Students included in the Student Progress Rating

There must be at least **twenty** students who are associated with the school in subject/grade/year. The association could mean they were tested at the school or at the district level.

The above language REPLACES the language in the Accountability Manual, published September 4, 2018, which stated that there must be at least six students associated with the school in subject/grade/year.

The following document produced by EVAAS describes in detail how the school accountability composites are calculated: (<https://scva.sas.com/support/EVAAS-SC-HowSchoolAccountabilityCompositesAreCalculated.pdf>)
