OVERSIGHT COMMITTEE**

Reporting facts. Measuring change. Promoting progress.

PO Box 11867 | 227 Blatt Building

Columbia SC 29211 | WWW.SCEOC.ORG

AGENDA

Full Education Oversight Committee Meeting

Tuesday, December 15, 2020

Blatt Building, Room 110

1:00 P.M.

- I. WelcomeEllen Weaver
- II. Introduction of New Members.....Ellen Weaver
- III. Approval of Full Committee Minutes, October 12, 2020.....Ellen Weaver
- IV. Subcommittee Reports:
 Academic Standards & Assessments and
 Public Awareness Joint MeetingNeil Robinson
Information Items:
 Career Ready Certifications, 2020 Update
 Academic Recovery Camp Data Summary
 ACT/SAT Performance Summary, 2020 Graduate Cohort

Action Item:
 Cyclical Review of SC English language arts, 2020

 EIA & Improvement Mechanisms..... Dr. Bob Couch
Action Item:
 EIA Budget Recommendations for FY2021-22

Discussion Item:
 Review of Overall EIA Program Funding and EIA Charter School Funding

 Nomination Selection SubcommitteeNeil Robinson
Action Item:
 Chair and Vice Chair Nominations
- V. Action Item
 Career Ready Industry Credentials/Certifications, 2020 Angel Malone
 CTE Director, SCDE

 Accountability Cyclical Review Update Dana Yow
- VI. Adjournment

- Ellen Weaver
CHAIR
- Bob Couch
VICE CHAIR
- Terry Alexander
- April Allen
- Melanie Barton
- Neal Collins
- Raye Felder
- Barbara B. Hairfield
- Greg Hembree
- Kevin L. Johnson
- Sidney Locke
- John W. Matthews, Jr.
- Brian Newsome
- Neil C. Robinson, Jr.
- Jamie Shuster
- Molly Spearman
- Patti J. Tate
- Scott Turner

SC EDUCATION OVERSIGHT COMMITTEE

Minutes of the Meeting

October 12, 2020
Blatt Building, Room 110
1:00 p.m.

Members present: Ellen Weaver, Chair; Dr. Bob Couch (via WebEx), Vice-Chair; Rep. Raye Felder; Rep. Neal Collins; Melanie Barton; Barbara Hairfield; Dr. Scott Turner; Patti Tate; Sen. Kevin Johnson; Rep. Terry Alexander; Neil Robinson; Sen Greg Hembree; April Allen; and Dr. Brian Newsome

EOC staff present: Matthew Ferguson; Dr. Kevin Andrews; Dr. Valerie Harrison; Dr. Rainey Knight; Hope Johnson Jones and Dana Yow

Others Present: Dr. Lee D'Andrea and Diane Sigmon

Ms. Weaver called the full committee meeting to order, asking for approval of the minutes from the August 3 full EOC meeting. The minutes were approved and seconded.

Dr. Couch asked Ms. Hairfield to present an update from the Public Awareness/Academic Standards and Assessments subcommittee. Ms. Hairfield summarized the Community Block Grants Evaluation for 2018-19.

Community Block Grant Evaluation for 2018-19

- At subcommittee, Dr. Lee D'Amico presented the results of the evaluation that was completed of the grants that were received in 2018-19. Seven districts or consortia received funding: Berkeley; Chesterfield; Greenwood 50; Lexington/Richland 5; Pee Dee Consortia; Spartanburg Consortia; and York 1. The range of funding per district/consortia was \$84,156 to \$240,050
- The report provides a summary of findings which were collected by an evaluation team from USC and Clemson. Data included mid-year and end-of-year numbers and assessment results; end-of-year outcomes based on logic model; impact survey; site surveys with each district/consortium; and development of profiles for each district/consortium with review.
- Some of the outcomes of the evaluation were:

Berkeley

- Improved teacher-student interactions in targeted classrooms from baseline to mid-year in three domains of CLASS

Chesterfield

- Expanded 4K in district by six classrooms to better meet needs of community

- Improved school-home partnership through repeated reading initiative based on common titles in classrooms that are also provided to families for at-home reading

Greenwood 50

- Student referrals decreased by 61% from 2018-19 to 2019-20 when comparing August-March of each school year

School District 5 of Lexington and Richland Counties

- Increase in total key practices from 55% at the beginning year to 85% at mid-year
- Increase in the number of teachers who improved key practices from 72% to 100%

Pee Dee Consortia

- Approximately 85% of teachers scored a 75% or higher on the TPOT in Fall 2019
- TPOT data over time indicated positive correlation between improvements and amount of professional development
- Social-Emotional Assessment Measure (SEAM) piloted with Florence 1 teachers; teachers shared SEAM data with parents and goals for each student with the parent

Spartanburg Consortia

- Expanded initiative to include eleven new 4K classrooms within three new districts

York One

- More than 50% of children who participated in summer program demonstrated improved skills in letter/number recognition
- Parents who participated in Parent Institute indicated improved knowledge/skills

Ms. Hairfield asked Dr. D'Andrea to present an eLearning update to the EOC.

eLearning Update

Dr. Lee D'Andrea presented to the EOC a report Year 3 of the eLearning Project. Currently, there are 49 eLearning districts and 23 Readiness Districts

In the previous years, there were a total of 15 eLearning districts. The pandemic and its impacts changed the landscape of eLearning.

Details of the previous findings:

- In the implementation of eLearning, district leadership and organizational structure were vital and critical to the overall success of each district. Commitment from the district superintendent, school boards and district and building level staff are critical.
- Successfully separating from the physical school space is *based on the foundation of a well-established digital learning environment within the physical classroom*. This pilot project examined the use of eLearning when schools were forced to close (or separate students from the physical space) for short periods of time, in cases of inclement weather, utility emergencies, out of school suspension or student illness. An extensively

implemented Learning Management System (LMS) like Google Classroom, Canvas, Blackboard, or Schoology is critical.

- Preparation and planning make a difference in the quality of the migration from digital learning environment (in school) to eLearning (away from school).

The lessons learned from eLearning districts have been critical as online learning for extended periods of time has been extended. The foundation may be different, but equity and access can help equalize. Students with special needs must be addressed, as well as student support for wrap-around services, like guidance and mental health counseling.

Ms. Barton said that one district is entirely virtual now, but they are not on the list. Dr. D'Andrea said that a few districts started applications but didn't complete them.

Dr. Turner asked if there is an opportunity for the state to allow districts more bandwidth. Ms. Barton said that K-12 Technology Committee would be the group to ask about this.

Ms. Hairfield stated there is a need for wraparound services to occur. She also asked about the teacher evaluation 4.0 rubric; would the rubric be revised to involve teachers who are teaching remotely?

Rep. Collins asked if we know from March to May how many students were without access. Ms. Nilges stated that number was approx. 16,000 students.

Ms. Hairfield resumed an update on other items that came before her subcommittee.

Re-think K-12 Grant

- In July, it was announced that SC was the recipient of \$15 million in funding for the Rethink K-12 Education Models Grant from the US Dept of Education as part of the Coronavirus Aid, Relief and Economic Security (CARES) Act.

South Carolina's application, titled *Return to Learn: Delivery Quality Instruction Virtually Anywhere*, once carried out, will:

- Increase availability of remote learning resources to students and teachers in areas of SC that lack broadband access;
 - Improve education resources for specific, identified gaps by developing and curating engaging, high-quality content;
 - Increase teacher experience, confidence, and proficiency with remote learning technology and resources;
 - Improve communication between families, teachers, and schools to support remote learning.
- The EOC is a partner in this grant, along with SCETV. Part of the EOC's role will be to improve the supports for remote learning for families and educators.

Communications Plan

- EOC staff maintains a thorough communications plan to identify ways to improve how the EOC communicates with, relates to, and influences its various stakeholder groups. The plan is updated at least every two years to support and enhance the overall mission and values of the agency.

- The EOC's mission is to affect the dramatic, results-based and continuous improvement of South Carolina's educational system by creating a truly collaborative environment of parents, educators, community leaders, and policymakers. The values, which support the mission of the EOC, are:
 - A sole focus on what is best for students;
 - A belief in broad-based inclusion and collaboration;
 - A belief in rigorous standards, assessments and publicly known results;
 - The implementation of research and fact-based solutions that improve results; and
 - A passion for immediate, dramatic and continuous improvement that is unaffected by partisan politics.
- The EOC Retreat on August 3, 2020 was devoted to strategic planning; communications emerged as an area in need of operational improvement. High expectations still matter for students and data-informed decisions can be more made more difficult when the data is not accessible or available. Now more than ever, it is important to provide timely and accurate information to everyone who is a member of a student's success team, whether they are a teacher, parent, caregiver, school board member, or a legislator making decisions designed to benefit all students in the state.

The proposed objectives for FY2020-21 are:

1. Increase the use of state and school report cards and other sources of data for decision-making and continuous student and school improvement.
2. Support a more coherent approach to effectively deploy and utilize the array of data and public reporting tools.
3. Continue to implement public awareness strategies which focus on providing support to students and families served by the PK-12 public school system as well as teachers.
4. Equip and empower parents and families to advocate in partnership with community organizations, businesses and others to be aware of, and part of, school improvement efforts.

For each of the objectives, there are specific strategies and tactics outlined for communicating with different stakeholder groups. The groups, or intended audiences of the EOC, are identified as:

1. Parents and families of school-age children
2. Education community
3. Policymakers (legislators, State Board of Ed., School Board members)
4. Business leaders and community members

Some other highlighted activities of the plan include:

- Analysis of remote learning March 2020-June 2020: high level briefings for policymakers and materials for educators to use.
- Develop online tool to help families and students plan for high school, college, and careers (2016 High School Task Force recommendation)
- Update tool to help families understand early childhood options
- Develop materials for families to support students who are learning remotely (ReThink grant)

- Update Family-Friendly standards for Social Studies

Ms. Barton said she has a newfound appreciation for all the data that comes out, and she supports efforts to give data more emphasis

Ms. Weaver asked about assessing the current staff capacity since there is a lot in the plan. Mr. Ferguson said we have talked about bringing in more help in the communications area.

Dr. Newsome updated the committee on the cyclical review of the accountability system.

The Accountability Advisory Committee continues its work, completing the Cyclical Review of the Accountability System, which is required every 5 years. The EOC should expect to see the Accountability Framework at its December meeting. It is expected that there will be short-term recommendations as well as long-term recommendations made in that framework. Since there is not a deadline in the law that outlines when that report goes to the General Assembly, we may perhaps want to have discussion about working with members of the State Board of Education following the report's release to make certain that recommendations for moving forward are clearly outlined.

EOC members also took a survey on the accountability system, and the results were shared with the subcommittee. As a summary:

- Members ranked *High quality instruction, Safe Learning Environment, and Rigorous Core Academics* as the most important school characteristics
- In terms of school improvement, members ranked *effective leadership, assessments, and instruction* and most important
- In looking at important measures to include in an education accountability system, the following items ranked highest: *Progress in reducing the achievement gap among students and 3rd grade reading success*
- *Measures of workplace skills and results on college and career readiness exam results* are considered the most important data to have when determining college and career success of students
- When looking the Profile of the SC Graduate, the skills and characteristics EOC members felt were the most important were *Integrity, Perseverance, and Work Ethic.*
- In terms of the current accountability system, over 40% of respondents felt that 90 to 95% of students should be performing at grade level or above in ELA and math for a school to receive the highest rating
- The majority felt that school report cards are effective tools to improve education, but some felt that they label schools and are divisive

- The point weightings in the current system were largely agreed with except it was recommended more weight be given to Academic Achievement in ELA and Math for elementary, middle, and high schools.
- Finally, there was general agreement that schools and student success should be celebrated with state recognition and awards; increased funding; community recognition; and additional resources and support.

Ms. Felder asked about the survey results. Ms. Yow stated that they would see the full, larger set of survey results once the final recommendations came forward to the EOC. What the EOC had been given was just the results of the survey of EOC members only.

Dr. Turner stated he agreed with the academic achievement piece; we do need multiple data points.

Mr. Ferguson gave an accountability overview and update. He reminded the committee that the SCDE is submitting a waiver to the USDE that requests all federally accountability-related testing requirements be waived for the current school year. He gave the committee members an overview of the current system and the impact of waivers on the 20-21 report cards and other potential issues. He put forth the following staff recommendations:

1. EOC staff recommends a commitment to administering state assessments to all students in SY 20-21 to provide statewide and district level data.
 - Given the unprecedented instructional disruption that has occurred as a result of COVID-19, the importance of understanding and being transparent about student mastery of state standards has never been more critical. We have a responsibility to provide policymakers and education leaders the information required to make data-informed decisions.
2. EOC staff recommends requesting from SCDE a plan to administer assessments to a sample of students in SY20-21 to provide state level data by subgroup in the event it is not possible to administer state assessments to all students.
 - Recognizing that schools and educational delivery have never looked like they must this year, we must remain adaptable and resist the urge to continue as we always have simply because that is how it has always been done while also acknowledging our responsibility to know so we can continue to do better.
3. EOC staff recommends waiving school ratings for SY 20-21.
 - Because the administration of state level assessment was waived in Spring '20, there are significant gaps in the data available to calculate school ratings for SY 20-21. Up to 50 points of the elementary / middle school report card are significantly affected. Forty (40) points of the high school report card are potentially affected.

There was a question about why the student survey was chosen. Ms. Barton stated that the student voice was given priority in the last cyclical review.

Ms. Weaver asked for members to consider a 4th recommendation: the EOC recommends the publication of school report cards for SY 20-21 by October 2021 to include all available data. The committee concurred.

Ms. Allen stated she had a very grave concern about what children are missing, particularly those that don't have an opportunity to go to preschool.

Members inquired about the COVID slide, if we knew what it was? We don't know what the slide is although we have predictions now from the psychometricians that show up to a year's loss nationally.

Ms. Tate mentioned MAP, stating that some of these students will not have math until 2nd semester so she thinks the data will be skewed in the remote learning study. Pre-assessment data will still be relevant. Pre and post for December will be relevant.

Ms. Allen asked if there was a statewide strategy for footnoting exceptions and determining what was missed and how we are going to make that up for these children? We need data about what students are getting this year – access to devices and broadband? We need to collect that data. How is instruction given: Synchronous vs. asynchronous?

Rep Alexander suggested we are wasting money and time in testing during a pandemic possibly. We are putting these kids through all the things in the pandemic and then making them test. It bothers him that the process is so hung up on testing. We have tested students for years and we are still showing that we are not doing as well as we should. He stated that kids don't have the resources that they need. He said we don't know how this thing will pan out; wasn't there a policy for hold harmless, grace over grades?

Mr. Robinson said he likes the sampling recommendation and asked for clarification on the subgroup reporting piece.

Dr. Turner asked if we know how many different assessments were approved for districts to give? Mr. Ferguson believes it is 6 or 7. Do you know how many modified assessments to make it a true pre-test? Do you know of all the assessments available to students if they chose the completely virtual option? The preference was that students had to come into the school building, but you can look at that to see if students took assessments remotely or in person, said Mr. Ferguson. Dr. Turner agrees that we need the assessments but the results need to be heavily asterixed.

Rep. Alexander said he just doesn't like testing in the middle of a pandemic.

Ms. Tate said she lives in a high school world. Educators are for accountability and are not opposed to testing and accountability. She is about qualitative data, not just quantitative. These tests take 2 to 3 hours. We have 18 of these tests this year. She is concerned that children are losing 18 times of instructional opportunities. There are stories behind these numbers. Also, we must consider logistics and social distancing.

Rep Collins doesn't agree with recommendation #3; he thinks that this is an even better year to have ratings schools. Mr. Ferguson said there is no way to rate schools this year the way we have done in year's past. Some states are looking at skip year growth. There is so much variation between synchronous and asynchronous virtual learning.

Rep. Collins asked about going out further. We hopefully would be able to do that because we would be able to do growth. He thinks ratings are a little more complex but can still be done.

Sen. Hembree offered a different viewpoint. He typically feels very strongly about honest, clear data. We have asked teachers and administrators to build this airplane while they are flying it. He thinks the little bit of benefit in having ratings this year would be outweighed by the human response in the field.

Rep. Felder stated it reminds her of the spring when we didn't grade students. Students are still working. Our entire state was impacted by a catastrophe. We are talking about something a year down the road, and she believes this is a preliminary discussion at this point. We have spent so much time trying to be open and honest with parents and communities. We must be able to show the difference between having a teacher in the classroom face to face vs the alternative. She thinks districts will find a way to get the kids caught back up.

Ms. Weaver said she thinks it is important to have this discussion now.

Mr. Robinson stated that he thinks we lose credibility as an accountability body if we rate schools without all the data we need. He suggested forwarding the recommendations to the Gen Assembly and let them decide. Sen. Hembree seconded the motion.

Dr. Newsome said staff did a great job on recommendations. It would be difficult to give a rating this year.

Ms. Weaver asked how we are measuring absenteeism in the state? Very important data point to have, and we need to be strategic and purposeful now. Ellen would like to see a suggestion of additional data to be collected.

Dr. Tuner stated that this year is a standalone year in terms of creating a new rating system; this year is so unique.

Ms. Nilges followed up on an earlier question, stating the SCDE is partnering with others to find children who are absent from school. They are being proactive. Not everyone is being counted present, like they were in the spring.

Rep. Collins asked about how we will do ratings next year since growth will be an issue. Mr. Ferguson reminded members that the cyclical review report would come to them in December.

A motion was made to accept the recommendations. The vote was seconded and passed unanimously.

Ms. Weaver recommended the formation of a Nominating Committee to nominate the EOC Chair and Vice Chair. Members will include: Mr. Robinson, Dr. Couch, and Rep. Alexander.

Ms. Weaver also recommended the formation of a Strategic Planning Subcommittee, who will be receiving a Governance Study, which was being conducted by the Education Commission of the States (ECS). The members are as follows: Dr. Bob Couch, Chair; April Allen; Melanie Barton; Rep. Neal Collins; Rep. Raye Felder; Sen. Greg Hembree; Sen. Kevin Johnson; Neil Robinson; and Dr. Scott Turner. Ms. Weaver will serve Ex Officio and Mr. Ferguson will staff.

There being no further business, the meeting adjourned.

South Carolina ranks near the bottom among states in recent ACT results

Trend drops despite fewer students testing the college readiness exam

Columbia, SC - Last week, the results of the ACT® assessment test for the 2020 Graduating Class were released. Unfortunately, South Carolina students' ACT scores fell again. South Carolina ranks near the bottom among the 50 states and the District of Columbia, followed only by Mississippi and Nevada. More concerning, South Carolina is the lowest ranked state in the nation among those who do not test all students. It is also important to note that these students most likely tested before COVID-19 forced the abrupt closures of schools at the end of last school year.

The composite score for South Carolina's 2020 Class of public-school students was 18.1 (out of 36 points), compared to 18.6 in 2019. Also, fewer SC public-school students in 2020 were academically ready for college coursework. In the United States, the percentage of students meeting at least three out of four of the ACT College Readiness Benchmarks in reading, English, science and mathematics remained steady at 37% in 2019 and 2020. In South Carolina, the percentage declined from 24% (2019) to 22% (2020).

Education Oversight Committee (EOC) Executive Director Matthew Ferguson asserts alarm bells should be ringing across the state. "There is no easy solution to these data, but we have to do better than rinse, repeat, and hope for better results," Ferguson stated. He maintains "students need a more rigorous high school curriculum in order to be better prepared. South Carolina's growing economy requires that 60 percent of our working-aged adults will need a college degree or credential."

"These ACT scores emphasize our state has to improve the teaching and learning of reading and mathematics," stated Ferguson. "Over half of SC students want to attend college but for students to be successful in college, it is critical for them to achieve scores that open doors of opportunity and increase access to scholarships and aid. Student success - from cradle to career - must be our collective goal." stated Ferguson.

Among 2020 public school graduates, 76 percent of students took the ACT.

Beginning with school year 2017-18, juniors in SC have the option of taking either the ACT or SAT funded by the State. Fifteen states, including eight in the Southern

Regional Education Board (SREB), require 100 percent of students to take the ACT. The average composite score among SC students is lower than all 15 states testing 100 percent of their students, with the exception of Mississippi, where the average composite score of 2020 graduates was 18.2.

The percentage of SC graduates meeting college benchmarks also dropped from 2019 to 2020 in every subject area, except Science. Only 14 percent of students met all four subject-area benchmarks, compared to 15 percent in 2019. Nationally, 26 percent of students met all four benchmarks. A benchmark score is the minimum score needed on an ACT subject-area test to indicate a 50% chance that the student will obtain a B or higher or about a 75% chance of obtaining a C or higher in the corresponding credit-bearing college course.

Additional results are summarized below with national and state comparisons noted.

- Like the nation, South Carolina has a significant proportion of our students aspiring to attend college. Approximately 66% of all ACT-tested seniors in America aspired to postsecondary education. In South Carolina, 61% of all seniors aspired to postsecondary education in 2020.

Ferguson pointed out the tremendous opportunity we have, as the majority of students aspire to post-secondary education. However, Ferguson pointed to some missed opportunities that can prevent students from achieving at higher levels.

"Students need to be encouraged to take the ACT multiple times if they aspire to attending a two or four-year college or university in our state," stated Ferguson. "Educators, families, policymakers - all of us - need to have higher expectations of students and we need to provide resources and prevent barriers which unintentionally keep students from persisting and achieving."

- There is great reason for concern when looking at the racial and ethnic achievement gaps among SC's 2020 graduates. Only five percent of SC Black/African American students meet the college readiness benchmark in mathematics, compared to 12% nationally. Only six percent of SC Black/African American students met the college readiness benchmark in Science in 2020.

SC's 2020 Graduating Class

Results on 2020 ACT, SAT, and AP Releases and the Achievement Gaps among students of different race/ethnicities

ACT Results

- Of those SC students who graduated from high school in 2020, 34,752 of those students took the ACT, a total that is estimated to be 76% of the graduating class.
- Students taking the test earn a composite score, and each subject area on the test has a corresponding score which if met, means a student has a 50% chance of obtaining a B or higher or a 75% chance of obtaining a C or higher in a corresponding credit-bearing, first-year college course. The average composite score for SC's 2020 Class of public-school students was 18.1 (out of 36 points).
- SC's performance ranks near the bottom among the 50 states and the District of Columbia, followed only by Mississippi and Nevada. More concerning, SC is the lowest ranked state in the nation among those who do not test all students.

100%

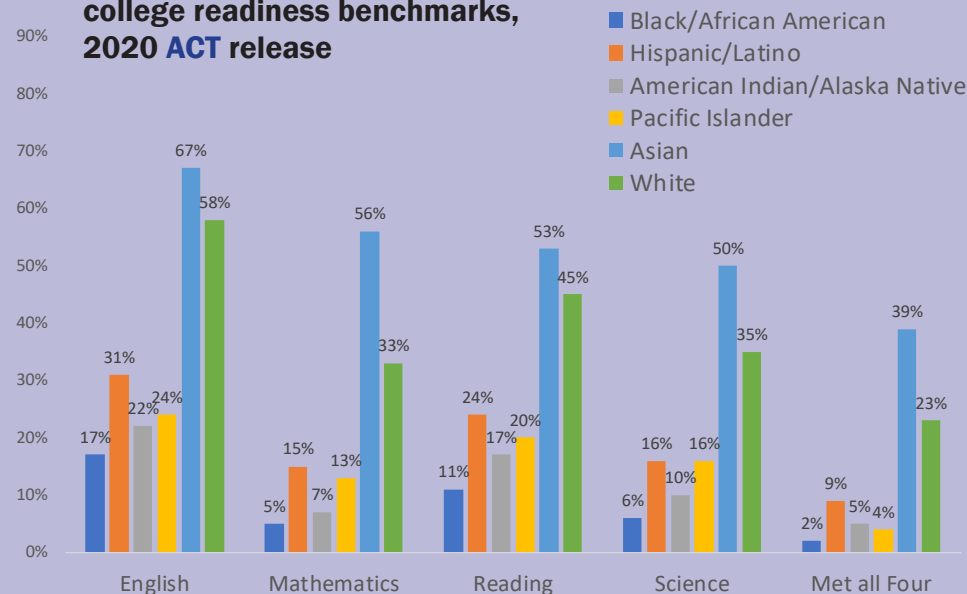

Percent of SC and US Students meeting college readiness benchmarks, 2020 ACT release

ACT College Readiness Results by Race/Ethnicity

There is great reason for concern when looking at the racial and ethnic achievement gaps among SC's 2020 graduates. Only five percent of SC Black/African American students met the college readiness benchmark in mathematics, compared to 12% nationally. Only six percent of SC Black/African American students met the college readiness benchmark in Science in 2020.

Percent of SC Students by Race/Ethnicity meeting college readiness benchmarks, 2020 ACT release

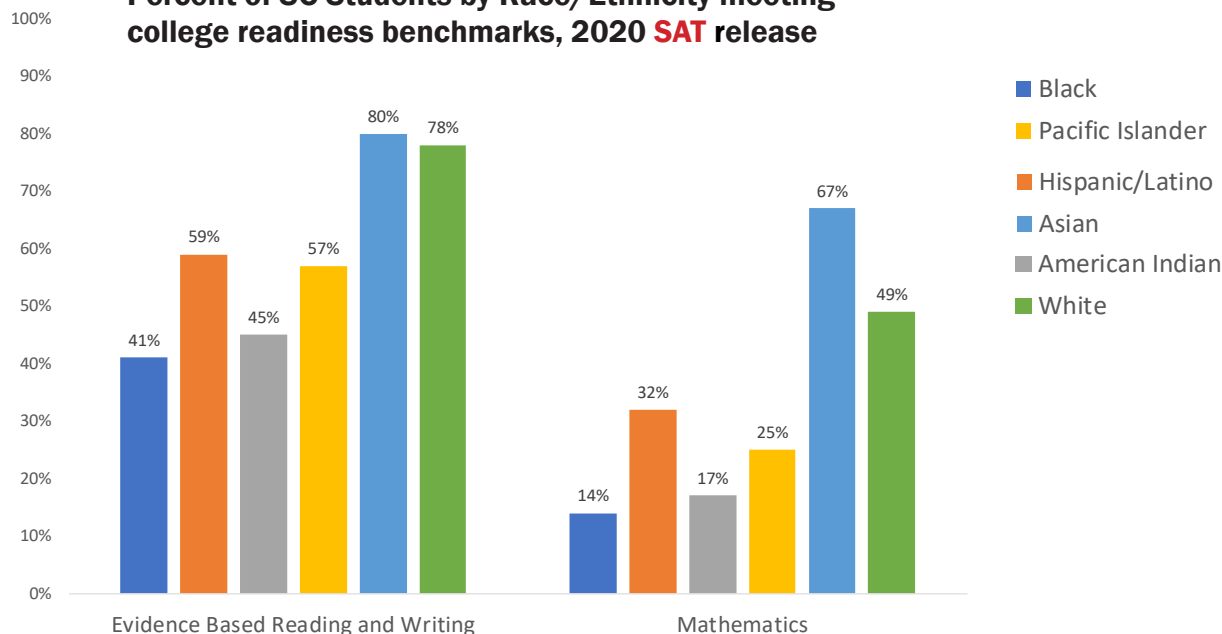

Critical Questions

- In 2020, 66% of SC test takers reported they aspire to attend some sort of postsecondary institution, yet the data suggest many are not prepared. Is the high school curriculum rigorous enough to prepare students?
- Students of color, especially Black and African American students, are struggling to meet college readiness standards on both the ACT and SAT. College preparedness begins in elementary school and continues on until high school. Do these students have access to the challenging courses and curriculum they need to succeed?
- Are we promoting rigorous exposure and engagement in STEM and other challenging coursework for all students all along their education path?

SAT Results

- Of those SC students who graduated from high school in 2020, 27,673 of those students took the SAT, a total that is estimated to be 64% of the graduating class.
- The SAT relies on two main components: Evidence Based Reading and Writing (ERW) and Math. Scores range from 400 to 1600 overall with 200 to 800 coming from ERW and 200 - 800 coming from Math. The Essay section is optional.
- South Carolina's public school students overall mean score was 1019 compared with the national public school mean of 1030. SC's mean ERW score was 519 compared to the national mean of 520. The state's Math average score was 499 while the nation's was 510.
- The College Board has established College and Career Readiness Benchmarks, a set of metrics which if met, are associated with a student having a 75% chance of earning a least a C in a credit-bearing college course. There is a troublesome gap among students, most notably in mathematics.

Percent of SC Students by Race/Ethnicity meeting college readiness benchmarks, 2020 SAT release

Advanced Placement Results

- The College Board administers the SAT and the Advanced Placement (AP) program, which allows students to take college-level courses in high school.
- AP exam scores of 3 indicate a candidate who is qualified to take college-level courses. Scores of 4 indicate someone who is well qualified and a 5 indicates someone who is extremely well qualified. Colleges and universities often grant class credit and use AP scores of 3 or more to place students in higher course levels.
- In 2020, 49,727 AP exams were taken by 30,443 students.
- Of the 49,727 AP exams taken, 30,945 exams or 62% of the total number of exams were scored at 3, 4, or 5.
- A majority of AP test takers in 2020 were White, with Black and Hispanic student participation totaling 20 percent when put together.

Percent of SC Students by Race/Ethnicity taking AP exams in 2020

EDUCATION OVERSIGHT COMMITTEE

SUBCOMMITTEE: Academic Standards and Assessments Subcommittee

DATE: December 15, 2020

ACTION ITEM: English Language Arts (ELA) Standards Cyclical Review

PURPOSE/AUTHORITY

Pursuant to Section 59-18-350(A) of the Education Accountability Act, the Education Oversight Committee (EOC) and the State Board of Education (SBE) are responsible for reviewing South Carolina's standards and assessments to ensure that high expectations for teaching and learning are being maintained.

The State Board of Education, in consultation with the Education Oversight Committee, shall provide for a cyclical review by academic area of the state standards and assessments to ensure that the standards and assessments are maintaining high expectations for learning and teaching. At a minimum, each academic area should be reviewed and updated every seven years. After each academic area is reviewed, a report on the recommended revisions must be presented to the Education Oversight Committee and the State Board of Education for consideration. After approval by the Education Oversight Committee and the State Board of Education, the recommendations may be implemented. However, the previous content standards shall remain in effect until approval has been given by both entities. As a part of the review, a task force of parents, business and industry persons, community leaders, and educators, to include special education teachers, shall examine the standards and assessment system to determine rigor and relevancy.

CRITICAL FACTS

The standards review process emphasized the application of the criteria addressing comprehensiveness / balance, rigor, measurability, manageability, and organization/ communication. A national review panel was conducted, as well a state panel review. The recommendations will be forwarded to the SC Department of Education and the writing team.

TIMELINE/REVIEW PROCESS

National review of ELA standards: May-September 2020

State review: September-October 2020

ECONOMIC IMPACT FOR EOC

Cost: No fiscal impact beyond current appropriations.

Cyclical Review of State
Academic Standards

**SC EDUCATION
OVERSIGHT COMMITTEE**

PO Box 11867 | 227 Blatt Building | Columbia SC 29211 | WWW.SCEOC.ORG

INTRODUCTION

The South Carolina Education Accountability Act of 1998 establishes an accountability system for public education that focuses on improving teaching and learning so that students are equipped with a strong foundation in the four primary academic disciplines and a strong belief in lifelong learning. Academic standards are used to focus schools and districts toward higher performance by aligning the state assessment to those standards. The implementation of quality standards in classrooms across South Carolina is dependent upon systematic review of adopted standards, focused teacher development, strong instructional practices, and a high level of student engagement. Pursuant to Section 59-18-350(A) of the Education Accountability Act, the Education Oversight Committee (EOC) and the State Board of Education (SBE) are responsible for reviewing South Carolina's standards and assessments to ensure that high expectations for teaching and learning are being maintained.

The State Board of Education, in consultation with the Education Oversight Committee, shall provide for a cyclical review by academic area of the state standards and assessments to ensure that the standards and assessments are maintaining high expectations for learning and teaching. At a minimum, each academic area should be reviewed and updated every seven years. After each academic area is reviewed, a report on the recommended revisions must be presented to the Education Oversight Committee and the State Board of Education for consideration. After approval by the Education Oversight Committee and the State Board of Education, the recommendations may be implemented. However, the previous content standards shall remain in effect until approval has been given by both entities. As a part of the review, a task force of parents, business and industry persons, community leaders, and educators, to include special education teachers, shall examine the standards and assessment system to determine rigor and relevancy.

In October 2020, the EOC completed the cyclical review of the 2015 South Carolina College- and Career-Ready Standards for English Language Arts (ELA), which were adopted in March 2015. This document provides recommendations for modifications to these standards from the EOC. The recommendations were compiled under the advisement of two review teams: a national review team of educators who have worked with national or other state organizations and a state committee composed of parents, business/community representatives, English language arts educators, and teachers of English Learners and exceptional education students. The state team was composed of individuals from various geographical areas in South Carolina.

It is important to note that the state adopted 2015 South Carolina College and Career-Ready Standards for English Language Arts represent the work of many educators, and that this review of the standards was undertaken to identify ways in which their work could be strengthened and supported. The EOC expresses its appreciation to those educators and commends their utilization of national source documents and their belief in the achievement of all students. The EOC intends to enhance the work of school level educators and, ultimately, to ensure that all students are provided the opportunity to experience the breath and depth of the discipline.

I. CYCLICAL REVIEW PROCESS

The review of the 2015 South Carolina College- and Career-Ready Standards for English Language Arts began with a focus on the accomplishment of goals articulated in the Education Accountability Act (EAA) of 1998. The law, as amended in 2008, specifies: "The standards must be reflective of the highest level of academic skills with rigor necessary to improve the curriculum and instruction in South Carolina's schools so that students are encouraged to learn at unprecedented levels and must be reflective of the highest level of academic skills at each grade level." (Article 3, 59-18-300)

The Standard Operating Procedures for the Review of Standards (SOP) agreed upon by the State Department of Education (SDE) and the EOC during the summer 2003 were followed for this review. A timeline established during the spring of 2020 outlined the timeframe in which the required review teams were to review the standards adopted in 2015 by the end of the year 2020. The SOP also outlines the steps to be taken to revise the current standards should the completion of the reviews indicate that revision is needed.

The recommendations for revisions to the 2015 South Carolina College and Career-Ready Standards for English Language Arts, as approved by the EOC, will be submitted to the South Carolina Department of Education (SDE) for consideration in any proposed revisions of the standards.

A. CRITERIA DESCRIPTIONS

The standards review process emphasized the application of the criteria addressing comprehensiveness/balance, rigor, measurability, manageability, and organization/communication. SDE representatives, district and university curriculum leaders, and EOC staff collaborated to identify the standards review criteria in 2003. Decisions on the criteria to be used were based on a comprehensive review of professional literature, and the goals for the standards review as specified in the Education Accountability Act of 1998. The identified criteria were each applied through the two review panels: (1) leaders in the discipline and/or cognitive processes drawn from across the nation and (2) English language arts educators; special education and English language learners educators from South Carolina's education community; and parents; business representatives; and community leaders.

The criteria are:

CRITERION ONE: COMPREHENSIVENESS/BALANCE

The criterion category for Comprehensiveness/Balance is an evaluation of how helpful the 2015 South Carolina College and Career-Ready Standards for ELA are to educators in designing a coherent curriculum. The criterion is directed at finding evidence that the standards document clearly communicates what constitutes ELA content, that is, what all students should know and be able to do in ELA by the time they graduate. The criterion includes consideration of the following areas:

- The standards address essential content and skills of ELA;
- The standards are aligned across grades as appropriate for content and skills;
- The standards have an appropriate balance of the content and skills needed for mastery of each area in ELA; and
- The standards reflect diversity (especially for ethnicity and gender) as appropriate for the subject area.

CRITERION TWO: RIGOR

This criterion calls for standards that require students to use thinking and problem-solving skills that go beyond knowledge and comprehension. Standards meeting this criterion require students to perform at both national and international benchmark levels.

- Standards should focus on cognitive content and skills (not affect);
- Standards should be developmentally appropriate for the grade level;
- Standards should include a sufficient number of standards that require application of learning (application, analysis, synthesis, and evaluation);
- Standards should be informed by the content and skills in national and international standards; and,
- Standards should be written at a level of specificity that would best inform instruction for each grade level.

CRITERION THREE: MEASURABILITY

Knowledge and skills presented in the standards are assessable for school, district and state accountability. The primary element of measurability is:

- The content and skills presented in the standards should be assessable (are observable and demonstrable).

CRITERION FOUR: MANAGEABILITY

This criterion applies to instructional feasibility, that is, whether the complete set of ELA standards at a particular grade level can reasonably be taught and learned in the class time allotted during one year. The primary element of manageability is:

- The number and scope of the standards for each grade level should be realistic for teaching, learning, and student mastery within the academic year.

CRITERION FIVE: ORGANIZATION/COMMUNICATION

The Organization/Communication criterion category stipulates that the expectations for students are to be clearly written and organized in a manner understandable to all audiences and by teachers, curriculum developers, and assessment writers. Organization includes the following components:

- The content and skills in the standards should be organized in a way that is easy for teachers to understand and follow;
- The format and wording should be consistent across grades;
- The expectations for student learning should be clearly and precisely stated for each grade; and,

- The standards should use the appropriate terminology of the field but be as jargon free as possible.

B. PANEL MEMBERSHIP

The EOC’s cyclical review of the 2015 South Carolina College- and Career-Ready Standards for English Language Arts was conducted from May 2020 to October 2020. The national review was conducted from May to September 2020. The state review was conducted in September and October 2020.

The national review team members consisted of recognized leaders in education that have participated in the review/development/writing of national and state standards and/or development of cognitive processes. Materials shared as part of the national review included NCTE/IRA Standards for English Language Arts¹, A Revision of Bloom’s Taxonomy of Educational Objectives², Profile of the South Carolina Graduate³, and the South Carolina Fordham Report⁴ with the corresponding response from the South Carolina Department of Education⁵. Members of the team received the materials for the review in early May and continued their review process through September. After an independent review period, the members of the panel participated in a telephone conference call in August, which produced a set of findings listed later in this document. Members of the national review panel included:

- Dr. Lorin Anderson, Carolina Distinguished Professor Emeritus, University of South Carolina
- Dr. Barbara Foorman, Francis Eppes Professor of Education, Florida State University
- Dr. Jacqueline Malloy, Associate Professor, Clemson University
- Dr. Timothy Shanahan, Distinguished Professor Emeritus, University of Illinois
- Dr. Dywanna Smith, Assistant Professor Education, Claflin University

For the state panel review, the EOC contacted all school district superintendents and instructional leaders in the state as well as the members of S.C. Senate Education and House Education Committees. The EOC and SBE members were also invited to make for nominations for the state review panel. Approximately 115 names were provided to the EOC. The state review panel consisted of 24 individuals representing educators, teachers of English Language learners and exceptional education students, parents, and representatives of business/community. Also, in attendance, as observers, were representatives from the SDE Division of Standards and Learning. The state panel conducted its review virtually via Zoom.

The panel members worked over three days to compose individual responses to the standards review and then develop consensus as a group on a set of findings listed later in this document. This process was conducted by having individuals placed in one of three teams each reviewing

standards from either elementary, middle or high school. The panel used as reference materials A Revision of Bloom's Taxonomy of Educational Objectives⁶, Profile of the South Carolina Graduate⁷, and the South Carolina Fordham Report⁸ with the corresponding response from the South Carolina Department of Education⁹. The state panel reviews were conducted September 21, 28 and October 19, 2020 and were facilitated by Rainey Knight, EOC. The task force reached consensus on insights and specific recommendations about the 2015 South Carolina College- and Career-Ready Standards for English Language Arts.

Members of the task force included:

Addy Aranda, teacher, Fort Mill
Melody Bradley, principal, Blacksville
Alicia Williams, teacher, Charleston
Dr. Amy Condon, teacher, Pawleys Island
Kimberly Gibbs, community, Greenville
Carley Hansman, teacher, Chesnee
Amanda Hayes, spec. education, Dillon
Tom Henz, business, Hilton Head
Alejandra Hursey, ELL, Lake View
Annia Knight, community, Columbia
Nicole Kosinski, business, Sumter
Staci Miller, spec. education, Pamplico
Lessa Owens, business, Greenville
Janie Neeley, parent, Columbia
Cassandra Poole, spec. education, Darlington
Latrece Quattleman, teacher, Graniteville
Kimberly Robson, teacher, Easley
Yamekia Robinson, parent, Lake City
Kelly Scott, parent, Rock Hill
Angela Spearman, teacher, Easley
Sarah Tew, spec. education, Hartsville
Elizabeth Thompson, teacher, Hartsville
Kristina Turner, teacher, Anderson
Dr. Connie Williams, higher education, Folly Beach

C. THE STANDARDS DOCUMENT

The 2015 South Carolina College- and Career-Ready Standards for English Language Arts is organized by grade levels for grades kindergarten through twelfth grade to include standards and indicators in five strands:

- Inquiry-based Literacy
- Communication
- Reading Literary Texts
- Reading Informational Texts

⁶ Ibid., 4.

⁷ Ibid., 4.

⁸ Ibid., 4.

⁹ Ibid., 4.

- Writing

Each strand consists of standards, which contain the same language for kindergarten through high school. The standards represent the culminating outcomes that describe what students should know and be able to do when they leave our public school system; therefore, the language included in each standard is the same for kindergarten through English 4. The grade level or course specificity is provided by the indicators, which provide specific direction and outcomes for each grade level.

An example of a third, fourth and fifth grade level Reading Literary Text standard with supporting indicators contained in the table is shown below.

Meaning and Context

Standard 5: Determine meaning and develop logical interpretations by making predictions, inferring, drawing conclusions, analyzing, synthesizing, providing evidence, and investigating multiple interpretations.

GRADE THREE	GRADE FOUR	GRADE FIVE
5.1 Ask and answer literal and inferential questions to determine meaning; refer explicitly to the text to support inferences and conclusions.	5.1 Ask and answer inferential questions to analyze meaning beyond the text; refer to details and examples within a text to support inferences and conclusions.	5.1 Quote accurately to analyze the meaning of and beyond the text to support inferences and conclusions.

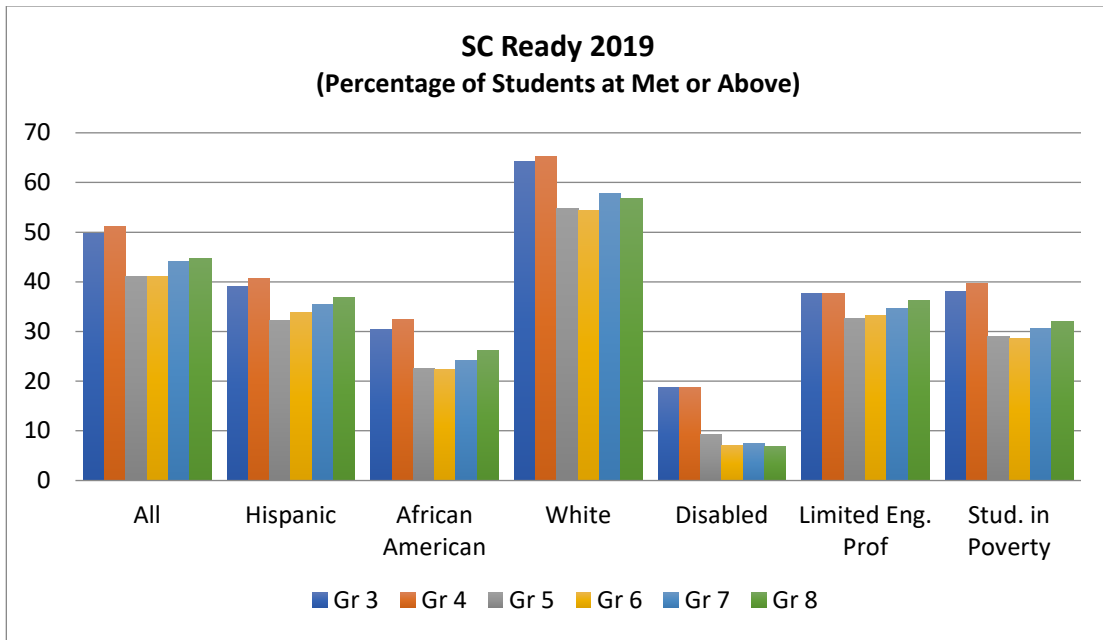

The complete set of 2015 South Carolina College- and Career-Ready Standards for English Language Arts can be found at the link below.

<https://ed.sc.gov/scdoe/assets/file/programs-services/59/documents/ELA2015SCCCRStandards.pdf>

II: Student Performance in ELA

The 2015 South Carolina College- and Career-Ready Standards for ELA were adapted using national frameworks for ELA and followed a similar process to what is outlined in the SOP. Since the standards provide the foundation for the assessment of student learning which occurs following the teaching of the standards a thorough review should include an evaluation of student performance. Unfortunately, too few students in South Carolina have reached the grade level expectations in ELA. The following charts document the percentage of students scoring Met or Above on the SC Ready assessment for grades 3-8 and those scoring a “C” or better on the End of Course test in English 1 for all students and by subgroups.

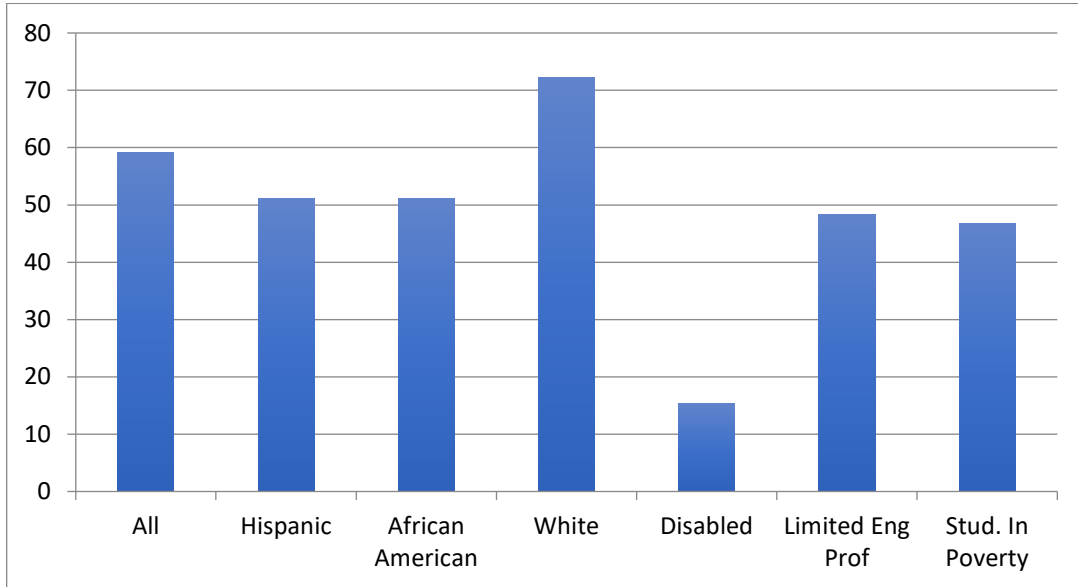

Chart 1

Source: South Carolina Department of Education, <https://ed.sc.gov/data/test-scores/state-assessments/sc-ready/>

Chart 2

End of Course English I
(Percentage of Students with a grade of C or Better)

Source: South Carolina Department of Education, <https://ed.sc.gov/data/test-scores/state-assessments/end-of-course-examination-program-eocep/2019/>

Note: "A": The student **exceeds the expectations** of the course content standards
"B" and "C": The student **meets the expectations** of the course content standards
"D": The student **minimally meets the expectations** of the course content standards
"F": The student **does not meet the expectations** of the course content standards
Performance Level Descriptors for Algebra I and English I adopted following the Revised SC Uniform Grading Scale (2016)

Of particular concern is the percentage of students in the Does Not Meet category, the lowest level on SC Ready. In all grade levels, the percentages have increased compared to the first year of administration of SC Ready in 2016 indicating more students are scoring at the lowest level of the state assessment in ELA. For example for grade 3, the percentage of students in the Does Not Meet category was 22.2 as compared to the percentage in 2019 of 25.5. Similar increases are found in all grade levels. See the table below.

Table 1
Percentage of Students Scoring Does Not Meet on ELA SC Ready

Percentage of Students Scoring Does Not Meet, ELA SC Ready (2016-2019)				
	2016	2017	2018	2019
3rd grade	22.2	26.1	23.3	25.5
4th grade	24.2	29.5	28.2	27.8
5th grade	23.9	28.0	27.5	28.2
6th grade	20.4	23.7	25.5	26.1
7th grade	23.2	28.4	28.0	27.0
8th grade	22.4	28.0	29.1	27.2

Source: South Carolina Department of Education, <https://ed.sc.gov/data/test-scores/state-assessments/sc-ready/>

The lack of improvement is especially troublesome given the investment the State has made in measures to address student performance in Reading and ELA. In 2014, the General Assembly enacted Act 284 South Carolina Read to Succeed. Read to Succeed is meant to serve as support for the teaching of reading for teachers and students in all grades, but especially in kindergarten through grade 3. Read to Succeed was created to address literacy performance in South Carolina and put in place a comprehensive system of support to ensure SC students graduate on time with literacy skills they need to be successful in college, careers and citizenship. Act 284 provides for a strong assessment system and intervention system for students kindergarten through twelfth grade with a goal of all students becoming proficient readers by the end of third grade.

Many components of Read to Succeed have been implemented. An illustrative list is as follows:

- a focus on early childhood with an expansion of 4K classes for at-risk students;
- webinars for teachers to improve skill sets in the teaching of reading;
- face to face professional development to improve skill sets in the teaching of reading;
- state level literacy coaches to support and provide technical assistance to districts/schools;
- reading coaches for schools to provide support and assistance to teachers in schools;
- creation of early learning and literacy at department of education;
- summer reading camps to support students at risk for reading on grade level;
- Read to Succeed courses for pre-service teachers to develop skills sets in the teaching of reading;
- Read to Succeed teacher literacy endorsement for teachers to better prepare themselves to teach reading;
- district and school reading plans to focus on strategic plans for the teaching of reading;
- interventions for struggling readers;
- regular assessments to identify struggling readers;
- third grade retention;

- high quality reading instruction informed by data; and
- support for parents to assist their children in learning to read

III. ISSUE WITH THE STANDARDS PRIOR TO THE REVIEW

An evaluation of our our current standards was detailed in a report by the Fordham Institute in August 2018, which evaluated the ELA standards of 14 states of which Fordham had determined had made the most substantive changes to the Common Core Standards. The report evaluated the South Carolina 2015 College and Career Ready Standards and gave them an overall rating of *Weak*, citing a number of specific recommendations that should be considered. The national and state panels also expressed many of the concerns expressed by the Fordham Institute. The specific recommendations by Fordham and the South Carolina Department of Education responses are listed in Table 4.

Table 2

Fordham Report Recommendations¹⁰ August, 2018	SC Department of Education Responses¹¹ August, 2019
1. Identify and revise standards that remain unchanged for 2 or more years to more clearly articulate how learning progresses from one grade level to the next	1. K-Eng 4 standards have been identified to inform upcoming revisions for ELA standards
2. Establish text complexity requirements that specify particular text complexity levels that students should be able to read at the various grade levels	2. A text complexity process is developed with feedback from the field. The process was used to create text sets found in upcoming new K-Eng 4 units. The process will be posted with the units.
3. Revise inquiry-based literacy standards into requirements that can be taught and measured. Eliminate standards that are only process-oriented.	3. An inquiry framework is posted under ELA resources
4. Develop discipline-specific literacy standards for grades 6-12 to communicate expectations for use outside of the English classroom	4. A Literacy in Content Area resource created and posted under ELA resources
5. Designate specific literary and informational texts at all grade levels with which students should be familiar (or at minimum, provide exemplar texts for teacher consideration).	5. Text sets are created and embedded in the upcoming K-English 2 units

¹⁰ Ibid., 4.

¹¹ Ibid.4

Fordham Report Recommendations¹⁰ August, 2018	SC Department of Education Responses¹¹ August, 2019
6. Complete the supporting documents that were promised in 2015. DOK, disciplinary literacy, foundational skills, as well as a glossary.	6. A DOK, foundational skills, and glossary documents created and posted on web under ELA resources

IV: FINDINGS

The discussion below summarizes reviews of national and state panels.

A: COMMENDATIONS

1. Overall, the reviewers noted standards address essential content and skills of English language arts.
2. There is an attempt to focus on diversity using terms such as multiple perspectives and alternative views.
3. The majority of standards require students to demonstrate learning at higher levels of Revised Bloom’s taxonomy.
4. The standards appear to be of consistent style and formatting.

B: FINDINGS OF THE NATIONAL REVIEW TEAM

1. The Principles of Reading standards and indicators are weak. The standards are too general and do not provide enough specificity for teachers. The K-2 reading standards are not rigorous enough to meet national and international standards. In addition, the K-2 reading standards are not precise enough to provide expectations for student learning. An appendix should be provided with specific expectations for student learning to include outlining expectations for phonics and word analysis skills that need to be mastered at each grade level.
2. The standards and indicators, by grade level, do not define the expectations for text complexity and thus, many of the standards are difficult to measure without specification for text demands. Include grade specific benchmarks for determining text complexity, such as Lexile range, as well as exemplar texts in an appendix that are consistent with the demand and expectations for a particular grade level.
3. There is a great deal of repetition among standards and indicators with meaningless distinctions from grade level to grade level. What should students learn? Are there no changes in learning expectations? Learning progressions would be helpful to teachers and a vertical alignment is needed to provide teachers a clear understanding of their role in building on prior student learning and preparing students for future learning.

4. Many standards and indicators include terms that are difficult to measure such as “explore topics of interest” and “broaden thinking”.
5. Many of the standards are activities for students and process or curricular directives for teachers such as daily explorations of texts, engage in opportunities to play, and engage in whole or small group instruction. These standards are not written as to describe the outcomes of students learning.
6. The number of standards is too many for teachers to teach in a school year. Consider a reorganization of the standards such as:
 - change the name of one strand: Inquiry to Research.
 - add another strand called Fundamentals of Reading to be comprised of first five standards of Reading for Information and Reading Literary Texts, combine standard 10 in Reading Literary with standard 11 in Reading Information, and combine standard 13 in Reading Information with standard 12 in Reading Literary Texts. The Fundamentals of Reading strand would be made up of seven (7) standards. This will minimize the repetition that currently exists.
 - then combine remaining standards from Reading Information and Reading Literary into new strand Reading Applications into six (6) standards. For these remaining standards, reduce the overlap and combine.

This reorganization would leave five (5) standards strands: Research, Communication, Writing, Fundamentals of Readings, and Reading Applications with a reduction in the number of standards from 41 to 29.

7. Many standards and indicators are written with multiple verbs. It is difficult to separate the activities from the objectives for student learning. Standards and indicators become lengthy and should be evaluated for clarity and readability. Often it is difficult to tell what the objective is. For example, “Retell the central idea and identify key details to summarize a text heard, read or viewed.” Objective is to “summarize a text, heard, read or viewed, by retelling the central idea and identifying key details.” Often it is difficult to determine what the objective is. For example, “Ask and answer questions about known and unknown words.” or “Reading independently for a sustained period of time.”
8. The element of diversity attempts to be part of the standards, however, there needs to be more specific references to diversity of perspectives around gender, race and ethnicity.

C. FINDINGS FORM THE STATE LEVEL REVIEW TEAM

1. Revisions to the ELA standards should include a review of the repetitiveness of the standards.
2. The standards and indicators should be clear as to the action word being targeted. Teachers should have no doubt as to what should be taught or what students should be able to do as a result.
3. The standards and indicators need to be refined so that they are manageable and measurable in a year long course.
4. Revisions to the ELA standards should include combining or clearly linking the standards and support documents so that teachers have one document for planning and assessments.
5. Any revision process should include a focus on creating robust support documents to include the following recommendations:
 - a) Provide examples or guidance in regard to how a particular standard or indicator might be assessed at grade level.
 - b) Provide guidance on text complexity and text selection to ensure rigor at each grade level such as selected readings (i.e., suggested readings, not a mandated list). Include grade specific benchmarks for determining text complexity, such as Lexile range, as well as exemplary texts.
 - c) Explicitly define terms used in the standards. Many of the terms are vague or used interchangeably or imprecisely in the field. Creating a set of shared South Carolina definitions would ensure that educators are talking about the same concept such as disciplinary tool and concepts, use of compare vs. contrast, and use of analyze and evaluate.
 - d) Outline expectations for phonics and word analysis skills that need to be mastered at each grade level.
 - e) Create units and examples of how to teach the standards for middle and high school teachers, similar to those that have been created for earlier grades.
 - f) Consider providing guidance for differentiation to English language learners, honors and special education students.
 - g) Provide professional development for teachers to include the use of videos explaining how to navigate the standards and support documents.

V. EOC RECOMMENDATIONS

The recommendations that are listed below are based on the detailed review of the 2015 South Carolina College- and Career-Ready Standards for English Language Arts and are supported by the evidence and detailed comments that appear in the national and state panel findings included in this report.

1. The standards and indicators, by grade level, do not define the expectations for text complexity and thus, many of the standards are difficult to measure without specification for text demands. Include grade specific benchmarks for determining text complexity, such as Lexile range, as well as exemplar texts in an appendix that are consistent with the demand and expectations for a particular grade level.
2. The number of standards is too many for teachers to teach in a school year. Consider a reorganization of the standards such as:
 - change the name of one strand: Inquiry to Research.
 - add another strand called Fundamentals of Reading to be comprised of first five standards of Reading for Information and Reading Literary Texts, combine standard 10 in Reading Literary with standard 11 in Reading Information, and combine standard 13 in Reading Information with standard 12 in Reading Literary Texts. The Fundamentals of Reading strand would be made up of 7 standards. This will minimize the repetition that currently exists.
 - then combine remaining standards from Reading Information and Reading Literary into new strand Reading Applications into six (6) standards. For these remaining standards, reduce the overlap and combine.

This reorganization would leave five (5) standards strands: Research, Communication, Writing, Fundamentals of Readings, and Reading Applications with a reduction in the number of standards from 41 to 29.

3. The Principles of Reading standards are weak. The standards are too general and do not provide enough specificity for teachers. The K-2 reading standards are not rigorous enough to meet national and international standards. In addition, the K-2 reading standards are not precise enough to provide expectations for student learning. An appendix should be provided with specific expectations for student learning to include outlining expectations for phonics and word analysis skills that need to be mastered at each grade level.
4. There is a great deal of repetition among standards with meaningless distinctions from grade level to grade level. What should students learn? Are there no changes in learning expectations? Learning progressions would be helpful to teachers and a vertical alignment is needed to provide teachers a clear understanding of their role in building on prior student learning and preparing students for future learning.
5. Revisions should consider providing guidance for differentiation to English language learners, honors and special education students.
6. Units and examples of how to teach the standards should be created for middle and high school teachers, similar to those that have been created for earlier grade levels.

7. The element of diversity attempts to be part of the standards, however, there needs to be more specific references to perspectives around gender, race and ethnicity.
8. Many standards and indicators are written with multiple verbs. It is difficult to separate the activities from the objectives for student learning. Standards and indicators become lengthy and should be more consider for clarity and readability. Often it is difficult to tell what the objective is. For example, “Retell the central idea and identify key details to summarize a text heard, read or viewed.” Objective is to “summarize a text, heard, read or viewed, by retelling the central idea and identifying key details.”
9. A copyeditor should be used to ensure the standards document is clear, concise and consistent for teacher-readability as well for the expectations for student learning.

The SC Education Oversight Committee is an independent, non-partisan group made up of 18 educators, business persons, and elected leaders. Created in 1998, the committee is dedicated to reporting facts, measuring change, and promoting progress within South Carolina's education system.

ADDITIONAL INFORMATION

If you have questions, please contact the Education Oversight Committee (EOC) staff for additional information. The phone number is 803.734.6148. Also, please visit the EOC website at www.eoc.sc.gov for additional resources.

The Education Oversight Committee does not discriminate on the basis of race, color, national origin, religion, sex, or handicap in its practices relating to employment or establishment and administration of its programs and initiatives. Inquiries regarding employment, programs and initiatives of the Committee should be directed to the Executive Director 803.734.6148.

EIA and EAA Budget and Proviso Requests for FY 2021-22

**Presented to EOC
Recommendations by EIA Subcommittee
December 15, 2020**

Section 59-6-10 of the Education Accountability Act requires the Education Oversight Committee (EOC) to “review and monitor the implementation and evaluation of the Education Accountability Act and the Education Improvement Act programs and funding” and to “make programmatic and funding recommendations to the General Assembly.” To meet this statutory requirement, the EOC required each EIA-funded program or entity to submit a program and budget report detailing the objectives and outcomes of each program for Fiscal Years 2019-20 and 2020-21 and including any additional requests for Fiscal Year 2021-22.

Additional EIA requests for **Fiscal Year 2021-22** total \$108,391,594.

On November 10, 2020, the Board of Economic Advisors (BEA) issued updated revenue projections for FY 2020-21. The BEA identified a \$17.3 million increase in EIA funds for FY 2020-21. As compared to Pre-COVID projections, EIA growth was reduced by over \$50 million. See Table 1.

Table 1

Pre-COVID Fiscal Year 2020-21	
EIA Projection pre-COVID	\$930,272,000
EIA Recurring Base 2019-20	\$860,735,000
Pre-Covid EIA Projected Surplus (Non-recurring)	\$69,538,000
Projected Fiscal Year 2020-21 As of November, 2020	
EIA Projection	\$878,023,000
EIA Recurring Base 2019-20*	\$860,735,000
Projected EIA Surplus (Non-recurring)	\$17,288,000

The BEA also issued new estimates on November 10, 2020 for 2021-22 for projected estimates for EIA funds. See Table 2.

Table 2

EIA Estimate 2021-22 November 2020	
EIA Estimate (November 10, 2020)	\$ 905,400,000
EIA Base Appropriation 2019-20*	\$860,735,000
Projected EIA Projected Funds (Recurring)	\$44,665,000

Note *: Assumes continuing resolution remains in effect for 2020-21.

Based on the November BEA estimate, there is a projected surplus of \$17,288,000 in EIA funds (non-recurring) for 2020-21 and \$44,665,000 in EIA Projected Funds (recurring) for 2021-22. The new requests for EIA total \$108 million.

The EIA and Improvement Mechanism Subcommittee met on the following dates:

- October 26, 2020: Held public hearing for all entities funded by or requesting EIA revenues
- November 16, 2020: Held public hearing for all entities funded by or requesting new EIA revenues and convened to discuss EIA budget priorities. Subcommittee requested EOC staff to compile priorities of EIA budget from the discussion and present recommendation for consideration at the December 7, 2020 meeting.
- December 7, 2020: Held meeting, via Zoom, to review and discuss EIA recommendations. Recommendations were approved by the EIA Subcommittee as presented.

Issues with EIA Funding

1. Charter School Funding:

Beginning in Fiscal Year 2011-12, EIA funds were appropriated for charter schools. The first appropriation, \$343,146, was for the operations of the South Carolina Public Charter School District. In Fiscal Year 2012-13, the appropriation was \$30,343,146, which included \$1,700 per weighted pupil for students in virtual charter schools and \$3,250 per weighted pupil for students in brick and mortar schools.¹

Over time, the EIA line item has increased as more charter schools open and more students enroll. In recent years, the increase in student enrollment in charter schools is reducing the amount of any new revenue in EIA funding available for any new project/programs.

With the continuous increase in the number of charter school students, funding charter schools from EIA funds is creating a dilemma. For example in FY 2021-22, the charter school cost to fund both the full amount for increased student growth and the requested per pupil increase would be \$57 million. In order to fully fund student enrollment increases only, the cost would be \$45 million. The current estimate for growth in FY 2021-22 EIA funds is only \$44.6 million.

How South Carolina funds charter schools, for the per pupil local share, is at a point that a new method should be considered. Options include:

- Instead of funding charter schools at the 135 day membership report, capture actual students enrolled at the 45 day membership report to get an accurate picture of the year's enrollment
- Allow home district's local share to follow the student thereby eliminating the need for the per pupil share in EIA
- Look at funding local per pupil share from other sources in the general fund revenues.

2. Review of EIA Funding Procedures

Dealing with the educational impact of COVID-19 will require a strategic deployment of all education resources around a set of clearly defined goals and outcomes. While funding many commendable programs, EIA funding has become disjointed and must be refocused around a high-level strategic plan designed to support students and educators with the greatest efficiency and measurable impact. Accordingly, the EOC will collaborate with key stakeholders to develop and articulate strategic goals and

¹ Proviso 1.74 of the Fiscal Year 2012-13 General Appropriation Act.

review and make recommendations to revise current application and reporting procedures as necessary. The goal is to align all EIA spending to address strategic, system-level needs. Currently funded programs will be advised of any changes to the process and invited to reapply for funding if they determine their program aligns within the articulated EIA Strategic Deployment Plan.

3. Re-evaluate the K-12 Funding Formula for South Carolina

Given the need to address options for funding the growth of charter schools, it is equally important to include in the evaluation the method to fund all public schools across South Carolina (charter and non-charter). The recent Education Funding Model created by the Office of Revenue and Fiscal Affairs in 2019 could be a starting point for this process. (Note this model did not address charter schools in its analysis and charter schools would need to be included in future analyses.)

Recommendations for EIA Funding

I. EIA Surplus FY 2021-22

For the current fiscal year, the EIA surplus of non-recurring dollars is expected to be \$17,288,000.

Recommendation 1: Instructional Materials **\$15,788,000**

With the request from the South Carolina Department of Education for additional funds for instructional materials and to ensure instructional materials for schools and teachers are up-to-date and aligned with newly revised academic standards, a recommendation is made to utilize \$15,788,000 of the nonrecurring funds for instructional materials with a priority for instructional materials that are evidence-based in grades K-12 English language arts, grades 9-12 mathematics and K-12 social studies. The academic standards for these subjects were adopted in 2015 and 2019, respectively, and these materials on the list have older copyright dates.

Recommendation 2: Artificial Intelligence **\$1,500,000**

There is no artificial intelligence curriculum in South Carolina as a pathway in career and technical education (CTE). Given the ever-growing need for trained individuals in this industry, a recommendation is made to develop, pilot and implement a high school curriculum for high school students in the CTE program. Southern Regional Education Board (SREB) has expressed an interest in working with South Carolina to develop the first integrated curriculum to include lesson plans, assessments, teacher training and equipment. Sites in South Carolina would be identified to implement the pilot during the pilot period. The final product would be a 2-3 year long program for

high school students and is intended to be an additional career completer pathway. The estimated cost for the development of the curriculum, teacher training and pilot is 1.5 million. The request is for one-time funds with a provision for carry over to complete the project.

II. EIA Projected Growth FY 2020-21

All programs funded for 2020-21 are recommended for funding at current levels.

With EIA additional requests totaling \$108 million and available EIA recurring growth funding estimate of \$44,665,000, the Subcommittee prioritized funding into three categories: (1) College and Career Ready, (2) Teacher Recruitment and Retention and (3) Evaluation of Alignment of EIA Programs with Strategic Goals/Expected Outcomes.

Priority 1: College and Career Ready

Recommendation 3: Post-secondary Enrollment and Success (E500) \$56,000

According to the Every Student Succeeds Act (ESSA) plan submitted in 2017 by the South Carolina Department of Education, the state has set goals related to high school post secondary enrollment in credit bearing courses and percentage of South Carolinians with a post-secondary degree. See attachment A. In order for states to keep pace with the demands of a more advanced workforce, the Lumina Foundation recommends at least 65% of the individuals should have a post-secondary education/credential by 2020.²

Currently, South Carolina uses the College Freshman Report as a means to capture post-secondary enrollment. The report does not have the means to accurately collect all high school graduates progress for in-state and out-of-state post-secondary institutions. The College Freshman Report is outlined below.

Section 59-101-130 of the SC Code of Laws requires high schools to submit:

- The number of high school graduates that entered the freshman class, either in or out of state, for whom the first semester report has been received
- A breakdown of all courses passed
- And a breakdown of all courses failed.

Institutions of higher learning in South Carolina submit a report to high schools based on the first semester accomplishments of each freshman.

This information is populated on the school's state report card.

² <https://www.luminafoundation.org/facts-and-figures>

The process outlined above is labor intensive and often does not accurately reflect the high school graduates who enroll in all post-secondary institutions across the nation. In addition, the matriculation of students in an institution, student transfers, and student completion data is not obtained.

The Subcommittee is recommending securing the services of the National Student Clearinghouse for the purpose of providing a clear and accurate picture of every South Carolina high school graduate's enrollment and success in a two/four-year colleges/universities/technical colleges/community colleges (in-state and out-of-state). The National Student Clearinghouse follows the path of students from post-secondary enrollment to graduation. The National Student Clearinghouse meets FERPA (Family Educational Rights and Privacy Act) compliance. The data, already available at the national level, could be further disaggregated at the state, district and school levels. For an example of a state level document, see attachment B.

The Office of Revenue and Fiscal Affairs would receive the funds appropriated for these services and serve as the intermediary agency between the South Carolina Department of Education (SCDE) and National Student Clearinghouse.

The implementation of the National Students Clearinghouse would reduce the paperwork in high schools and eliminate the need for Section 59-101-130.

(Note: Cost for the services to the National Student Clearinghouse is reduced each of the first five years.)

Add 1A. (New Proviso) With the funds appropriated to the Revenue and Fiscal Affairs Office, the state will utilize the services of the National Student Clearinghouse to comply with Section 59-18-1950 of the South Carolina Code of Laws. The funds will allow the state as well as all high schools to receive timely and accurate information about the college-going rate and success of South Carolina students who attend postsecondary institutions. The Department of Education will collaborate with the Revenue and Fiscal Affairs Office to facilitate the exchange and safeguarding of data.

Recommendation 4: Charter School Funding \$29,178,733

The request for additional EIA funds from the Charter Institute at Erskine and the South Carolina Public Charter School Districts is \$57,355,081 for FY 2021-22. As part of this request, the statewide charter school authorizers are requesting an increase in the per pupil increase of 7.5% for both brick and mortar and virtual schools. The increases would be from \$3600 to \$3870 for brick and mortar schools and from \$1900 to \$2043 for virtual schools. This request for \$57.4 million also includes an increase of \$31,743,666 for increased student enrollment during the current school year.

The EIA Subcommittee is recommending: (1) no increase in the per pupil funding level; (2) \$13,306,900 for student enrollment increases in new charter schools; and (3) \$15,871,833 for increased funding of students who enrolled in charter schools in school year 2020-21. The recommendation assumes that half of the student growth in charter schools due to COVID-19 in 2020-21 will continue in 2021-22.

The following chart compares the request of the charter school authorizers with the cost of keeping the per pupil rates consistent.

Fiscal Year 2021-22	Total Increase	Of increase, new schools/enrollment	COVID-19 Increase in Students
7.5% Increase in Rates	\$ 57,335,081	\$ 25,591,415	\$ 31,743,666
No increase in Rates	\$ 45,050,566	\$ 13,306,900	\$ 31,743,666
Recommendation	\$ 29,178,733	\$ 13,306,900	\$ 15,871,833

Further, it is recommended that the 45-day and the 90-day count for Fiscal Year 2020-21 be secured for both charter districts to adjust the projected enrollment, up or down, for 2020-21. The two charter school authorizers will use \$16.4 million in funds unexpended in Fiscal Year 2019-20 and carried forward in Fiscal Year 2020-21 to support the COVID-19 student enrollment growth.

Note: For schools requesting to move from one charter district to the other, the funding would follow the students in the schools to the new district.

Estimating the number of students can be difficult, especially with new schools expecting to open plus the transitory nature of students, especially during the pandemic. However, a process should be developed that more closely estimates the realistic number of students so that the state can make available the appropriate funds for students attending the charter schools across South Carolina without excessive funds in surplus.

In the future, one option would be for each district to outline projections for the new year by school with a rationale and submit to the EOC as part of their program review report. In addition, a percentage could be used to estimate the number of new students based on patterns in the past.

Recommendation 5: Industry Certifications \$2,450,000

In fiscal year 2019-20, \$550,000 in recurring funds was allocated in EIA funds for industry credentials. The Department allocated another \$2,450,000 from savings from the EIA assessment line item. Districts are allotted \$10,000 for industry certifications with the remaining funds allocated based on the number of completers the previous year.

Note: The Department indicates there is an expected three million dollars surplus for 2020-21 in EIA assessment funds. The information from SDE has been requested regarding these unexpended assessment funds.

In the future in order to get a more accurate need of districts, it is recommended for districts to submit to the department by student, the name of the assessment(s) and the cost for each assessment at the end of each school year. This data would not serve only to support the needs for sufficient funding for schools but also provides a more transparent picture of specific industry certifications students obtain.

Recommendation 6: Funding to Increase (CERDEP) 4K Classes \$4,019,246

CERDEP is designed to serve 4-year-olds who meet eligibility requirements based on free/reduced lunch and/or Medicaid in a full day, 180-day instructional program that prepares them to enter kindergarten ready to learn. Over the past decade the South Carolina General Assembly has expanded CERDEP funding to provide greater access to students in districts with high poverty. CERDEP now includes 62 districts.

There are thousands of children in the remaining districts in South Carolina who would benefit from having access to high quality 4K learning experiences. This funding would be one strategy to phase-in a statewide expansion of full day 4K classes.

The funds would be allocated as follows.

- a. The South Carolina Department of Education would receive the funds that were requested for seven (7) additional classes of 20 students each for an additional 140 students. The cost includes \$10,000 per classroom for start-up plus \$4600 per student. The total cost is **\$714,000**.
- b. First Steps would receive **\$3,305,246** or \$4600 per student which is approximately 718 students.

Additionally, the EOC recommends to the General Assembly removing the Department of Social Services (DSS) licensing requirements for all public school 4K classes.

Recommendation 7: EIA 4-Year-Old Childhood (Half Day 4K)

Currently EIA funds allocated for half day 4K is \$15,513,846. This was initiated in 1984 with the enactment of EIA. Districts that currently utilize these funds are not CERDEP eligible. Approximately two (2) million of these dollars are used to administer the 5K and 4K formative assessments.

In order to phase-in a statewide expansion of full day program 4K classes, these funds could be part of an overall strategy to transition from half day 4K to full day. The EOC recommends to the General Assembly to utilize the \$13.5 million in half day 4K to

support statewide expansion of 4K to full day. In addition, the EOC recommends to the General Assembly to remove the licensing requirements from Department of Social Services for all public school 4K classes. There is no fiscal impact to EIA funding.

Recommendation 8: Charter School Learner Validated Pilot \$2,000,000

Pursuant to Proviso 1A.59 of the 2019-20 General Appropriation Act, the Education Oversight Committee (EOC) issued a report to the General Assembly regarding charter school funding models. Recommendations from this report included addressing equity in funding between virtual and brick-and-mortar charter schools as well as working to improve student outcomes in virtual schools, which tend to lag brick-and-mortar schools both nationally and in South Carolina.

“The traditional, seat-time based school schedule is reinforced by current student funding models. The dominant model, which is based on average daily attendance, is not flexible enough to enable the exponential number of variations—including accelerated or expanded time for learning activities—required to implement true personalized learning. As students mix both online and offline learning, they might take courses or components of courses from a variety of providers. New student funding models, no longer based on rigid attendance counts, must evolve to support this integrated set of blended and fully online course and school providers. Otherwise, virtual schools will struggle, as individual schools’ ability to personalize is constrained by a funding stream that cannot support an array of multiple providers. Without mechanisms that enable funds to easily flow across district, state, and national lines at more discrete levels, the field will be stunted by a lack of scale and market-based incentives.”³

A pilot of learner validated funding is sought to provide an alternative to traditional, enrollment funding for virtual high schools and charter high schools. In this learner validated funding pilot, a funding model would be developed to supplement the current base funding and incentivize increased student achievement towards College and Career Readiness (CCR) above the school’s base CCR levels.

Add 1A. (New Proviso) Of the funds appropriated, 2,000,000 shall be allocated to the Education Oversight Committee for the development and implementation of a learner validated funding pilot for charter schools. Up to two virtual high schools and up to two brick-and-mortar charter high schools will be selected by the EOC for inclusion in the funding pilot. In this pilot project, a learner validated funding model will be developed by the EOC to incentivize increased College and Career Readiness (CCR) student achievement in charter high schools that is above the school’s CCR base. The learner validated funding model would also serve as a supplement to the current base charter funding level. Criteria for determining and measuring student achievement and progress towards CCR completion as well as funding amounts will be developed by the EOC as a part of the pilot project. Carry forward of funding is allowed.

³ <https://www.immagic.com/eLibrary/ARCHIVES/GENERAL/EDSCTRUS/E070607T.pdf>

Recommendation 9: COVID Innovative Academic Recovery Camps
\$2,500,000

To provide additional resources to support the S.C. Read to Succeed Act of 2014 and to provide support to students who may have loss instructional time during COVID spring 2020 and fall 2020, the South Carolina Department of Education would create a process to allow school districts to develop and create innovative programs and/or community partnerships to provide after-school, summer or Saturday Academic Recovery Camps in mathematics and reading/writing. If choosing community partnerships, the district would utilize volunteers, mentors, and tutors to support students struggling in reading and mathematics reader in elementary schools across South Carolina. Schools with a fifty percent or greater poverty index would be targeted, however, schools that fall below the 50% would be eligible to serve only pupils in poverty (PIP). Schools that receive the grant would be responsible for outlining how they would measure student performance pre and post in their application in order to measure and produce results in student performance.

The Education Oversight Committee (EOC) would be responsible for evaluating the impact of innovative camps on student performance.

Recommendation 10: Matching Workforce Demands with Career Pathways
\$2,500,000

To meet the current and future workforce demands of our state and nation, SC students and families must understand what the needs and expectations of the workforce are. They must understand the options available to students and what pathways make sense to each individual student and their goals for the future.

The EOC is recommending \$2.5 million to enhance Tallo, an online platform that connects SC students with career and educational opportunities. The program, which already receives state funds, matches students with jobs, internships, college programs and scholarship money. The free app and digital platform allow users to showcase talents and skills on their digital portfolio, so colleges, companies and organizations can identify and connect with them on the app. There are currently over 102,000 Tallo users in South Carolina and it is used in over 200 high schools and career centers.

An enhancement should include a comprehensive look at career pathways and programs of study which are aligned to student interests. The pathways need to be informed by real-time, labor market data to determine high-skill, high demand industry sectors to which career pathways and programs of study will align. This online tool can be used effectively in Individual Graduation Plan (IGP) conferences with students and families and help career and college counselors in schools.

Priority 2: Teacher Recruitment and Retention

Recommendation 11: Increase Compensation for Teachers

A. Other Agencies' Teacher Salary \$336,013

If the General Assembly approves salary increases for teachers at 2%, these funds will allow the special schools to increase salaries of instructional staff by the same percentage as provided by the local school districts in which the special school resides.

B. Increase teacher salaries

The South Carolina Department of Education has requested that teacher salaries be increased by 2 percent in Fiscal Year 2021-22 using general fund revenues. States throughout the Southeast are also focusing on increasing the minimum starting salary as well as increasing all teachers by a specific dollar amount.

How the General Assembly decides to increase teacher salaries, the EOC recognizes that the starting salary and the average teacher salary for teachers in South Carolina must be increased to stay competitive with the region. Revenue and Fiscal Affairs projects the average teacher salary for the Southeast to be \$53,426 in Fiscal Year 2021-22. The average teacher salary in South Carolina in school year 2019-20 was \$53,329.

See table 3 below.

**Table 3
Teacher Salary Comparisons**

Fiscal Year	Southeastern Average Teacher Salary *	% Increase	SC Actual Average Teacher Salary	% Increase	Difference in SC Actual versus SE Average	% Above or Below SE Average
2013-14	\$48,289		\$48,430		\$141	0.3%
2014-15	\$48,985	1.4%	\$48,561	0.3%	(\$424)	-0.9%
2015-16	\$49,363	0.8%	\$48,769	0.4%	(\$594)	-1.2%
2016-17	\$50,119	1.5%	\$50,050	2.6%	(\$69)	-0.1%
2017-18	\$50,750	1.3%	\$50,182	0.3%	(\$568)	-1.1%
2018-19	\$51,854	2.2%	\$50,882	1.4%	(\$972)	-1.9%
2019-20	\$53,213	2.6%	\$53,329	4.8%	\$116	+0.22%
2020-21	\$53,213	0%				
2021-22	\$53,426	0.4%				

Source: SC Revenue and Fiscal Affairs Office, September 1, 2020 letter to State Superintendent of Education.

C. New minimum salary schedule

The EOC recommends that the state consider amending the existing state minimum salary schedule to allow interested districts to pilot a new minimum salary schedule prior to potential state-wide implementation.

Attracting and retaining excellent teachers must always be a top state priority, now more than ever, as South Carolina seeks to help students recover from COVID-related learning losses. Creating more flexibility strategies to pay teachers as the professionals they are, and reward great teaching is vital.

One of the factors that impacts employee satisfaction is salary and the ability to “move up.” The current South Carolina statewide minimum salary schedule is known as a single salary schedule or “steps and lanes.” Teachers are paid based on steps that represent years of services or seniority and on lanes that are their educational attainment i.e. bachelor’s degree, master’s degree, etc.

In simplifying the salary schedule and implementing career levels, bands or ladders, the experience of Wisconsin should be considered. A report by the Wisconsin Center for Education Research documents the changes made. All districts moved away from the single salary structure to some degree. Several Wisconsin districts moved away from automatic step increases, choosing instead to create compensation systems that: embraced district goals, recognized teacher contributions to the organization, aligned with the state’s teacher effectiveness system and moved to a career pathway approach. “The districts limited the number of lanes or change the lanes from education-based to a more career-level approach. All districts modified the steps to reflect a professional path for educators (as opposed to a uniform step and lane system), about half of the districts (in the sample survey) adapted a career level approach, also referred to as career bands or ladders.”⁴

A career-level approach for South Carolina could be implemented to address the following objectives:

- Teachers would be compensated for more than just seniority and educational achievement;
- Such as system might create career pathways that encourage individuals to remain classroom teachers; and
- Provide greater flexibility for schools and districts in recruiting teachers, especially teachers in hard-to-staff disciplines.

In addition to the single salary schedule, districts may give salary supplements or additional pay to teacher through stipends or bonuses. For example, teachers gaining National Board certification at the school may receive stipends. Teachers may also be

⁴ Teacher Compensation: Standard Practices and Changes in Wisconsin. August 2016. Wisconsin Center for Education Research. https://wcer.wisc.edu/docs/working-papers/Working_Paper_No_2016_5.pdf

eligible for hiring or performance bonuses while other districts offer bonuses for teachers who teach hard-to-staff subjects or in hard-to-staff schools.

The South Carolina 2020-21 state minimum salary schedule compensates teachers for years of experience from 0 to 23 years and educational level across five different levels - bachelor's degree; bachelor's degree plus 18 hours; master's degree; master's degree plus 18 hours; and doctorate.

A single salary schedule is used by most states because it minimizes pay bias regarding favoritism, gender and race. They system also gives predictability to teachers while incentivizing teachers to remain in the profession. The longer an individual is employed in the profession, the more pay he or she earns annually, even if the pay is only a 1 or 2 percentage increase. Most salary schedules "stop" after a certain number of years. In our state, the salary schedule stops at 23 years.

Individual districts, however, have extended the steps in their district salary schedule. In 2019-20, 60 of the 79 traditional school districts adopted district salary schedules that exceed 23 years.

The following 19 districts have district salary schedules that "stop" at 23 years:

Allendale	Clarendon 1	Hampton 2	York 1
Bamberg 1	Dillon 3	Laurens 55	
Bamberg 2	Fairfield	Lee	
Barnwell 19	Florence 4	McCormick	
Barnwell 45	Greenwood 51	Marion	
Cherokee	Hampton 1	Newberry	

The criticisms of the current system focus on its rigidity. The single salary schedule does not give flexibility for compensation to attract, reward and retain teachers. The single salary schedule also favors teachers with more seniority if across-the-board pay increases are implemented. In the event district revenues decline, districts are typically locked into paying teachers. Finally, research questions the link between a teacher's education and seniority and students' academic performance.

Recommendation 12: S.C. Teacher Working Conditions Survey \$250,000

Increasing the number of teachers entering the teaching profession is one strategy for reducing the teacher shortage. However, simultaneously addressing the problem of teacher turnover is equally as critical to providing teachers for all of our schools. Research on teacher retention indicates teachers cite working conditions as the

number one reason for leaving the teaching profession⁵. A growing body of research suggests working conditions for teachers influence the quality of teaching, teacher retention and school improvement⁶.

Currently, teachers can participate, annually, in an optional teacher climate survey online. This survey originated in 1985 as part of the 1984 Education Improvement Act. The survey focuses on six indicators of effectiveness: positive school climate, instructional leadership of principals, emphasis on academic, high expectations for students, frequent monitoring of students' success and positive home/school relations. The results of this survey are reported on the school report card by three categories: percent satisfied with the learning environment, percent satisfied with the social and physical environment, and percent satisfied with home/school relations.

The Subcommittee recommends the utilization of a new Teacher Working Conditions Survey either adopted or adapted from the North Carolina Teaching, Empowering, Leading and Learning survey (TELL). Multiple states, including Colorado, Kentucky, Maryland, North Carolina, and Oregon, are now using TELL as part of their strategy to learn more about what should be done to retain teachers from a state policy perspective as well as a district/school policy. A South Carolina Teacher Working Conditions Survey would provide a voice for all teachers in the following areas:

- Community support and involvement
- Teacher leadership
- School leadership
- Managing student conduct
- Use of time
- Professional development
- Facilities and resources
- Instructional practices and support
- New teacher support

The South Carolina Teacher Working Conditions Survey would be assigned to CERRA to secure services for the development and/or administration of the survey. The results would be reported at the state, district and school level. Minimum thresholds for teacher participation at the school level would need to be identified as well as the minimum number of teachers at a school/grade level so as not to be able identify a specific teacher. All teacher responses would be anonymous.

⁵ Podolsky, A., Kini, T., Bishop, J., & Darling-Hammond, L. (2016) Solving the Teacher Shortage. Palo Alto, CA: Learning Policy Institute

⁶ Johnson, S.N., Berg, J.H., Donaldson, M.L. (2005) Who stays in teaching and why: A review of the literature on teacher retention. Cambridge, MA: Harvard School of Education.

An example of a North Carolina teacher survey document showing district level teacher responses in aggregate is shown in attachment C.

Recommendation 13: Support for Expansion of Teaching Fellows, Proteam and Teacher Cadet \$1,000,000

a. In order to encourage and attract quality high school graduates to the teaching profession the Subcommittee concurs with CERRA's recommendation of **\$860,000** for 15 additional Teaching Fellows.

Currently, CERRA awards 200 Teaching Fellows per year to high school graduates interested in becoming a teacher. Approximately 1,000 applications are received by CERRA each year for teaching fellows with 500 students being offered an interview. About 400 high school graduates are deemed eligible for Teaching Fellows with only 200 being awarded. (Note: Applications are expected to increase in 2020-21, as Clemson University will be added as a host Teaching Fellows site.)

Based on data from the 2000-2005 Teaching Fellows cohorts, 78% of the Fellows graduated in the program. Seventy-one percent of the Fellows are employed in South Carolina school districts. Ninety-three percent of the Fellows' graduates have either satisfied their loan to CERRA or are currently teaching for loan forgiveness in South Carolina.

b. In addition, the recommendation includes supporting additional classes for Proteam and Teacher Cadets to ensure every middle and high school can offer these classes to their students. The cost is **\$140,000**.

Priority 3: Evaluation of Alignment of EIA Programs with Strategic Goals/Expected Outcomes

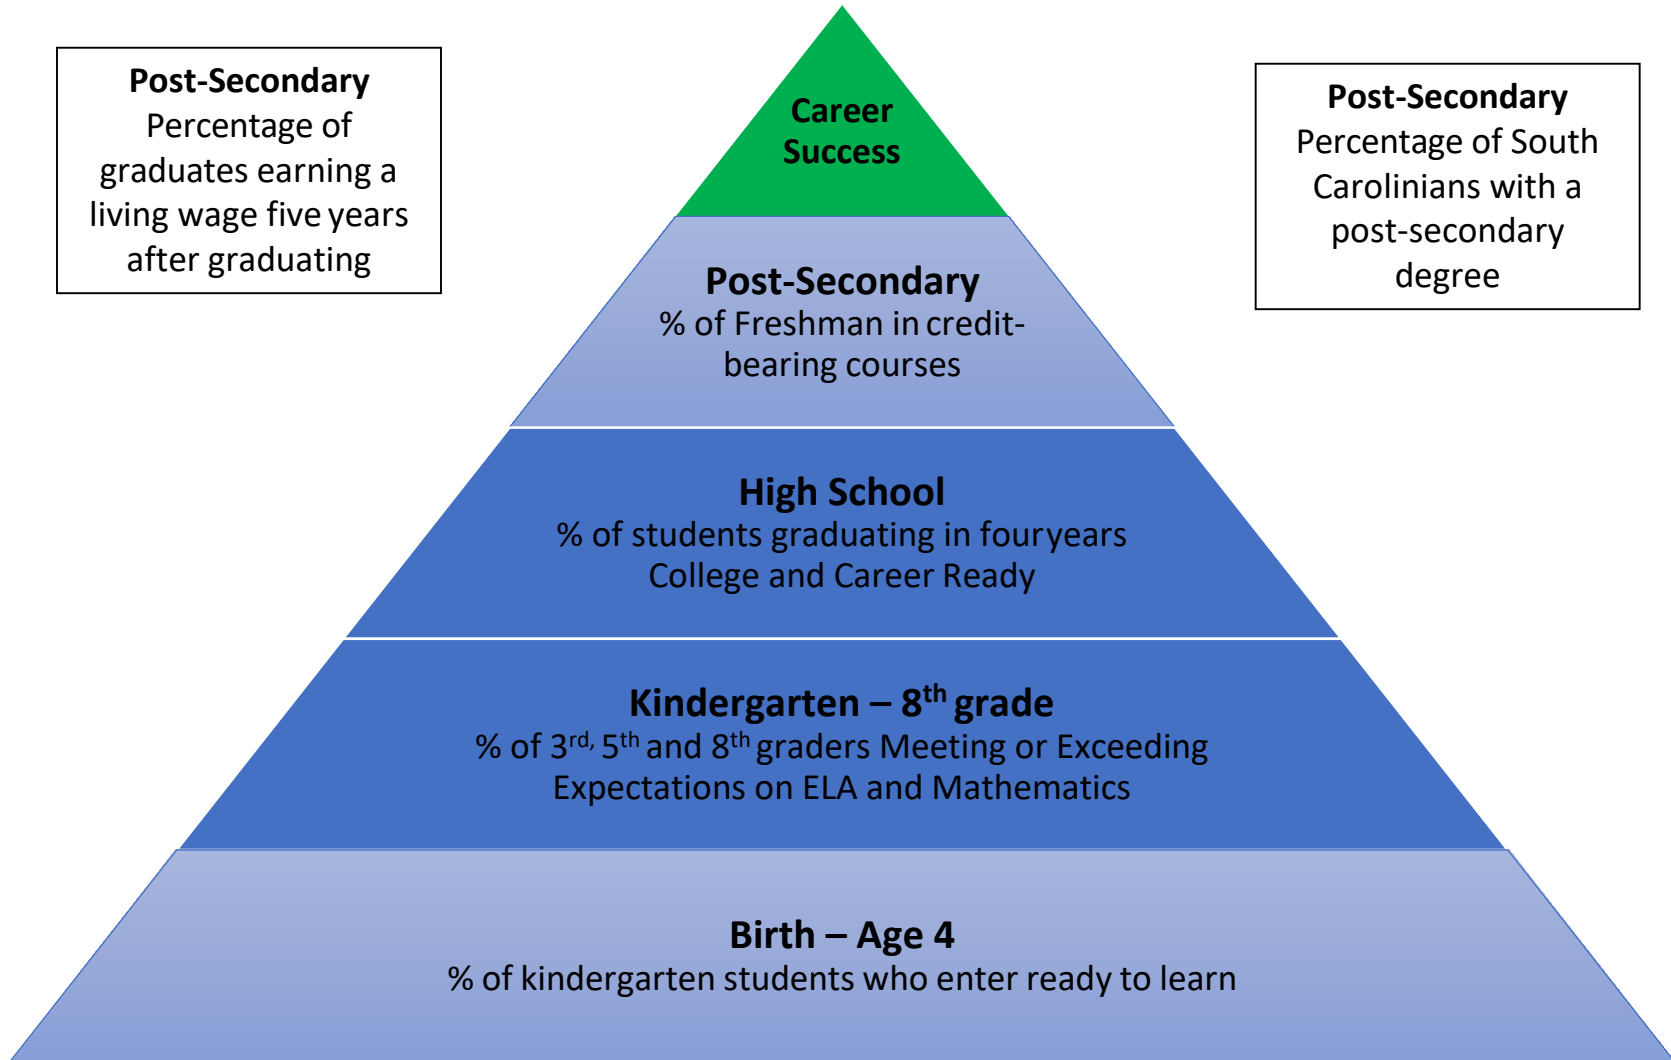

Recommendation 14: Independent Evaluation of EIA Programs \$375,000

The Education Improvement Act of 1984 was established to promote excellence in education in South Carolina schools. Specifically, the Education Improvement Act set out to improve schools in South Carolina by increasing student academic achievement, providing better services to special groups of students and school personnel, improving school conditions, involving extensive community involvement in school affairs, and gaining higher public confidence in our schools.

Currently, the EIA funds 30 programs under the South Carolina Department of Education and 25 programs to other agencies/entities within South Carolina. On an annual basis, each program provides the EOC with a program review that includes goals, strategies and outcomes. Financial data is also provided.

Over the years many of the EIA programs currently funded do not provide the detailed data needed to ensure the programs are working for the purpose stated and/or meet the overarching goals created by the Education Improvement Act. In order to know the effectiveness/impact an EIA program has, it is recommended that annually up to five (5) EIA programs be selected for an independent evaluation. This evaluation would include the data needed to determine if the intended goals of the EIA program are being met, the actual impact on student learning, and/or if the program was appropriate to be funded under EIA. Results of the evaluations and recommendations from the EOC based on the evaluation results would be shared with the EOC, the Governor and the General Assembly for consideration of future funding.

Notes:

- 1- Lottery funds dispersed after fiscal year cut off.
- 2- SC ETV changed personnel in finance and found some accounting errors. All errors have been corrected with journal entries.
- 3- Community Block Grants funds were not all expended by the grants committee. An evaluation of the 2019-20 grants will be conducted from remaining funds during 2020-21.
- 4- CERRA funds remaining are from Rural Teacher Recruitment Initiative and are funds to be dispersed to teachers for loan forgiveness in 20-21.
- 5- These funds are the total funds available to be carried forward from 2020-21 to 2021-22.
- 6- 1.2 million committed to public private partnerships for 4K in 2020-21.

STATE OF SOUTH CAROLINA
DEPARTMENT OF EDUCATION

MOLLY M. SPEARMAN
STATE SUPERINTENDENT OF EDUCATION

November 5, 2020

South Carolina Education Oversight Committee
Attn: Dr. Valerie Harrison
1205 Pendleton Street
Room 502 Brown Building
Columbia, SC 29201

Dear Dr. Harrison:

The Office of Career and Technical Education requests the review and approval from the Education Oversight Committee for the attached recommended Industry Recognized Credentials for the 2020-2021 academic year. In summary, there are currently 254 credentials on the approved list from the previous 2019-2020 academic year. We are seeking to delete 15 of those credentials with the respective reasoning listed by each credential. We are also seeking to add 59 new credentials. These credentials have been recommended and vetted by Career and Technical Education professionals, representatives from business and industry, and other stakeholders. While we are presenting the list for the 2020-2021 academic year, we are also currently working to move towards a stackable credential system for the 2021-2022 academic year. This work began during the previous year and was affected by our demand in other areas due to the COVID-19 pandemic. As a result, our work continues for this initiative with anticipation to complete the stackable credential system by March 2021. Attached, you will find the following:

- 2020-2021 Proposed Industry Recognized Credential List
- 2020-2021 Stackable Industry Recognized Credential Transition Timeline
- 2019-2020 Industry Credential Attainment Data

Page 2
November 5, 2020

Please feel free to contact me with any questions or concerns regarding the aforementioned information. Additionally, I am prepared to attend the November 16, 2020 Education Oversight Subcommittee meeting to answer any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "A. Malone", with a long horizontal flourish extending to the right.

Angel H. Malone
Director
Office of Career and Technical Education

Proposed Industry Recognized Credentials 2020-2021 - DRAFT

Health Science	Certified Clinical Medical Assistant	166	National Healthcareer Association (NHA)	Medical Offices, Clinics, Urgent Care Centers, General Medicine, or Specialty Clinics	A medical assistant is a multi-skilled allied health care professional that specializes in procedures commonly performed in the ambulatory health care setting. Medical assistants perform both clinical and administrative duties and assist a variety of providers including physicians, nurse practitioners and physician assistants. They typically work in medical offices, clinics, urgent care centers and may work in general medicine or specialty practices. According to the Bureau of Labor and Statistics (BLS), employment of medical assistants is expected to grow 23 percent from 2014 to 2024, much faster than the average for all occupations, which are expected to grow around 7 percent. Health Science	Direct Support Professional	251	The National Alliance for Direct Support Professionals (NADSP)	Department of Mental Health, Department of Social Services, Public and Private schools, Private	The NADSP certification program offers powerful benefits to practitioners, their employers and to the people they support. Direct support Professionals benefit by learning and applying best practices and evidence-based skill and knowledge in the workplace. The organizations employing credentialed DSPs can provide stronger assurances of quality to funders and people supported, and can proudly market their employment of nationally certified staff. People receiving supports from certified DSPs will have the advantage of partnering with highly trained professionals committed to supporting them using the ethical and effective interventions that they have mastered. Finally, anecdotal evidence suggests that employees who complete rigorous credential programs stay on the job longer and provide a higher quality of support.	KEEP

Transportation, Distribution & Logistics	Yamaha Certification	252	Yamaha Motor University	Butler Marine, Webster Marine, Sea Island Marine	The Outboard Marine Certification, is conducted by Yamaha Motor University. Yamaha offers technicians industry sanctioned certification on the basis of Yamaha's textbook material. There are 10 modules based on each chapter in the Yamaha textbook. Each module has a review quiz and each module follows the textbook chapters. Once students have completed all chapters and modules, they can take the master test to achieve their certificate in electrical, ignition, fuel systems, lubrication, motor design, gear cases, propellers, motor brackets and boat control. The certification cost is fee to students, however the textbooks are \$95 each. The instructor's program also has to be certified by Yamaha as a Yamaha Dealer, complete with a Yamaha Dealer Number.	KEEP

Architecture & Construction	NATE-Senior HVAC Efficiency Analyst	203	NATE	South Carolina Technical College System	An individual must hold two certification by NATE. NATE certification tests represent real world working knowledge of HVACR systems. Developed by a committee of industry experts nationwide, our NATE exams represent HVACR topics pertinent to contractors, educators, manufacturers and utilities alike. All of the NATE tests are rigorous, multiple-choice, knowledge-based tests and validate a technician's knowledge. NATE candidates may earn Installation and/or Service certification in one or more Specialty areas, including:	ADD	
Arts, A/V Technology & Communication	Flexography First Operator Certification FTA 1	312	FIRST Company Certification	Graymills Corporation, Nilpeter USA, Harper Corporation of America CSW Inc, Accredo Packaging, Inc., Berry Global, GE Enterprises, Smyth Companies, Fortis Solutions Group, KBA-North America, Miraclon Corp., Master Packaging, Inc., Infinite Packaging Group, Platinum Equity, Tension Corp, Siris Capital Group, Eaglewood Technologies, Paper Converting Machine Co, PPC Flexible Packaging LLC, Global Graphics	This certification is perfect for entry-level and non-production flexographic industry personnel. Choose to become 'FIRST Press Operator Certified', 'FIRST Prepress Operator Certified', or 'FIRST Implementation Specialist Certified'. Regardless of which designation you choose, Level I is the same for all certifications.	ADD	
Arts, A/V Technology & Communication	Graphic Communications Advanced	319	Precision Exams	American Manuscript Editors, Aspire Ability, B. E. Publishing, Camino, Career Solutions Publishing, Carpentry Contractors Company, Comcast, DeSantis Landscapes, Edit My English, Flowserve, Goodheart – Wilcox, Harley Davidson, Holiday Inn Express, Little Caesars, Mitsubishi Cement Corporation, Multiple Measures, New York Life, Nexeo, National Geographic Learning, Raddisson, Solution Services, Strong & Hanni Law Firm, Sunroc, Swig, Tallo, Vantage, Wadsworth, Wells Fargo Advisors, West Jordan Chamber of Commerce, Willow Manor, W.W. Clyde	The Graphic Communications Advanced exam covers skills from graphic communications intro and graphic communications intermediate exams and skills in digital file preparation, image capture digital file output, press operations, binding and finishing, measurement, and basic math.	ADD	
Health Science	Physical Therapy Aide	266	AMCA PTAC	Private offices, clinics, hospitals, patient's homes, nursing homes	A physical therapy (P.T.) is an important member of the physical therapy support team. Aides perform nonmedical tasks, such as setting up and cleaning treatment rooms and transporting patients to different areas of a health care facility. Physical Therapist Aides work under the direction and supervision of Physical Therapists. In some states, physical therapy aides also concentrate on gait training, ambulatory training, patient mobility, and rehabilitation.	ADD	
Health Science	Personal Trainer	265	ACSM	Gyms, health clubs, corporate settings, self employed, online	A personal trainer is an individual certified to have a varying degree of knowledge of general fitness involved in exercise prescription and instruction. They motivate clients by setting goals and providing feedback and accountability to clients.	ADD	
Health Science	Certified Medical Administrative Assistant (CMAA)	A73	National Health career Association	Health care offices, private practices, hospitals, physical rehabilitation centers, nursing homes, outpatient care centers, hospice care facilities	As a Certified Medical Administrative Assistant, CMAA (also called a Medical Office Secretary or Medical Office Assistant), you'll keep healthcare offices running efficiently and effectively. Medical assistants are often the first to greet and help patients and can help set the stage for a patient's experience. Operate computer systems to accomplish office tasks, answer calls, schedule appointments, greet patients and maintain files. Student instruction may take place during their senior year in high school, but students cannot sit for this exam until they have graduated.	ADD

Hospitality and Tourism	Certified Guest Service Professional	210	American Hotel and Lodging Association	More than 3900 hotels in South Carolina, S. C. Technical College System, University of South Carolina	Today's successful hospitality and tourism employees must have effective guest service skills in today's competitive market. They must be able to engage and connect with their guests to go above and beyond the call of duty. The Certified Guest Service Professional (CGSP®) designation provides recognition for those individuals who know how to deliver exceptional service by engaging with their guests and creating memorable experiences. Recognized worldwide, the CGSP® designation is the highest acknowledgment of awarding-winning guest service for employees in the hospitality and tourism industry. To qualify for the Certified Guest Service Professional (CGSP®) designation individuals must successfully complete one of AHLEI's Guest Service Gold® training programs.	ADD	
Hospitality and Tourism	Secondary Culinary Graduate	A8	American Culinary Federation	Allen Brothers, Inc. Boars Head Food Service, Libbey Foodservice, U. S. Foods, Culinary Schools, Foodservice Establishments	Students are able to obtain a Secondary Culinary Graduate certification if they graduate from an American Culinary Federation Education Foundation (ACFEF) Secondary Certified program, pass a national competency written exam with a cut score of 70 percent, or pass with an overall average of 70 percent of the written and performance exams.	ADD	
Hospitality and Tourism	Certified Guestroom Attendant	A61	American Hotel and Lodging Association	More than 3900 hotels in South Carolina, S. C. Technical College System, University of South Carolina	The Certified Guestroom Attendant credential recognizes the skills, knowledge and responsibilities needed to keep guest rooms clean, safe and maintained at a lodging property. The certification is supported by the Skills, Tasks, and Results Training (START) for Guestroom Attendant.	ADD	
Hospitality and Tourism	Certified Maintenance Employee	A63	American Hotel and Lodging Association	More than 3900 hotels in South Carolina, S. C. Technical College System, University of South Carolina	The START Program for Individual Positions offers flexible and concise instructions on how to perform key tasks, along with the general hospitality knowledge, and soft skills needed to succeed in a front-line position at a lodging property. The START study guide for Maintenance Employee is intended for trainees learning in a classroom setting. The guide is divided into three sections for the trainee: Knowledge that all hospitality employees need; Knowledge specific to the Maintenance position; Common tasks broken down into a step-by-step method	ADD	
Hospitality and Tourism	Certified Restaurant Server	A62	American Hotel and Lodging Association	More than 3900 hotels in South Carolina, S. C. Technical College System, University of South Carolina	Skills, Tasks, and Results Training (START) for Individual Positions offers flexible and concise instructions on how to perform key tasks, along with the general hospitality knowledge, and soft skills needed to succeed as a food service professional in a front-line position at a dining facility. Successful candidates who complete the START program and pass the 30 multiple-choice Restaurant Server certification exam with a score of 70 percent or higher will receive a certificate	ADD	
Hospitality and Tourism	Culinary Arts Certification	69	American Association of Family and Consumer Sciences	LeCordon Bleu Schools, Macaroni Grill, Bonefish Grill, Famous Daves of America, Texas Beef Council, Cast Iron Catering, Joliet Junior College, Johnson and Wales,	The Culinary Arts Assessment/Certification is an end-of-program assessment that addresses a skill set necessary for success in the culinary industry. Assessment and certification competency topics include safety, health, and environmental, management, leadership, and teamwork; ethics and leadership responsibilities, employability and career development, technical skills—customer service Front of House (FOH), technical skills Back of House (BOH), and preparation techniques (BOH). Law, Public Safety, Corrections & Security	Expert Rating Legal Administrative Assistant Certification	324	Expert Rating	Law offices, governmental agencies, non- profit organizations	Legal administrative assistants are skilled professionals who perform a wide variety of specialized legal work in addition to routine office-oriented tasks. Also known as legal secretaries, they work in different kinds of work settings including law offices, corporations, governmental agencies and nonprofit organizations. This 11-lesson curriculum includes paralegal knowledge in U.S. government, legal terminology, legal analysis, legal communications, court procedures, and laws. Being specialists in the field of administrative assistance, legal administrative assistants are always in high demand. According to the Bureau of Labor Statistics (U.S. Department of Labor), whereas the employment of administrative assistants is expected to increase as fast as the average for all occupations between 2008 and 2018, the employment of legal administrative assistants is projected to be faster than average for the same period. Besides, with annual average earnings of \$49,000, the job outlook for legal administrative assistants is surely bright.	ADD	
Manufacturing	Certified Production Technician	171	Manufactured Skill Standards SCouncil (MSSC)	Amatrol, Greyhound Lines, Winebow, Inc; NAM	The certified production technician training program enables student to build foundational skills. The program's interactive multimedia curriculum uses a competency-based instructional design that teaches Manufacturing Skill Standards Council's (MSSC) nationally recognized standards. An engaging combination of video, text, audio, 3D animation, and interactive activities, the CPT curriculum captures the attention of students, keeps them engaged through the entire, learning process and ignites the passion for achievement.	ADD	
Manufacturing	Siemens Mechatronics Systems Certification	172	Siemens	Plant assembly shops, companies that make industrial automation components, companies that use the product such as factories or machine builders, packaging industry, food and beverage industries, automotive /tires, aerospace	A Siemens Certified Mechatronic Systems Assistant will function as a well-grounded machine operator in a complex system, with responsibility for efficient operation of the equipment with minimal downtimes. Normally a Siemens Certified Mechatronic Systems Assistant would carry out their work at plant assembly sites, workshops or in connections with service operations which utilize complex mechatronic systems.	ADD

Transportation, Distribution & Logistics	I-CAR Advance High Strength Steel (AH Sole)	112	I-CAR	Auto Body Collision and Repair Facilities	This program provides an overview of the different types of steels used in late model vehicle construction, addresses reparability concerns, and provides some vehicle maker recommendations on proper repair techniques: understand vehicle maker recommendations for advanced high-strength steels, identify which tools and equipment should be used when working on advanced high-strength steel (AHSS), understand the effect of temperature on AHSS when determining proper joining methods, understand how heat used during straightening of AHSS may affect strength and durability, identify the importance of monitoring anchoring points when straightening AHSS parts, know straightening precautions for high-strength steel parts, identify the location of AHSS in vehicle construction such as rails, rockers, and pillars, identify the location of UHSS in vehicle construction such as bumpers, door beams, pillars, rockers, and roof rails.	ADD	
Transportation, Distribution & Logistics	I-CAR Automotive Foams (FOM01)	113	I-CAR	Auto Body Collision and Repair Facilities	This online self-study is designed to help better understand the following collision repair-related concepts: understand uses and application procedures for automotive foam understand structural foam considerations and curing methods, identify procedures related to installation of expandable foam, understand how to choose correct, replacement materials, and know how to work safely around automotive foams.	ADD	
Transportation, Distribution & Logistics	I-CAR Automotive Lighting (LSC04e)	114	I-CAR	Auto Body Collision and Repair Facilities	Learning objectives for this module include explaining repair consideration for headlamps, as well as information on switches and lighting circuits. The final module describes positions of lighting in vehicles and collision related problems with lighting. The student will also learn information on switches and bulbs, identify interior and exterior lamps, as well as different types of headlamps, describe repair considerations around operation and repair of headlamps and understand collision related problems in exterior and interior lighting.	ADD	
Transportation, Distribution & Logistics	I-CAR Bolt-on-Exterior Panel Part 1 (EXT03e)	115	I-CAR	Auto Body Collision and Repair Facilities	The course begins by examining considerations around panel alignment and repair considerations. The student will gain insight into tools used for repairing and replacing door hinges. Additionally, students will learn about considerations around replacement parts and recycled automotive parts; identify and understand considerations around working with bolted-on exterior panel replacement parts, understand removal and installation procedures for doors, analyze and diagnose the source of leaks and understand how to install weather stripping.	ADD

Transportation, Distribution & Logistics	I-CAR Bolt on External Panel Part 2 (EXT04E)	116	I-CAR	Auto Body Collision and Repair Facilities	The course opens by discussing steps for identifying and replacing various front body panels, as well as how to properly align front body panels in the collision repair process. The second module in the course explores the removal, installation, and replacement of different style rear body panels; identify and understand considerations around working with bolted-on exterior panel replacement parts, understand considerations around replacing bumpers, hoods, and fenders, understand considerations around removing and installing rear closure panels.	ADD	
Transportation, Distribution & Logistics	I-CAR Corrosion Protection (CPS01)	117	I-CAR	Auto Body Collision and Repair Facilities	This online self-study is designed to help better understand the following collision repair-related concepts: recognize causes of corrosion and understand the corrosion protection processes of manufacturers, identify the steps required in determining where to apply anti-corrosion compounds and undercoating, understand the considerations for properly preparing parts for corrosion protection coatings, explain how to apply corrosion protection materials, identify the function and location of chip-resistant coating and how to replace it during the repair process, identify seam sealer characteristics and applications and identify the different corrosion protection recommendations from the different vehicle makers.		
Transportation, Distribution & Logistics	I-CAR Cosmetic Straightening Steel (STS01)	118	I-CAR	Auto Body Collision and Repair Facilities	This online self-study is designed to help better understand the following collision repair-related concepts: identify characteristics and considerations for steel repairs, examine different types of damage and understand repair procedures, understand procedures and considerations for application of Paintless Dent Repair (PDR).	ADD	
Transportation, Distribution & Logistics	I-CAR Detailing (REF04)	119	I-CAR	Auto Body Collision and Repair Facilities	This online self-study is designed to help better understand the following collision repair-related concepts: perform a thorough vehicle inspection and identify defects in a vehicle finish, be able to remove finish defects by using the proper removal procedures and understand interior and exterior detailing.	ADD

EDUCATION OVERSIGHT COMMITTEE

Date: December 15, 2020

ACTION:

Cyclical Review of the Accountability System Update

PURPOSE/AUTHORITY

SECTION 59-18-910. Cyclical review of accountability system; stakeholders; development of necessary skills and characteristics.

Beginning in 2020, the Education Oversight Committee, working with the State Board of Education and a broad based group of stakeholders, selected by the Education Oversight Committee, shall conduct a comprehensive cyclical review of the accountability system at least every five years and shall provide the General Assembly with a report on the findings and recommended actions to improve the accountability system and to accelerate improvements in student and school performance. The stakeholders must include the State Superintendent of Education and the Governor, or the Governor's designee. The other stakeholders include, but are not limited to, parents, business and industry persons, community leaders, and educators. The cyclical review must include recommendations of a process for determining if students are graduating with the world class skills and life and career characteristics of the Profile of the South Carolina Graduate to be successful in postsecondary education and in careers. The accountability system needs to reflect evidence that students have developed these skills and characteristics.

CRITICAL FACTS

The EOC is partnering with the SCDE and the Center for Assessment to accomplish a cyclical review pursuant to Section 59-18-910. The Accountability Advisory Committee members represent educators, parents, businesspeople, and community members. The final Accountability Framework will be provided to the EOC when it is finalized by the AAC in late December 2020. The AAC has proposed meeting via Zoom on either 12/16, 12/17, 12/18. Once complete, the report is expected to provide a framework of recommendations for future accountability systems.

The EOC staff proposes that that the final framework be sent to all members of the EOC and State Board of Education upon receipt. A Working Group, composed of EOC and State Board of Education members, will provide details and timelines before sending on to the SC General Assembly.

TIMELINE/REVIEW PROCESS

October 2019: EOC approves proposal for Cyclical Review process.

February 24, 2020: Accountability Advisory Committee (AAC) Meeting #1

May 5, 2020: AAC Meeting #2

July 28, 2020: AAC Meeting #3

October 27, 2020: AAC Meeting #4

November 9, 2020: AAC Meeting #5

December 10, 2020: AAC Meeting #6

December TBD: AAC Review of Final Report

MEMORANDUM

TO: District Superintendents
FROM: Matthew Ferguson
DATE: November 20, 2020
SUBJECT: Grading for End-of-Course Examination

The South Carolina Department of Education (SCDE) communicated to district superintendents in a [memorandum](#) dated October 27, 2020 that the State Superintendent would use the waiver authority granted her under Act 135 to waive the 20 percent requirement for all EOCEP assessments taken in the 2020–21 school year (SY) (fall 2020, spring 2021, and summer 2021). Absent approval of a federal waiver, districts must still administer all EOCEP assessments in SY 2020-21.

As districts must now decide whether student EOCEP results will be included in the calculation of final course grades, the Education Oversight Committee would remind districts that the results for English, Algebra and Biology EOCEPs administered in SY2020-21 will be reported on future school report cards and used to calculate future school report card ratings.

English, Algebra, and Biology EOCEP assessments are lagging indicators included on school report cards in the graduation year of that specific 9GR cohort. Thus, most of the scores from English and Algebra EOCEPs administered during the SY 2020-21 will be reported and used to calculate ratings on school report cards for SY 2023-24. Scores for Biology EOCEP administered this school year will not be reported and used to calculate ratings until the school report cards for SY 21-22.

The Education Oversight Committee (EOC) recently recommended the waiver of school ratings for SY 2020-21, but this recommendation was limited to SY 2020-21. For your reference, the following are the recommendations related to school accountability in 2020-21 forwarded to the General Assembly by the EOC.

1. EOC recommends a commitment to administering state assessments to all students in school year (SY) 2020-21 to provide statewide and district level data.
2. The EOC recommends requesting from the South Carolina Department of Education a plan to administer assessments to a sample of students in SY 2020-21 to provide state level data by subgroup in the event it is not possible to administer state assessments to all students.
3. The EOC recommends waiving school ratings for SY 2020-21.
4. The EOC recommends the publication of school report cards for SY 20-21 by October 2021 to include all available data.

NAEP postponed until 2022 amid COVID-19 challenges

Flickr; Alan Levine AUTHOR [Kara Arundel](#) PUBLISHED Nov. 25, 2020

Dive Brief:

- The next testing cycle of the National Assessment of Educational Progress will be delayed until 2022 because too many students are attending school remotely and because in-person testing conditions are constrained due to the pandemic, the National Center for Education Statistics said in its Nov. 25 announcement.
- NCES officials, school administrators and others had hoped the national-level assessments for reading and math would progress this year so education stakeholders could continue gauging trends in students' knowledge of core academic subjects, but they now acknowledge the difficulty of obtaining reliable results amid continued educational disruption.
- At the state and local levels, officials are continuing to evaluate options for assessing students with standardized tests this school year.

Dive Insight:

The announcement from NCES Commissioner James Woodworth included state-level details of high COVID-19 risk levels and the large portions of students identified for the testing cycle who are learning remotely or in buildings that enforce social distancing measures or limit visitors, including testing proctors.

“If we attempted to move forward with a collection in 2021 and failed to produce estimates of student performance, we would not only have spent tens of millions of dollars, but also will not by law be able to conduct the next grades four and eight reading and mathematics assessments until 2023,” Woodworth said in a statement posted to the NCES website.

A representative sample of students from every state take the NAEP exams, rather than the entire population of students. NCES had planned to administer the 2021 NAEP to a smaller but still representative sample of students in grades 4 and 8 for the reading and math assessments, but national assessments for grade 8 U.S. history and civics and the age 17 long-term trend were already being postponed, according to earlier NCES announcements.

Carissa Moffat Miller, chief executive officer of the Council of Chief State School Officers, said in a statement that the council supports the decision to delay the NAEP. “I recognize this was not an easy decision, but I believe it is the right one based on what we know today about this virus and its impact on schools,” Miller said.

State and local school administrators have been contemplating how to administer standardized tests safely and equitably this school year. In a Sept. 3 letter to state school chiefs, U.S. Secretary of Education Betsy DeVos said that although waivers for the testing requirement in the Every Student Succeeds Act were granted in the spring, states should not expect federal waivers for summative assessments this school year.

In the NCES announcement, Woodworth said the decision to postpone the 2021 NAEP may offer states time for conducting their assessments. Because state assessments are administered by school staff and existing equipment, the risks for state-level testing are not as high compared to NAEP testing, which use shared equipment and outside proctors, wrote Woodworth.

“This state-level data can serve as a bridge until Spring 2022 when NCES will likely be able to conduct the national NAEP assessment in a manner that has sufficient validity and reliability,” Woodworth wrote.
