improve data collection to ensure that the unique student identifiers that children participating in private centers under CERDEP follow children upon entering public schools and to improve data quality regarding a child's prior experience in other education programs like Head Start.

Recommendation 2: Similar to Maryland, the SCDE and First Steps should continue to update www.scprofile.com, a website that provides county-by-county profiles with data relevant to the well-being of young children. The data should be updated annually, and labeled with the year it has been provided and the data source. Each county profile should include longitudinal data, when available, so children's progress may be observed over time.

Recommendation 3: For future analysis of KRA results, the date when children are assessed should be collected and included in all KRA data sets along with the unique student identifiers.

KRA Results From the 2018 Fall Administration

The KRA was administered to South Carolina kindergartners at the beginning of the 2018-2019 school year, marking the second year of a statewide administration of KRA. As noted by the test developers, the KRA is to be administered no later than the 45th day of the school year. School districts were asked to administer the KRA within this timeframe; however, the exact date of when the test was given was not reported.

The KRA was created by a partnership of the nonprofit education agency WestEd, Johns Hopkins University, the Ohio Department of Education, and the Maryland State Department of Education. At present, the test contractor does not recommend reporting the KRA domain scores, only the overall performance score. Even so, both Ohio and Maryland report all domain scores. Test and measurement specialists at the South Carolina Department of Education state that they judge the domain scores to have sufficient value for reporting. Therefore, this report provides the KRA domain scores in addition to the overall score.

In analyzing the KRA results, the University of South Carolina research team used guidance provided by the South Carolina Department of Education (SCDE). A memorandum from SCDE states that KRA overall scores, domain scores, and categories of performance were to be produced for all students, including those with one or more “No Score” items or missing scores. Only students with all items missing were to have no scores (see Appendix C).

Table 1 shows the number and proportions of children to whom the KRA was administered by ethnicity during the 2017 and 2018 school years. In both school years, nearly half of the children were White, about a third African American, and ten percent Hispanic.

Table 1
2017 and 2018 School Year Ethnicities of 5K Children Assessed with KRA

Race/Ethnicity	2017		2018	
	Number	Percent	Number	Percent
Asian	863	1.6%	925	1.7%
African American	18,142	33.1%	17,565	32.0%
Hispanic	5,466	10.0%	5,507	10.0%
American Indian	161	0.3%	190	0.3%
Multiracial	2,903	5.3%	3,043	5.5%
Pacific Islander	75	0.1%	71	0.1%
White	27,253	49.7%	27,582	50.3%
Unreported			21	<0.1%
Total	54,863	100.0%	54,904	100.0%

**Please note that percentages may vary because of rounding up or down one percentage point in tables.*

Table 2 reports the performance of the South Carolina kindergarten children for whom scores were reported in fall of 2017 and 2018. On the Overall scale, most children (38 percent) were in the Approaching Readiness category. In 2018, nearly as many (37 percent) were in the highest category of performance, Demonstrating Readiness, with 36 percent in this category in 2017. In both the 2017 and 2018 school years, about one fourth of kindergartners were in the Emerging Readiness category.

**Table 2
2017 and 2018 School Year Statewide KRA Results**

School Year	Number	Emerging Readiness	Approaching Readiness	Demonstrating Readiness
Overall				
Fall 2017	54,927	26%	38%	36%
Fall 2018	54,904	25%	38%	37%
Social Foundations				
Fall 2017	54,927	28%	27%	45%
Fall 2018	54,904	25%	26%	49%
Language and Literacy				
Fall 2017	54,927	23%	43%	34%
Fall 2018	54,904	24%	43%	33%
Mathematics				
Fall 2017	54,927	31%	38%	31%
Fall 2018	54,904	32%	39%	29%
Physical Development and Well-Being				
Fall 2017	54,927	28%	24%	48%
Fall 2018	54,904	26%	22%	52%

Note: For the KRA, Emerging Readiness is the lowest category and Demonstrating Readiness is the highest ability category.

Based on this 2018 KRA assessment, 37 percent (20,314) of South Carolina’s kindergarten students were Demonstrating Readiness, meaning they entered kindergarten with sufficient skills, knowledge and abilities to engage with kindergarten-level instruction. An additional 38 percent (20,864) of these children were Approaching Readiness and needed supports to be able to engage with kindergarten-level instruction. As many as 25 percent (13,726) of children were at Emerging Readiness, meaning they needed significant support to engage in kindergarten-level instruction.

Figure 2 provides a graphic of the Overall KRA scores from the 2017 and 2018 administrations of the test for kindergarten students in South Carolina. As shown in the figure, the percentage of kindergartners Demonstrating Readiness overall increased from 36 percent in 2017 to 37 percent in 2018. Across domains, a higher percentage of kindergartners reached Demonstrating Readiness in Social Foundations and Physical Development and Well-being in 2018 than in 2017. In Language and Literacy and Mathematics, a lower percentage of students reached Demonstrating Readiness in 2018 than in 2017. As in 2017, the domain with the lowest

percentage of kindergartners reaching Demonstrating Readiness in 2018 was Mathematics. The percentage of kindergartners reaching Demonstrating Readiness in Mathematics declined from 31% in 2017 to 29% in 2018.

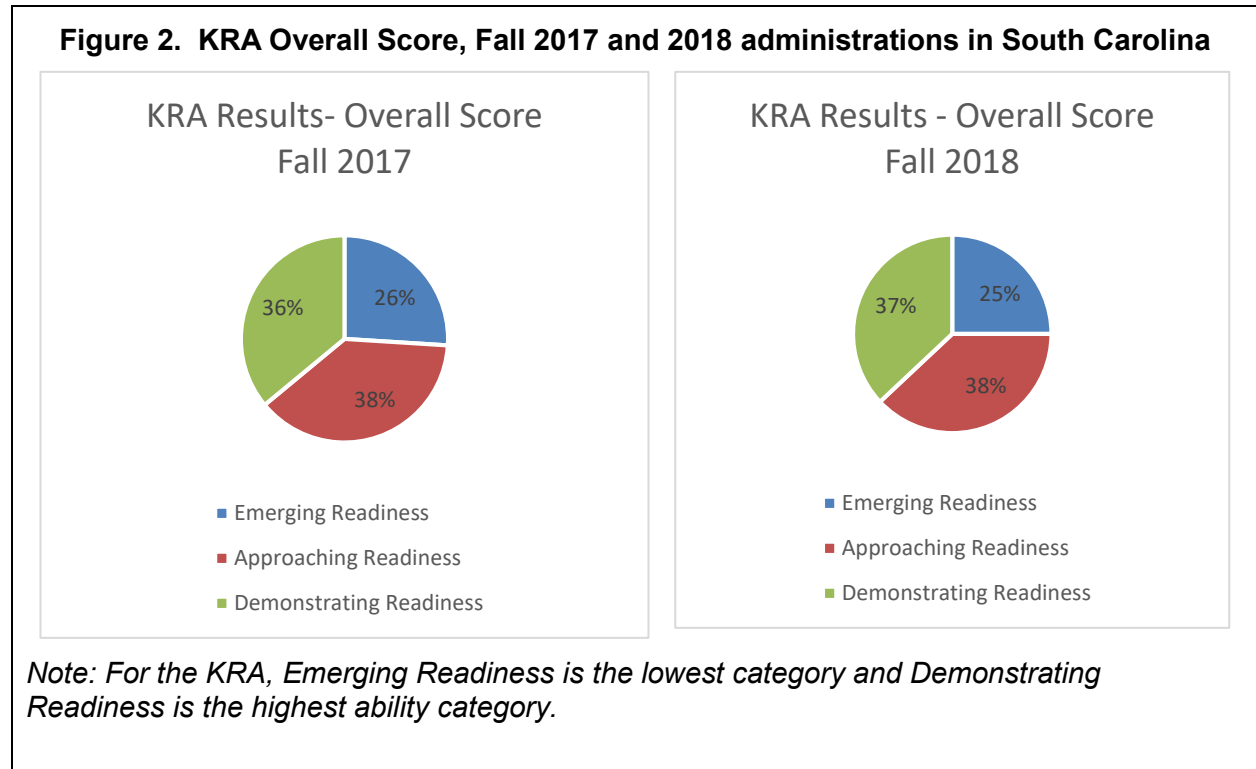

Table 3 shows that most children who took the KRA were White (54 percent), with the next large proportion comprised of African American children (35 percent), followed by Hispanic children (11 percent.) Other ethnicities are not reported due to their relatively small proportions among the overall kindergarten population.

Among White children, 46 percent were found at the Demonstrating Readiness level on the overall readiness scale. KRA results found African American and Hispanic children in proportions of 27 percent and 24 percent, respectively, in the Demonstrating Readiness category for overall readiness. On all the four domains, White kindergartners were found in greater proportions in the highest category of readiness than African American or Hispanic children. Proportions of children at the Demonstrating Readiness level were most similar on the Physical Development and Well-Being domain, where the difference between the ethnic groups was within 10 percent.

**Table 3
2018 Fall KRA Results by Ethnicity**

Ethnicity	Number	Emerging Readiness	Approaching Readiness	Demonstrating Readiness
Overall				
African American	17,565	31%	42%	27%
Hispanic	5,507	37%	39%	24%
White	27,582	18%	36%	46%
Social Foundations				
African American	17,565	31%	28%	41%
Hispanic	5,507	31%	26%	43%
White	27,582	21%	24%	55%
Language and Literacy				
African American	17,565	29%	45%	26%
Hispanic	5,507	41%	41%	18%
White	27,582	18%	42%	40%
Mathematics				
African American	17,565	40%	41%	19%
Hispanic	5,507	47%	36%	17%
White	27,582	24%	38%	38%
Physical Development and Well-Being				
African American	17,565	30%	24%	46%
Hispanic	5,507	27%	24%	49%
White	27,582	23%	21%	56%

Table 4 reports KRA results for two groups of kindergartners: (1) children verified as formerly enrolled in the full-day, state-funded 4K program, the Child Early Reading Development and Education Program (CERDEP); and (2) all other kindergartners. The data were generated using a new variable available in the 2018 data set that identified kindergartners who were known to have been enrolled in CERDEP in the prior year. As reported by the EOC in January of 2019, there were approximately 11,567 children enrolled in public schools and private centers in CERDEP in school year 2017-18. Therefore, approximately 86 percent of children who were enrolled in CERDEP in school year 2017-18 and who took the KRA as kindergartners in the fall of 2018 are reflected in Table 4.

Table 4 documents that, of the 86 percent of all children who were enrolled in CERDEP in 2017-18 and took the KRA in 2018, 36 percent reached an overall score of Demonstrating Readiness as compared to 37 percent for all other students in the state who were not enrolled in CERDEP. Of note, 22 percent of CERDEP enrolled children reached Emerging Readiness on the overall score as compared to all other children at 25 percent. Across domains, former CERDEP children scored comparably to all other children who did not participate in CERDEP. The domain with the lowest percentage of former CERDEP students reaching Demonstrating Readiness was Mathematics at 26 percent as compared to all other students at 30 percent.

We observe that the information regarding CERDEP status (9,969) students is lower than the number of students reported to be in CERDEP from the January 2019 report of 4K students (roughly 11,000 students). The percentage below is roughly 85 percent of the students enrolled

in the CERDEP program and includes only students that had attended public school. (Please see the Technical Appendix for additional information.) The results here suggest that there may be inaccuracies with the dataset used for analyses (e.g., inaccuracies in reporting, the unique identifiers assigned during four-year-old kindergarten are not transferred to the start of kindergarten.)

Table 4
2018 Fall KRA Results by Students 2017 Enrollment Status in CERDEP

Students	Number	Emerging Readiness	Approaching Readiness	Demonstrating Readiness
Overall				
Non CERDEP	44,935	25%	37%	37%
CERDEP	9,969	22%	42%	36%
Social Foundations				
Non CERDEP	44,935	26%	25%	49%
CERDEP	9,969	24%	28%	48%
Language and Literacy				
Non CERDEP	44,935	25%	42%	33%
CERDEP	9,969	20%	46%	34%
Mathematics				
Non CERDEP	44,935	32%	38%	30%
CERDEP	9,969	31%	43%	26%
Physical Development and Well-Being				
Non CERDEP	44,935	26%	22%	52%
CERDEP	9,969	24%	24%	52%

Table 5 documents the KRA results for 2017 and 2018 for two groups of children: (a) those verified as having been enrolled in 4K programs in districts or private child care centers that participated in CERDEP; and (b) those verified as being enrolled in 4K programs administered by a public school district that did not participate in CERDEP. Note, the Table 5 CERDEP status differs from the CERDEP group status indicated in Table 4. Analyses for Table 4 used a new variable first introduced in the 2018 dataset that identified children known to have been enrolled CERDEP. Information for the 2018 dataset was collected at Kindergarten entry from parents (please see the copy of the Kindergarten Enrollment Form in Appendix D). This reporting of prior CERDEP identification was not available with the 2017 KRA administration. In 2017, the CERDEP district was used as a proxy to denote status in the program. To allow comparison of KRA performance in 2018 results to 2017 results, Table 5 classifies CERDEP for children on the basis of district participation in the program (i.e., district proxy). This comparison group is imperfect as it may still contain children who attended preschool in CERDEP districts or private sites. Irregularities in records (e.g., incorrect birthdates reported across files) prevented matching each child's 4K (2017-18) data with their 5K (2018-19) data.

As shown in Table 5, both groups showed slight increases in the percentage of kindergartners performing in the Demonstrating Readiness category in 2018 as compared to 2017. The higher percentages of children in this level of performance are in the Overall score and in the domains

of Social Foundations and Physical Development and Well-Being. The percentage of difference between the groups in the Demonstrating Readiness category on all scales generally remained the same in 2018 as in 2017. The changes for both groups in 2018 were in the same direction (increase or decrease in readiness) and were roughly equivalent for each of the KRA domains.

Across time, both groups showed some slight increases in proportions in the Demonstrating Readiness category in the 2018 KRA administration. The higher percentages of children in this upper level of performance can be seen in the Overall, Social Foundations, and Physical Development and Well-Being domains. The percentage of difference between the groups in the Demonstrating Readiness category on all scales generally remained the same in 2018 as in 2017. The changes seen for both groups in 2018 were in the same direction (increase or decrease in readiness), and roughly at equivalent levels for each of the KRA domains.

Table 5
KRA Results in 2017 and 2018 School Years:
By Proxy CERDEP Status and 4K Participation in Non-CERDEP Districts

CERDEP District Status	Assessment Year	Number	Emerging Readiness	Approaching Readiness	Demonstrating Readiness
Overall					
Non-CERDEP	2017 Fall	10,162	22%	39%	39%
	2018 Fall	10,648	20%	39%	41%
CERDEP	2017 Fall	11,528	23%	41%	36%
	2018 Fall	11,004	21%	41%	38%
Social Foundations					
Non-CERDEP	2017 Fall	10,162	26%	26%	48%
	2018 Fall	10,648	22%	25%	53%
CERDEP	2017 Fall	11,528	27%	28%	45%
	2018 Fall	11,004	23%	27%	50%
Language and Literacy					
Non-CERDEP	2017 Fall	10,162	20%	43%	37%
	2018 Fall	10,648	19%	44%	37%

	2018 Fall	11,004	19%	45%	36%
Mathematics					
Non-CERDEP	2017 Fall	10,162	27%	40%	33%
	2018 Fall	10,648	28%	41%	31%
CERDEP	2017 Fall	11,528	29%	42%	29%
	2018 Fall	11,004	30%	43%	28%

CERDEP District Status	Assessment Year	Number	Emerging Readiness	Approaching Readiness	Demonstrating Readiness
Physical Development and Well-Being					
Non-CERDEP	2017 Fall	10,162	25%	23%	52%
	2018 Fall	10,648	22%	21%	57%
CERDEP	2017 Fall	11,528	26%	24%	50%
	2018 Fall	11,044	23%	23%	54%

Comparison of SC KRA Results to Other States Using the KRA

Maryland and Ohio have administered the KRA yearly, beginning with the academic school year 2014-15. Ohio has always assessed all kindergartners each year, following a census approach (as done in South Carolina). Maryland’s approach to KRA assessment has evolved over time. In school years 2014-15 and 2015-16, Maryland assessed all kindergartners. Beginning in school year 2016-17, Maryland offered districts the option of doing sampling or universal assessment of kindergartners.

In 2016, the Maryland General Assembly passed legislation that required the Maryland State Department of Education (MSDE) to administer the KRA as a “representative sample,” rather than to all kindergartners. The statute also allowed for local boards of education and individual schools to administer the KRA to all incoming students. To align with the new regulations, MSDE advised jurisdictions (i.e., districts) to select one of the following administration methods for school year 2016-2017:

- Census Administration. Administering the KRA to all incoming kindergartners, assessing each student’s knowledge, skills, and abilities.
- Randomized Sample Administration. Administering the KRA to a random sample of students in each classroom.²

Maryland has 24 school district jurisdictions. In school year 2016-17, eight jurisdictions conducted a census administration of the KRA, and the remaining 16 selected sample administrations. By school year 2018-19, 14 jurisdictions conducted census administration. The remaining ten “jurisdictions conducted a sample administration; however, nine of these jurisdictions also elected to assess all students in specific schools, including schools with Judy Centers, students in Title I schools, and schools with Preschool Development Grant classrooms.”³

² Readiness Matters. The 2016-17 Kindergarten Readiness Assessment Report. Maryland Department of Education. January 2017. https://earlychildhood.marylandpublicschools.org/system/files/filedepot/4/rm_book_16-17.pdf

³ Readiness Matters. The 2018-2019 Kindergarten Readiness Assessment Report. Maryland Department of Education. https://earlychildhood.marylandpublicschools.org/system/files/filedepot/4/2018-19_rm_book.pdf

Maryland also documents KRA readiness results by jurisdiction. In Maryland the analysis by jurisdiction includes readiness by academic risk factor (children from low-income households, those learning the English language, or those with a disability). Maryland also documents readiness by prior care. Prior care identifies children who were in a child care center, in family child care, in a Head Start program, in home or informal care, in a non-public nursery, or had formal preschool experience prior to entering kindergarten. During the fall of 2017, the South Carolina Department of Education, in collaboration with other state agencies and entities that provide services to young children, created a website, www.scprofile.com. The website contains state and county-level data relevant to the well-being of young children, including the overall percentage of children ready for kindergarten based on KRA. There is no indication on the website of the specific year of the KRA results, and the Data Source Information link on the website was not functional.⁴ And, unlike Maryland, the website does not provide prior child care experience, KRA domain results, or longitudinal information.

The following tables provide information to consider the overall results of the KRA in South Carolina, Maryland and Ohio. The data suggest:

- Ohio experienced the greatest improvement in KRA results between the first and second administration of the KRA. For the past three years, Ohio experienced incremental increases in the percentage of kindergartners performing at Demonstrating Readiness on KRA.
- In Maryland during the three years that census administration of the KRA was conducted, the percentage of kindergartners performing at Demonstrating Readiness on KRA is between 43 and 47 percent.

Table 6
Percentage of Kindergartners Demonstrating Readiness Overall on KRA
by Academic Years

	2014-15	2015-16	2016-17	2017-18	2018-19
Ohio	37.3%	40.1%	40.6%	41.5%	N/R
Maryland	47.0%	45.0%	43.0%	45.0%	47.0%
South Carolina				36.0%	37.0%

Appendices

Several appendices for the 2018 KRA administration are provided.

- The **Technical Appendix** provides detailed information about inconsistencies identified in the 2018 Fall dataset analyzed for the KRA evaluation.
- **Appendix A** shows the proportion of children at the KRA Demonstrating Readiness level for the Overall score and for each domain by district for the 2017 and 2018 administration. Percentages shaded in yellow indicate percentages equal to, or higher than, those at the state-level. Districts eligible to participate in CERDEP are denoted by bold italics. The districts of Horry, Kershaw and Union, while eligible to participate in CERDEP, opted not to participate in school years 2016-17 through 2018-19.
- **Appendix B** provides individual results for the KRA 2018 by individual district. Scores by KRA Domain are provided.
- **Appendix C** reports a memo, obtained from the SCDE, regarding guidelines for reporting and using KRA scores.
- **Appendix D** provides a full copy of the Kindergarten Entry Form completed by parents when enrolling a child in Kindergarten. This form is used across all South Carolina schools.

Technical Appendix

As noted in Figure 1, the information provided in this evaluation was obtained from a dataset provided by the South Carolina Department of Education (SCDE). The final dataset analyzed was obtained after multiple requests (timeline noted in Figure 1). However, even though the SCDE made corrections and supplied new datasets, the University of South Carolina assessment team noted potentially inaccurate information stated in the dataset. The inaccuracies relate to demographic variables that discussed students' 4K CERDEP status and type of program enrollment (through types of private or preschool programs) attended in 4K.

To examine what type of program current 5K students attended in 4K, we examined the indicator presented in the dataset used here for analyses (obtained April 29, 2019). While there were over ten categories from which parents could select to state what type of program was attended, there were only five categories reported (Head Start 4K, Public 4K, Private 4K, Other 4K, No 4K in Program Prior Year, and Unreported). Of these, the largest category was Unreported, with over 28,000 students with missing information regarding what program was attended in 4K. Based on the results, we determined this information would not provide an accurate description of the impact of 4K programs attended by young children. Thus, we did not pursue this line of inquiry further. We note that the question of how children in poverty who attended various types of 4K programs (e.g., CERDEP, First Steps, Head Start, etc.) perform in 5K as compared to children in poverty who did not attend 4K is of great importance to the state. However, with the lack of available data at this time, we are unable to address this question.

Another potential discrepancy was noted with the CERDEP participation variable reported for 5K students. As noted in Table 4 of this report using the current dataset (April 29, 2019), through examining of the CERDEP participation indicator stated that 9,969 children participated in CERDEP as a 4K student. To investigate in what type of program these children were enrolled, the 4K dataset from the 2017-18 school year was used. Here, it was planned to match the information back to last year's 4K dataset used for analyses to gain information about public or private enrollment in CERDEP. Most of these students were expected to have advanced to 5K in the fall of 2018 (noting that some students would have not been identified in 5K for various reasons, such as moving out of state or retention).

Through this matching process, we were able to identify 8,850 students enrolled in 4K in South Carolina last school year. However, when examining the data to determine how many of these children had been enrolled in private CERDEP programs (e.g., First Steps), there were no children in the sample of current 5K students reporting enrollment in private CERDEP programs. The figures used are provided in the Table 8.

Table 8
Examination of 5K Students in Fall 2018 Identified as Having Attended CERDEP
Using the CERDEP Indicator

Number of CERDEP Students Identified (Table 4)	Status	Number Identified matching to 2017-18 (4K) dataset	CERDEP Status	Number
9,969	Missing CERDEP Indicator	1,111		
	CERDEP Indicator	8,858	Public	8,858
			Private	0

The current dataset (April 29, 2019) also contained information from the 4K students enrolled in the 2018-19 school year and a CERDEP status indicator was available for these students. With currently enrolled 4K students, a similar number of students were identified as participating in CERDEP. However, using the CERDEP indicator, the number of children who were identified as enrolled in a private 4K CERDEP setting was only 39 (less than < 1%) and 8,811 were noted as attending public centers.

Table 9
Examination of 4K Students in Fall 2018 Identified as Attending CERDEP Using
the CERDEP Indicator

CERDEP Status in 4K	Number	Percent
Private	39	<1%
Public	8,811	>99%
Total	8,850	100%

There are a number of possible causes for the data errors that were encountered in the course of analyses for this report. Evidence from descriptive statistics produced from the dataset suggests that students' unique identifiers (i.e. SUNS identifier) are not being carried over with consistency from year to year. This was seen in the inability to match all children's individual records in kindergarten to their prior year records from 4K. Inconsistencies between identifiers might be introduced at any point of data entry for a child, whether at the classroom, school, district, or state level. It is not possible to determine what might cause each instance of error, though this may include:

- Miskeying information
- Multiple assignment of information
- Insufficient resources (time, personnel, or equipment) to complete record entry
- Insufficient training and experience in data management

It should be noted that errors may have been identified and corrected since the time that data were uploaded to produce the dataset used in this report.

Some student data problems may be introduced during the kindergarten enrollment process. The South Carolina Early Childhood Registration Form asks parents about who provided their child’s care during the prior year. The list of provider types from which parents must select offers twelve response options: four public and seven private, and one informal setting (See Appendix D).

Table 10
Parent Response Options for Child’s Prior Care

Public Provider		Private Provider	
Unknown		Military Child Care Center	
Head Start		Registered Faith-Based Center	
Child Development Education Program [sic] (CERDEP)		Registered Family Home Center	
Prekindergarten		Group Home	
		Exempt Provider	
		First Steps (CERDEP)	
		Other Provider	
Informal Provider			
At home, other family member, or non-family member			

Parents may be unclear as to which option appropriately describes their child’s 4K provider. The response categories are not defined on the form and are phrased in terms not commonly encountered. According to the dataset, over half of the 5K students (~52%, or 28,651 children) had no reported childcare for the prior year. It is unknown whether this information was lost during development of the dataset, parents declined to provide this information, or if parents unsure of the correct category did not respond. Appendix D provides a full copy of the Kindergarten Registration form used in South Carolina.

To better understand how the data were coded and input into the dataset, the SCDE was contacted for additional information. Responses were obtained on June 6, 2019 from SCDE’s Office of Assessment.

Regarding the coding process, values for the prior year’s (2018-2019) experience in the 5K data set provided to the Education Oversight Committee are taken directly from the “Kindergarten-Previous Program” field on the Precode Tab in PowerSchool. To facilitate data entry, all districts are provided with instructions for coding each student in one of the categories, as defined in the Precode Manual posted at <https://ed.sc.gov/tests/tests-files/precode/2018-19-precode-manual1/>.

A field, "Prior Child Care", on the Early Childhood Tab in PowerSchool contains similar information to the "Kindergarten-Previous Program" variable. If, for example, the value "R-Private/Military" is checked in this field, then another field, labeled "Prior Provider," appears. The Prior Provider field contains seven possible values, as noted in the Kindergarten Registration form (Appendix D).

As stated by the SCDE, "The South Carolina Early Childhood Registration Form contains fields similar to those in the Early Childhood Tab in PowerSchool. However, the SCDE's Office of Assessment does not map the Kindergarten-Previous Program field to the Prior Provider values or to the Child's Prior Care data on the South Carolina Early Childhood Registration Form." In other words, the data from the fields are reported from the dataset as stated by parents/guardians and are not cross-examined across variables to determine if there are duplicates or discrepancies in reporting.

A recommendation for future years is to revise the Kindergarten Entry survey. This change would make completion simpler for South Carolina parents and would result in more accurate data collected for analysis and comparison.

Appendix A

Comparison of District and Statewide Percentages for KRA Demonstrating Readiness

(Percentages **shaded** indicate percentages equal to, or higher than, those at the state-level.)

District	Year	Overall	Social Foundations	Language & Literacy	Mathematics	Physical Development & Well-Being

Appendix C

Guidelines for Reporting KRA Scores

The following page is a copy of an email from Kristen W. Thompson, Senior Coordinator at the Center for Technology in Education at Johns Hopkins University, who contributed to the development of the KRA. Her message provides the guidelines for reporting scores, including those circumstances in which some, or all, KRA items were not completed.

From: Kristen Thompson [<mailto:kthompson@jhu.edu>]
Sent: Tuesday, December 19, 2017 12:04 PM
To: Wise, Alissa; Robert Moore; Linda Carling
Subject: RE: KRA Technical Report

Hi Alissa,

Here is a table that outlines the guidelines for Reporting KRA Scores in South Carolina.

Thanks,
 Kristen

Guidelines for Reporting KRA Scores			
South Carolina	Scores Reported	Reporting Categories	Status
Students who complete all items.	Overall score. Domain scores (with error band) for each domain.	Demonstrating, Approaching, and Emerging.	Complete
Students with one or more "No Score" items.	Overall score. Domain scores (with error band) for each domain.	Demonstrating, Approaching, and Emerging.	Complete with NS
Students with one or more items missing.	Overall score. Domain scores (with error band) for each domain.	Demonstrating, Approaching, and Emerging.	Some items were not complete
Student who are missing all items.	No overall score. No domain scores.	Did Not Participate.	All items are not complete

Child's Prior Care/Education Provider (5K students only) *Definitions of providers attached			
Last year my child's care was provided by the following <i>public provider</i> (Check one):			
<input type="checkbox"/> Unknown			
<input type="checkbox"/> Head Start			
<input type="checkbox"/> Child Development Education Program (CERDEP)			
<input type="checkbox"/> Prekindergarten			
My child attended the program (check one) <input type="checkbox"/> full day <input type="checkbox"/> partial day			
Name of provider:			
Last year my child's care was provided by the following <i>private provider</i> (Check one):			
<input type="checkbox"/> Military Child Care Center			
<input type="checkbox"/> Registered Faith-Based Center			
<input type="checkbox"/> Registered Family Home Center			
<input type="checkbox"/> Group Home			
<input type="checkbox"/> Exempt Provider			
<input type="checkbox"/> First Steps (CERDEP)			
<input type="checkbox"/> Other Provider			
My child attended the program (check one) <input type="checkbox"/> full day <input type="checkbox"/> partial day			
Name of provider:			
<input type="checkbox"/> Last year my child's care was provided by an informal child care provider (at home, other family member, or non-family member)			

Child's healthcare information

Did your child weigh less than 5.5 pounds at birth? Yes No
My child receives regular medical care from: Health Clinic (Health Department)
 Emergency Room Family Doctor Other

Name: _____ Phone: _____

List any long-term health concerns, illnesses, and/or allergies:

List any medication(s) prescribed for continuous long-term use:

List any special accommodation(s) that may be required to meet my child's needs most effectively while he or she is at the school:

Family Income Range

Number of persons in family or household:

Income Range of Family: \$0-\$10,000 \$10,001-\$20,000 \$20,001-\$30,000 \$30,001-\$40,000
 \$40,001-\$50,000 \$50,001-\$60,000 \$60,000 and above

Language Background

What is the child's primary language?

What language is primarily spoken in the home?

Family Literacy Services

Who in your family has participated in a school district Family Literacy Program, such as adult literacy, adult education (GED, High School Diploma), parent education, child development, or parent and adult/child interactive literacy?

Both Parents Mother Father Guardian/Grandparent No One

Definitions of Child Care Providers (Public)

South Carolina Child Early Reading Development and Education Program (CERDEP) – A public, state-funded, income based developmentally appropriate education program adhering to best practice, using research-based curriculum and assessment that must adhere to South Carolina Department of Social Services (DSS) regulations and South Carolina Department of Education (SCDE) Guidelines.

Prekindergarten (Half-day 4K) program in a public school – A district or federally funded developmentally appropriate half/partial day program for 4-year-olds adhering to best practice, using research-based curriculum and assessment that must adhere to district and/or federal guidelines.

Prekindergarten (Full-day 4K) program in a public school – A district or federally funded developmentally appropriate full-day program for 4-year-olds adhering to best practice, using research-based curriculum and assessment that must adhere to district and/or federal guideline.

Head Start – A program of the US Department of Health and Human Services that provides comprehensive early childhood education, health, nutrition, and parent involvement services to low income children and their families. Locate your local Head Start:
<https://www.benefits.gov/benefits/benefit-details/1938>.

Unknown – Self-explanatory

Definitions of Child Care Providers (Private)

Military Child Care Centers – On-post child care centers that offer full-day, partial day, or hourly child care services to military families that must be registered with DSS. Locate your local military child care centers: <http://www.militaryonesource.mil/-/military-child-care-programs>.

Registered Faith Based – Faith based care for 13 or more children that are sponsored by a religious organization that must be registered with DSS. Locate your local registered faith based providers: <http://www.scchildcare.org/>.

Registered Family Home – A family home that provides care for up to 6 children at any given time within the home of the child care provider that maintains a registration or license if a person provides care to more than one unrelated family of children on a regular basis (more than four hours a day or more than two days a week). Locate your local registered family home providers: <http://www.scchildcare.org/>.

Registered Group Home Provider – Group Homes provide care for 7–12 children in the home of the child care provider. They may care for up to 8 children without an additional caregiver. For details on registered group homes: <http://www.scchildcare.org/providers/become-licensed/licensing-requirements/licensed-group-child-care-home.aspx>.

Exempt Provider – A child care provider that operate less than four hours a day or less than two days a week or care for children from only one unrelated family. It is not inspected by DSS Child Care Licensing and monitored only because they volunteer for ABC Quality. For details on exempt providers: <http://scchildcare.org/providers/become-licensed/licensing-exemptions.aspx>.

First Steps (CERDEP/CDEP) – A private state-funded, income based, developmentally appropriate education program adhering to best practice, using research-based curriculum and assessment that must adhere to DSS regulations and SCDE Guidelines. It is housed in a private, registered child care facility. Contact your local First Steps: <http://scfirststeps.com/county-contact-page/>.

Informal Child Care – Unregulated or licensed care provided by family or other caregiver that not subject to regulations or formal guidelines.

**South Carolina Child Early Reading and Development Education Program
Parent/Guardian Consent Form**

I verify that the information I have provided on this registration form is true and accurate. I hereby grant permission for this information to be distributed to the Child Early Reading and Development Education Program (CERDEP) and other state agencies, which include, but are not limited to, the South Carolina Education Oversight Committee (EOC).

I understand that my completion of this form does not guarantee the placement of my child in a South Carolina CERDEP. If my child is placed in CERDEP, I agree that he or she will attend the class for 6.5 hours each day, five days a week, for the 180-day school year. I understand that my child's failure to meet this attendance requirement could result in his or her being dropped from the program. I further understand that I cannot register my child in the program without the appropriate documentation of his or her age and eligibility, and I have, therefore, attached to this registration form a copy of the necessary documentation.

I understand that information about my child, _____, and about the school will be used in a comprehensive, multiyear longitudinal research and evaluation project to determine the relationship between the student and school data and student success in school. The evaluation may include individual child assessment during a child's 4-year-old pre-kindergarten and 5-year-old kindergarten and other basic non-identifying educational information. All data collected are subject to the provisions of the Family Educational Rights and Privacy Act (FERPA) as well as South Carolina statutes and regulations protecting individual privacy and confidentiality. Analyses of the data collected will be conducted only by individuals approved by the EOC. Individual student names will not be used.

Signature of parent/guardian: _____

Date: _____

**South Carolina Child Early Reading and Development Education Program
Additional 4K Options**

South Carolina has a statewide partnership between public and private 4K providers. The private domain of this partnership is the Office of First Steps to School Readiness. First Steps serves four-year-old children in 46 counties in South Carolina.

The South Carolina Department of Education's Office of Early Learning and Literacy believes that children deserve an opportunity to participate in four-year-old kindergarten. In an effort to ensure that as many students are served in 4K as possible in South Carolina, please be advised that your contact information may be shared with other local 4K providers in a non-public setting. If your child is not placed in the Child Early Reading and Development Education Program (CERDEP) 4K in your local public school district, please understand that your contact information will be shared with the Office of First Steps to School Readiness and you may be contacted for opportunities for your child to attend the 4K program in a non-public school setting.

However, if you do not want your contact shared information with the Office of First Steps, check the box below.

I do not want my contact information shared with the Office of First Steps.

**Family Income Eligibility Table
2019–20**

Students eligible for the South Carolina Child Early Reading and Development Education Program (CERDEP) must provide evidence of either Medicaid eligibility or a documented family income at or below 185 percent of the Federal Poverty definition promulgated annually by the US Department of Health and Human Services.

Number of Persons in Family or Household	100% of Federal Poverty	185% of Federal Poverty
2	\$16,910	\$31,284
3	\$21,330	\$39,461
4	\$25,750	\$47,638
5	\$30,170	\$55,815
6	\$34,590	\$63,992
7	\$39,010	\$72,169
8	\$43,430	\$80,346

Check list of 2019-2020 Required CERDEP Documentation

**CERDEP Quarterly Parent/Family
Documentation Form**

Schools are to report at least quarterly to the parent(s)/guardian(s) on his/her child's progress.

It is highly recommended that an orientation to CERDEP (ex: Back to School Night, home visits, etc.) be conducted as the first of these quarterly contacts to complete the Parent Orientation Checklist.

1. First Parent/Family contact:
Type of contact: _____

Date of conference: _____

Comments/Notes: _____

Two of the quarterly contacts must include **documented parent-teacher conferences** during the school year that provide information including student progress as recorded on the assessment instrument. Conferences may occur in school or as a home visit. Please sign below to document that each Parent-Teacher Conference was held.

2. Parent Signature: _____

Teacher Signature: _____

Date of Conference: _____

Comments: _____

3. Parent Signature: _____

Teacher Signature: _____

Date of Conference: _____

Comments: _____

4. The final child assessment report must be provided at the end of the school year. This report may be sent home, reviewed at a conference or home visit.

Date of Final Assessment or Summary Report: _____

**2019–20 CERDEP
Parent/Family Orientation Checklist**
